Professional Summary

Full Stack Mobile Developer with over ten years of experience designing, developing, and maintaining mobile, web, and desktop applications using Android, Swift, Jetpack Compose, JavaScript, and PHP. Proven track record building fitness, communication, and navigation apps for Android and iOS, integrating GPS, wearable connectivity, and real-time features. Skilled in RESTful and SOAP API development, database design, and system integration using MySQL, PostgreSQL, and SQLite. Experienced in Agile/Scrum, CI/CD, and DevOps practices. Strong collaborator with leadership and mentoring experience, and a solid background in data encryption and secure development.

Professional Experience

- Race Roster North America – Mobile Developer (2021 – Present | Ontario, Canada)
 - Contributed to the development of the ASICS Runkeeper app for iOS and Android, enhancing user engagement through audio-guided workouts, personalized training plans, and virtual challenges.
 - Developed and maintained companion widgets and smartwatch apps to extend mobile functionality.
 - Built Android and iOS versions using Kotlin, Jetpack Compose, RxJava, Coroutines, Flow, Swift, and SwiftUI.
 - Implemented unit, automation, and regression tests to ensure stability and quality.
 - Managed data persistence and synchronization using SQLite and RESTful APIs with a Data Mapper (DTO) pattern.
 - Worked on localization using Crowdin to support multilingual app experiences.
 - Used Applause for digital quality testing and Amplitude for analytics and behavioral insights.
 - Collaborated in an Agile/Scrum environment with daily stand-ups and sprint reviews.
- FVN Alliance Inc. – Android Developer (May 2019 – Aug 2020 | Toronto, Canada)
 - Developed Parking Enforcement, an Android app recognizing Canadian license plates and verifying parking status.
 - Created multiple Android applications including Parking Legends, Parking App, Dialer App, Camera Player, and Video Recorder.
 - Integrated Google APIs and private services for navigation, location tracking, reservations, and real-time communication.
 - Implemented cloud-based video storage and home surveillance connectivity.
 - Used Android Studio, SQLite, GitHub, and Scrum methodology.

- DCO Group – Full Stack Developer (Feb 2019 – Apr 2019 | Havana, Cuba)
 - Developed a company website using HTML, CSS, JavaScript, jQuery, Ajax, and .NET, delivering a responsive interface.
 - Designed the MySQL database architecture and supported Agile/Scrum collaboration.
 - Utilized GitHub for version control and CI practices.
- Technological University of Havana – Lead System Architect (Sep 2018 – Jan 2019 | Havana, Cuba)
 - Led the development of the university's corporate website using HTML, CSS, JavaScript, PHP, and .NET.
 - Designed and implemented the PostgreSQL database for optimized performance.
 - Created RESTful and SOAP web services to integrate faculty data via Web API.
 - Designed backend and frontend interfaces to ensure a seamless user experience.

Education

Bachelor's Degree in Software Engineering

Technological University José Antonio Echeverría, 2011–2017

Skills

- Mobile Development (Android, iOS, Kotlin, Swift, Jetpack Compose, RxJava, SwiftUI)
- Web Development (JavaScript, PHP, HTML, CSS, Node.js, Laravel, Yii, .NET)
- Database Design (MySQL, PostgreSQL, SQLite)
- API Development (RESTful, SOAP, ESB/Anypoint)
- Testing & Tools (Applause, Firebase, CodeMagic, Amplitude, Crowdin)
- Version Control (GitHub, Subversion, Mercurial)
- Agile/Scrum, CI/CD, DevOps practices
- Leadership & Mentorship, Secure Coding, Data Encryption

Languages

- English – Professional Proficiency
- Spanish – Native
