

Severyn Smykalo

Developer Software

 **My Stack:** C#, C++, PHP, Java, JavaScript, TypeScript, ASP.NET Core, Spring Boot, Laravel, Hibernate, Keycloak, React, Angular, UML, Design Patterns, Microsoft Azure, MySQL, PostgreSQL, MongoDB, Redis, Flyway, Mongock, EF Core Migrations, Docker, Kubernetes, Nginx, Git, GitHub, CI/CD

Experience

IT Step Bootcamp (Ukraine, Kiev)	– Backend developer , January 2025 – March 2025
----------------------------------	--

- Backend: **Java 21, Spring Boot 3, Maven, Hibernate, Flyway, Mongock**
- Frontend: **React (website), Vue + React Hybrid (Room Planner)**
- Databases: **PostgreSQL, MongoDB (GridFS for media and 3D models), Redis**
- DevOps & Security: **Docker, Kubernetes, Keycloak (OAuth 2.0 / RBAC), Nginx**

HomeSpace Platform .Worked as a backend developer in a team of **8 specialists** (3 designers, 3 frontend developers, 1(**ME**) backend, 1 DevOps) on creating a **modular furniture design and visualization platform**, inspired by IKEA but built with a more scalable and flexible architecture.

Intern Full-Stack Developer, Elensoft (Ukraine, Kiev)	– Fullstack developer , 2025 March - July 2025
--	---

- **.Net Core C#, LINQ, SQL, Microservices, EventBus (RabbitMQ), MSSQL, Redis**
- **Angular, Typescript, Microfrontend (Module Federation)**

What I Did:

1. Implemented front-end applications using **Angular (TypeScript)** for key business modules.
2. Developed **backend microservices in .NET 9 (C#)** to support complex business logic required by the frontend.
3. Designed and optimized **database structures in MSSQL** and integrated **Redis** caching for faster performance.
4. Integrated **EventBus (RabbitMQ)** for asynchronous communication between services, improving scalability and responsiveness.
5. Worked within a **DDD-based microservice and microfrontend architecture**, ensuring modular development and smooth feature extension.

Full-Stack Java Developer, Vneuron (Ukraine, remote)	– Fullstack developer , 2025 July - Present
---	--

- Java, Spring Boot, Spring Security, Spring Batch, Spring Integration , Hibernate / JPA REST API, Microservices , Elasticsearch , PostgreSQL, Maven, Docker, CI/CD
- Angular TypeScript, HTML, CSS

My Responsibilities:

1. Participated in building new features: **research, solution design, architecture decisions, development, and system integration.**
2. Ensured high code quality by following modern best practices (**Clean Code, SOLID, testing**).
3. Performed bug fixes and evolutionary improvements to enhance **system stability and performance.**
4. Stayed up to date with technology trends and applied modern development approaches.
5. Took initiative by **proposing optimizations and technical improvements.**
6. Created clear **technical documentation** for implemented features and system changes.

Soft Skills

- Responsibility and attention to detail
- Communication and teamwork
- Working with documentation
- Analytical thinking and problem solving
- Organization and resource management
- Leadership and initiative
- Customer-centricity and flexibility
- Result orientation

Education

<i>Secondary School, Ukraine</i>	2011-2018
<i>Lyceum, Ukraine</i>	2018-2021
<i>It Step Academy, Ukraine</i>	June 2023 – May 2025 (<i>Software Development</i>)

Languages

<i>English</i>	Good communication level
<i>Ukrainian</i>	Native

I'm actively working on improving my English skills through daily practice, communication with native speakers, and professional vocabulary development to perform better in the workplace.

Contacts

<i>Address</i>	5545 Vedder Rd , Chilliwack , BC , V2R 6K4
<i>Phone</i>	604 991 2964
<i>Gmail</i>	cool.muzzy.gmaio.com@gmail.com
