Education/Certifications

Bachelor of Science Honors, Computer Science

2019-2027

University of Toronto, Ontario, CA (GPA: 3.5/4|Dean's List Scholar)

Certified Platform Developer I

2024

Salesforce

Skills

- **Programming Languages:** Proficient in C#, TypeScript, JavaScript, Python, Java, C++, MAUI, HTML, CSS, & SQL.
- **Web Development:** Proficient in Vue3, Vuetify, and .NET; familiar with React, Node.js, and building RESTful APIs.
- **Database Management:** Proficient in Microsoft SQL Server (SSMS), MySQL, Entity Framework, Code-First Migration, and Scaffolding; skilled in designing and optimizing database schemas.
- **Cloud Technologies:** Knowledgeable in AWS, Oracle Cloud, Azure
- **Version Control & CI/CD:** Experienced with Git, GitHub, Gitflow, Jenkins, Azure DevOps
- **Software Development:** Object-Oriented Programming, Test-Driven Development (Pytest), Behavior-Driven Development (BDD), Agile practices (Scrum); Familiar with Salesforce; quick to learn and adapt to new CRM systems such as Maximizer CRM, Barcode Scanning
- **Collaboration Tools:** Proficient in Jira, Slack, Trello, Azure DevOps Boards, Miro, Microsoft Teams
- **Communication:** Strong written and verbal communication skills, particularly in technical environments; experienced in collaborating with cross-functional teams, including security specialists, analysts, and senior leadership.

Work Experience

- **Intermediate Software Developer @ Balanced+ (Oct 2024 - Present)**
 - **Developed** a multi-tenant platform application from the ground up using Vue3, MSSQL, TypeScript, and .NET (C#), now serving **8+ clients**, and **continuously scaling and maintaining** it for performance, and reliability.
 - Designed and implemented a **code-first database architecture** using **Entity Framework**, transitioning from **MySQL to Microsoft SQL Server (SSMS)** resulting in a **30% improvement in scalability**.
 - Built and deployed **RESTful APIs** for authentication and token management, later integrating Microsoft Authentication to simplify sign-ins and provide a seamless, single-login experience across all client applications, enhancing user convenience and workflow efficiency.
 - Created a **modular web UI** from scratch using reusable components (data tables, animations, treeviews), streamlining feature development and improving user task completion speed by 40%.
 - Applied **Gitflow** and full-stack development practices to streamline deployment workflows and ensure consistent integration across development environments.
 - **Collaborated** with a **cross-functional team** of **developers, security experts, and business stakeholders** to design and deliver a secure, full-scale application that met all organizational and compliance requirements on schedule.
 - Developed a **.NET MAUI app** for an **inventory management system** with an **integrated barcode scanner**, replacing laser scanners. Delivered an **MVP** that performed well in client testing, scanning barcodes from up to **3 meters in low-light environments**.
- **Software Developer Intern @ SOTI Inc. (May 2022 - Aug 2023)**
 - **Coordinated** and **executed** the **end-to-end agile development** of a **new group profiles feature** in MobiControl, resulting in a successful release to 10,000+ users and improved organization for corporate customers.
 - Developed 10 new API routes in **C#** and **.NET**, optimizing data handling and improving system performance by **15%**.
 - Reverse-engineered existing modules and created detailed frontend and backend design documents (**HTML5, CSS3, JS**), successfully passing 6 design review meetings with 15 senior architects to secure approval for a new functionality.
