

Damian Attia-Barillas

(226)-739-9799 | damiana.barillas@gmail.com
Windsor, ON

Professional Summary

Analytical and highly driven Computer Science graduate with a specialization in Software Engineering. Adept at solving complex technical issues, leading collaborative projects, and adapting swiftly to new technologies and environments. Recognized for strong leadership, communication, and mentoring abilities, with a proven track record in both academic and customer-facing roles. Passionate about continuous learning, with a foundation in multiple programming languages and data systems.

Core Competencies

- Advanced Troubleshooting & Debugging
- Database Design & Optimization
- Object-Oriented Programming (C++, C#, Java)
- Python Scripting & Automation
- Front-End Development (HTML/CSS)
- Data Handling & Reporting (Excel, Word)
- Bilingual Communication (English, Basic French)
- Agile Teamwork & Independent Execution

Technical Skills

Languages: SQL, C, C#, C++, Java, Python, HTML/CSS

Tools & Platforms: Oracle SQLPlus, Git, VS Code, Eclipse

Software: Microsoft Excel (PivotTables, VLOOKUP), Word

Operating Systems: Windows, Linux

Education

- Bachelor of Computer Science (Honours) – Software Engineering Specialization
- University of Windsor | 2021 – 2025
- GPA: 3.9/4.0
- Completed projects involving full-stack development, database schema design, and object-oriented programming

- Coursework: Software Engineering Principles, Data Structures, Agile Development Practices, Web Development, Operating Systems

Professional Experience

Teaching Assistant – University of Windsor
Sept 2024 – Apr 2025

- Delivered personalized guidance to over 150 students in Oracle SQLPlus and database fundamentals
- Facilitated lab sessions and office hours, boosting student performance by an average of 10%
- Streamlined grading and feedback workflows, reducing turnaround time by up to 70%

Sales Associate – 7-Eleven, Windsor, ON
June 2022 – Apr 2024

- Provided exceptional customer service, resulting in a 95% satisfaction rating (based on internal surveys)
- Handled high-volume transactions and inventory management during peak hours
- Demonstrated reliability and adaptability by maintaining perfect attendance and consistent performance under dynamic work conditions

Additional Highlights

- Completed multiple solo and group projects in C++ and Python, including a simulated accounting system and a sentiment analysis web app
- Strong mathematical background used to optimize algorithm performance in course projects
- Eager problem-solver who thrives on challenges and is currently expanding knowledge in cloud computing and DevOps
