SUMMARY

Full-stack developer with hands-on experience delivering production-grade web and mobile applications for startups and client-facing environments. Skilled in React, Node.js, TypeScript, Flutter, Firebase, and MongoDB. Strong ability to build scalable features, design clean APIs, and collaborate with design and product teams. Seeking opportunities in software development, web engineering, or mobile development.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Dart, Java

Frontend: React, Next.js, Angular, TailwindCSS, Svelte, Flutter

Backend: Node.js, Express, Firebase Functions, PHP (WordPress), Temporal.io, AWS, SpringBoot

Databases: MongoDB, PostgreSQL, MySQL, Firebase

Tools: Docker, Git, Figma, Stripe, Google Analytics

EXPERIENCE

Full-Stack Developer

May 2025 – Present

Crawfty (Remote)

- Developed production-ready web/mobile apps across e-commerce, logistics, and media using React, Node.js, and MongoDB.
- Designed scalable APIs and integrated them into responsive frontends.
- Used Docker to streamline deployment and improve maintainability.
- Collaborated with designers and QA to deliver high-quality features.

Junior Full-Stack Developer

Nov. 2024 – May 2025

ByllKreate (Remote)

- Migrated large Angular applications to React, improving maintainability and load performance.
- Rebuilt cWordpress plugins using Svelte and integrated backend APIs
- Built a multiplayer Domino game using React, Temporal.io, and custom services.
- Contributed to cross-platform apps in Flutter and Firebase
- Collaborated in sprint planning, QA reviews, and cross-functional development cycles.

Junior Developer

Jun. 2024 – Nov. 2024

XRStudios (Remote)

- Improved workflows in a Wordpress-based courier system.
- Contributed to a government-facing litigation platform using React and Node.js
- Implemented reusable UI components and backend integrations.

EDUCATION

Ontario Tech University

Oshawa, ON

BSc (Hons) in Computer Science

Sep. 2020 – Jun. 2024

- Relevant Coursework: Data Structures, Algorithms, Web Design, Databases, Scientific Data Analysis

PROJECTS

OX Courier System | *React, Node.js, MongoDB, Express, Socket.io*

- Developed a comprehensive courier management platform for efficient delivery tracking, route optimization, and customer management.
- Built reporting and analytics features for courier operations.

CaptureLand | *React, Next.js, TypeScript, Firebase, Stripe*

- Created an innovative real estate platform that combines property photography, virtual tours, and marketing tools.
- Implemented interactive experiences to help real estate professionals showcase properties.

EnterJamaica | *React, MongoDB, TypeScript, Stripe, Google Analytics*

- Designed and built a platform to assist users in completing Jamaica's mandatory C5 immigration form.
- Implemented eSIM purchasing with Stripe and tracked engagement using Google Analytics.
