EDUCATION

University of British Columbia

Bachelor of Science, Major in Computer Science — GPA: 3.8

Vancouver, BC

Sep. 2021 – Nov. 2025

EXPERIENCE

Web Developer - *Drupal, PHP, Twig, Confluence, ServiceNow, GitHub, Harvest*

May 2024 – December 2024

UBC Web Services

Vancouver, BC

- Created and managed 150+ UBC websites and web applications
- Improved website load times by up to 68% through by optimizing host and site configurations
- Developed documentation and training for Drupal workflows, hosting configurations, and GitHub integrations

Notetaker

September 2023 – December 2023

UBC Centre for Accessibility

Vancouver, BC

- Created clear and detailed class notes in Discrete Mathematics for students with disabilities at UBC.

PROJECTS

Distributed Data Store | *Golang*

- Implemented a fault-tolerant distributed key-value store using the Raft consensus algorithm for leader election and log replication
- Created a client API supporting GET, PUT, and DELETE with linearizability, duplicate detection, and persistent storage guarantees

ICBC Road Test Practice Tool | *JavaScript (Leaflet), OSRM API, OpenStreetMap*

- Developed an app that generates standardized driving test routes for ICBC road test locations in Metro Vancouver
- Integrated OSRM API for route calculations and Leaflet for interactive map visualization
- Designed routes to follow standard testing elements such as intersections, school zones, and varying speed limits, with durations of 15-30 minutes

Image Stitching | *Python (OpenCV, NumPy)*

- Created a pipeline to stitch multiple images into a single panorama
- Implemented SIFT keypoint descriptor matching and outlier filtering using RANSAC for image correspondence
- Implemented homography estimation and image warping for image alignment and stitching

Bug Tracker | *JavaScript (React / NextJS), MongoDB (NoSQL database), Tailwind CSS*

- Implemented a ticketing system CRUD web app, which can define issue importance, track problem creation timestamps, and monitor issue progress
- Used NextJS to handle routing and UI creation, Tailwind CSS for styling, and MongoDB for maintaining data integrity

TECHNICAL SKILLS

Languages: Python, HTML, CSS, JavaScript/TypeScript

Databases: SQLite, MySQL, PostgreSQL, MongoDB

Developer Tools: Git, GitHub, VS Code, IntelliJ, Confluence, Jira, Harvest

Libraries: React, Node.js, Flask, pandas, NumPy, Matplotlib, Drupal, JUnit, Twig, Tailwind
