Full Stack Developer | AWS & CI/CD Specialist

With 3+ years of experience in full stack development and infrastructure management, I have spearheaded the design and development of scalable web and mobile applications using modern frameworks. I have managed infrastructure on AWS and implemented CI/CD pipelines to automate builds, tests, and deployments. My expertise includes developing secure RESTful APIs, integrating third-party services, and collaborating with cross-functional teams to ensure product quality and user satisfaction. Key skills: Full Stack Development, AWS Infrastructure Management, CI/CD Automation, RESTful APIs, Agile Collaboration, Security Best Practices.

Experience

Transfergratis – Full Stack Developer

Sep 2024 – Oct 2025 | Bafoussam, Cameroon

- Reduced deployment time by 80% through AWS automation (CodeDeploy, CodePipeline).
- Designed and implemented secure RESTful APIs, integrating payment gateways, notifications, and authentication systems.
- Built responsive web and mobile applications with React.js, Next.js, React Native, and Expo.
- Configured AWS CloudWatch monitoring and alerts to ensure uptime and reduce incidents.
- Implemented automated unit and integration testing with Jest and PHPUnit.
- Optimized front-end performance using lazy loading and code splitting.
- Deployed mobile apps with OTA updates via Expo.
- Secured communications with HTTPS, JWT tokens, and OAuth2.
- Authored internal DevOps documentation and onboarding guides for new developers.
- Collaborated with product and design teams using Notion and Google Workspace.

Global Technology in Africa – Full Stack Developer

Sep 2022 – Aug 2024 | Douala, Cameroon

- Developed full-stack business applications for digital transformation projects.
- Designed microservices with Spring Boot to improve modularity and scalability.
- Built front-end interfaces with Angular and Next.js, focusing on UX/UI and accessibility.
- Administered Hostinger VPS: configured Nginx, SSL certificates, backups, and log monitoring.
- Integrated real-time messaging and notifications using Firebase and WebSockets.
- Conducted performance testing to identify and resolve bottlenecks.
- Established CI/CD workflows with GitHub Actions to streamline delivery.
- Mentored junior developers and interns on coding standards and security best practices.
- Collaborated with project managers and designers in agile environments (Trello, Slack).

Education

Bachelor in Computer Science

University of Douala · Oct 2018 – Jul 2021

Technical Skills

- **Programming & Frameworks:** React, Next.js, Angular, Laravel, Spring Boot, Django, Python, Java, PHP, JavaScript, TypeScript
- **Cloud & DevOps:** AWS (EC2, S3, RDS, DynamoDB, CodePipeline), Docker, GitHub Actions, Jenkins, Linux
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Languages:** English (professional), French (native)
