

ABDELRAHMAN ELAYYAN

Java Backend Developer | FinTech / BNPL | Microservices & Integration

Ontario, Canada • 647-919-3307 • abdelayyan@gmail.com • linkedin.com/in/abdelayyan

PROFESSIONAL SUMMARY

- Java backend engineer with 5+ years building integration-heavy systems across commerce and financial services (banking and BNPL).
- Expertise in Spring Boot microservices, REST/SOAP APIs, messaging, and secure integrations (OAuth 2.0 / OIDC, JWT).
- Hands-on with cloud and containers (AWS/Azure, Docker, Kubernetes) and CI/CD (Bitbucket Pipelines/Jenkins).
- Owns services end-to-end: design, implementation, testing, deployment, production support, and documentation.

TECHNICAL SKILLS

Java (8-21), SQL, Python, JavaScript

Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, OpenAPI/Swagger, Maven/Gradle

REST, SOAP, Apache Kafka, RabbitMQ, IBM WebSphere MQ / IBM Integration

PostgreSQL, MySQL, MongoDB, SQL Server

Docker, Kubernetes, AWS (EC2, S3, Lambda), Azure, Bitbucket Pipelines, Jenkins

JUnit, Mockito, WireMock; Agile/Scrum, SOLID, CI/CD

PROFESSIONAL EXPERIENCE

Mada (Buy Now Pay Later FinTech), Ottawa, Canada

Backend Developer / Solution Architect | Apr 2025 - Present

- Led backend architecture for a BNPL platform using Spring Boot microservices, IAM (Keycloak/OIDC), and event-driven integrations (Kafka).
- Delivered onboarding and risk services (OTP verification, KYC integrations, eligibility/limit checks) with audited workflows and RBAC.
- Designed schemas and migrations (Flyway) and established reusable service templates, standards, and code-review practices.
- Integrated with external providers (eKYC/identity verification, ERP/merchant systems, payment services) and used WireMock to unblock development when partner APIs were not ready.

Sun Distribution Inc., Toronto, ON

Technology Supervisor / Backend Developer | Mar 2023 - Apr 2025

- Built Spring Boot services automating order workflows and integrations (QuickBooks + SPS Commerce), improving throughput and reducing manual effort.
- Implemented secure third-party connectivity using OAuth 2.0 and JWT-based service authentication; standardized token handling, retries, and error recovery.
- Created CI/CD pipelines with Bitbucket Pipelines and Docker, improving release consistency and reducing deployment lead time.

- Optimized persistence (MongoDB) and improved observability (structured logs/metrics), contributing to fewer production incidents.

Core Technology Solutions, Amman, Jordan

Java Developer (Banking Integration) | May 2019 – Oct 2022

- Built backend services for banking clients using Java, Spring Boot, and IBM middleware; improved transaction processing performance and stability.
- Developed RESTful APIs and SOAP services for secure inter-system integrations; enforced authentication/authorization using Spring Security and JWT.
- Optimized SQL queries and database access patterns; owned troubleshooting and production support for critical flows.

EDUCATION

Post-Diploma, Computer Applications Development – Conestoga College (Toronto, ON)

Post-Diploma, IoT: Systems Architecture & Integration – Centennial College (Toronto, ON)

CERTIFICATIONS

IBM Certified BPM Developer • IBM Certified Solution Developer
