

Leo Tenenbaum

November 2025

leonardomtenenbaum@gmail.com | +1 647-877-3042

Education

University of Toronto, Canada, Sept. 2021 – Jun. 2025 (GPA: 4.0)

Honours Bachelor of Science with High Distinction; Computer Science Specialist, Mathematics Minor

Skills

- Over 10 yrs. experience with computer programming; proficient in C, C++, Rust, Java, Python, JavaScript
 - Extensive experience with git, Linux command-line tools
 - Understanding of concepts in theoretical computer science: algorithms, data structures, graphs, etc.
-

Research experience

- *Fuzzing to Detect Hardware Side Channels* (University of Toronto, Jan. 2024 – Apr. 2025)

A one-semester research course followed by an **NSERC USRA** grant under the supervision of Prof. Gururaj Saileshwar, involving developing a fuzzing tool to detect vulnerabilities in proposed defenses against Spectre and related microarchitectural side-channel attacks. The work culminated in a paper accepted to ASPLOS '25: Bo Fu, Leo Tenenbaum, et al. 2025. *AMuLeT: Automated Design-Time Testing of Secure Speculation Countermeasures*. <https://doi.org/10.1145/3676641.3716247>

- *KidneyOS* (University of Toronto, Sept.–Dec. 2024)

A one-semester research course under the supervision of Prof. Jack Sun, focused on helping to develop a toy operating system in Rust, to be used as part of operating system courses at the University of Toronto.

Personal projects

- *bootstrap*, 2021–2022: <https://github.com/pommicket/bootstrap>

A series of compilers, where each one is written in the language compiled by the previous one. The first compiler is a handwritten executable, and the last one is a C compiler.

- *ted*, C, 2021–present: <https://github.com/pommicket/ted>

A fully-featured text editor with Language Server Protocol (LSP) support.

- *autosdf*, Rust/OpenGL/GLSL, 2022: <https://github.com/pommicket/autosdf>

Randomly generates 1-Lipschitz functions $\mathbb{R}^3 \rightarrow \mathbb{R}$, and uses raymarching to render the surface $f^{-1}(\{0\})$.

- *jigsaw*, HTML/CSS/JavaScript/Rust/PostgreSQL, 2024: <https://s.pommicket.com/jigsaw>

Collaborative online jigsaw puzzles, using images from the Wikimedia Commons.

- *minipng*, Rust, 2023: <https://github.com/pommicket/minipng>

A small PNG decoding library, with over 100,000 downloads on crates.io.

- And many more: <https://github.com/pommicket?tab=repositories&q=&type=source&language=&sort=date>.
-

Volunteer work

- *Newcomer Coding Camp* (Summer 2017/2018), lead counsellor

Three one-week sessions where recent immigrants to Canada were taught Python programming by volunteers.

Awards

- University Of Toronto Scholar; J. S. McLean Scholarship; Anna and Alex Beverly Memorial Scholarship; Dr. James A. & Connie P. Dickson Scholarship in the Sciences and Mathematics
- 1st place in ACM MICRO '24 Undergraduate Student Research Competition, Austin, TX, United States
