Professional Summary

Intermediate Software Developer with 3+ years of experience designing scalable backend systems in C#/.NET. Proven expertise in data engineering, API design, and cross-functional collaboration. Skilled in delivering technical solutions for data processing and real-time client requirements in Agile and Kanban environments. Additionally, 6 years of prior experience as a Systems Engineer at Beirut Airport, specializing in network configuration, system maintenance, and incident management for mission-critical infrastructure. Experienced in direct customer interaction, providing technical support, clear communication, and tailored solutions to meet client needs. Strong foundation in both software development and IT operations, bringing a versatile, end-to-end perspective to technical problem solving.

Technical Skills

- .NET Framework and C#
- Cross-language integration
- Data ingestion libraries
- Newtonsoft and AngleSharp
- Data type processing
- Agile methodologies
- Networking concepts
- Client engagement
- Data processing
- Problem solving
- Performance optimization
- Team leadership
- Effective communication
- Hardware and software installation
- Code documentation
- Microservice design
- Data analysis tools
- Software lifecycle management
- Git workflow management
- .NET development
- Object-oriented programming
- Testing and debugging
- Data structures and algorithms
- Technical design documentation
- Customer-oriented
- Git proficiency

Career Objective

Seeking opportunities to expand my skill set, take on greater responsibilities, and contribute meaningfully to a dynamic environment, while being fairly and competitively compensated. Striving to enhance my communication skills and broaden my expertise beyond my development team, with the goal of leading and managing my own team.

Work Experience

Intermediate Software Developer at JSI Telecom. Jan 2022. to Sep 2025. **C#, HTML, Java,JS, Ruby, Python.**

- Developed and maintained data ingestion tools in C# to process diverse customer file formats, enabling scalable and reusable pipelines for structured and semi-structured data.
- Collaborated directly with clients to gather requirements and deliver custom solutions for file handling, data decoding, and preview features, ensuring both current usability and future adaptability.
- Collaborated with support team to analyze, identify and fix issues and bottlenecks at customer

systems. Specifically, I addressed bottlenecks in a pre-existing big data solution by applying caching, which resulted in an impressive performance enhancement of over 96%.

- Recognized as a Subject Matter Expert (SME) in the data ingestion pipeline, serving as a go-to resource for technical guidance, onboarding, and architectural decisions across the team.
- Acted as Scrum Master and team leader, facilitating sprint planning and daily stand-ups, contributing to a high-performing Agile environment with an emphasis on stability and cross-functional communication.
- Contributed to company culture and hiring by interviewing candidates across all levels and promoting a collaborative, healthy work environment through strong interpersonal skills
- Recognized as the go-to person for handling support requests, including the most critical and urgent issues.
- Selected to join a cross-functional 'Tiger Team' of specialists to investigate and resolve a critical data integrity issue for a high-value project.

Sita Airport offices, Beirut, Lebanon from 2014 - 2020

- Configured and maintained network infrastructure, including switches, gateways, and servers, ensuring reliable connectivity and optimal performance.
- Diagnosed and resolved technical issues across diverse network elements, minimizing downtime and maintaining operational continuity.
- Performed on-site hardware and software maintenance to support mission-critical airport systems.
- Conducted preventive maintenance and managed incident response to ensure compliance with service-level agreements.
- Collaborated with customers and internal technical teams, providing clear communication, documentation, and reporting on system performance and incident resolution.

TELUS Communications, Alberta, Canada

- Summer internship during the period of June 18 to August 21, 2013
- Tasks involved:
 - Worked with the TELUS *Optik* TV Support Team resolving various issues/problems
 - Assisted in setting up servers to provide different service options for *Optik* TV clients
 - Worked with *Optik* TV Support Team on the design of the new smaller DSLAM for field application.
 - Participated in the TELUS Customer First Review.
 - Shadowed with client service representatives in the Consumer Care Call Centre as well as technicians from the Customer Solutions Delivery team to understand the different issues that the customers experience.

Education

ALGONQUIN COLLEGE

2021-2022

- Computer Engineering Technology
- Dean's Honors List; GPA 4.0/4.0

American University of Beirut (AUB)

2010-2014

- Bachelor of Engineering in Electrical and Computer Engineering (ECE)
- Graduated in: June 2014
- Dean's Honor list of Fall 2013-2014

Leadership and Corporate Citizenship

Fostered open and inclusive communication to strengthen team cohesion and cultivate a healthy work environment. Took pride in serving as a role model, leading and onboarding co-op employees while supporting their transitions to full-time roles. Conducted numerous interviews to ensure the team was built with productive, collaborative, and high-performing individuals. Observed and adapted weekly discussions and team objectives based on energy levels and dynamics, ensuring alignment with Kanban principles and integrating agile

Stakeholder & Cross-Functional Collaboration

Led cross-functional collaborations between development team, QA and product owners on a large product providing customers with iterations and accommodating for feedback to ensure a timely product delivery. Facilitated large project retrospectives to gain perspective, acknowledge weaknesses and improve on the project planning, development and testing process.
