Jira	Marketing

experience

Senior Software Engineer

Ericsson - Ireland
06/2016 - 12/2022

- ▶ Designed and implemented responsive UI applications using HTML, CSS, and JavaScript, improving user experience and accessibility.
- ▶ Developed and maintained RESTful APIs and service-layer components in Java with the Spring framework, JPA, and JDBC.
- ▶ Optimised and upgraded legacy applications, reducing downtime and improving system performance.
- ▶ Built and managed CI/CD pipelines with Jenkins/Git, enabling faster and more reliable releases.
- ▶ Wrote Python scripts for data processing and automation, improving workflow efficiency.
- ▶ Conducted testing and analysis aligned with project scope, ensuring product quality and reliability.
- ▶ Mentored and onboarded new team members; conducted interviews for technical hires.
- ▶ Led and collaborated on cross-functional projects, introducing new ways of working and improving delivery efficiency.
- ▶ Partnered with internal stakeholders to align technology solutions with business needs.

Technical Skills

- ▶ Languages & Frameworks: Java (Spring, Spring Boot, JPA, JDBC, REST APIs), JavaScript, HTML, CSS, Python, Shell Scripting
- ▶ Databases: MySQL
- ▶ DevOps & Tools: Jenkins (CI/CD), Git, Docker

Airport Search Unit Officer

DAA plc - Dublin, Ireland
07/2024 - 07/2025

- ▶ Served in the airport security unit, screening passengers, staff, and luggage in compliance with statutory and regulatory aviation requirements.
- ▶ Maintained strict adherence to safety protocols to ensure secure airport operations.
- ▶ Operated effectively in a high-pressure environment, balancing efficiency with accuracy and attention to detail.
- ▶ Collaborated with team members and stakeholders to maintain smooth passenger flow while upholding safety standards.

Ivan Verburgt

Vancouver, BC

verburgt.ivan@hotmail.com

Dear Hiring Manager,

I am an experienced Software Engineer seeking an opportunity to rejoin the software industry and continue developing my career in Vancouver. I hold permanent residency in Canada and am fully eligible to work here.

After my previous role at Ericsson concluded in 2022, I was unable to secure another position in software and took work outside the field. I am now focused on returning to software development, including at an entry level, to rebuild my technical career and contribute to a team where I can grow and add value.

During my time at Ericsson, I worked primarily on web applications, gaining a strong foundation. I was recognised for my contributions and promoted to Senior Engineer.

I have a strong ability to learn quickly and perform well, which is reflected in my academic and professional achievements detailed in my resume below. I am highly motivated, ready to take on new challenges, and confident that I can bring meaningful value to your team.

Thank you for your time and consideration.

Sincerely,
Ivan Verburgt
