Summary

- Software developer with 5 years of experience
- Projects include front and back-end development for applications with a global reach
- Experience with complex use cases including patient privacy for medications, trending medical test results, and pharmacy search capabilities
- Collaborated closely with customers to ensure high-quality solutions, implementation, and outcomes
- Dedicated to high code quality, with a focus on web accessibility best practices and enhanced user experiences

Technical Skills

- **Programming Languages:** C#, HTML/CSS, JavaScript/TypeScript, M/Caché, Python, C/C++
- **Frameworks:** React, Node.js, .NET
- **Developer Tools:** Git, SVN
- **Practices:** A11y Best Practices, Agile Development Practices

Professional Experience

Software Developer | Epic Systems, Verona, Wisconsin, USA

Jul 2019 – Mar 2025

- Collaborated with project stakeholders and customers to create and update activities for patients worldwide
- Contributed to high code quality by investigating and fixing issues, performing code reviews, and serving as a developer expert for functional areas
- Owned processes for projects in early implementation stages, including giving customer presentations, ensuring security protocols were followed, and managing follow-up questions
- Served as a subject matter expert on accessibility, gaining deep knowledge of web accessibility best practices, assisting other teams with related questions, and presenting educational topics to the team

Key Projects:

- **MyChart Medications Overhaul** *Jan 2023 – Mar 2025*
 - Planned a large, multi-year project to update medication activities to the **React** framework
 - Led the effort to improve pharmacy search by utilizing geodata in search logic to create a better user experience
- **MyChart Medication Refill Updates** *Jan 2023 – Dec 2023*
 - Updated back-end logic using **M/Caché** to address key concerns from health care providers
 - Created new front-end features using **HTML/CSS** to provide extra clarity to patients
- **Test Result Trends Graphing** *Jun 2020 – Dec 2022*
 - Updated an existing test results graphing activity to use the **React** framework and improve the user experience
 - Ensured a balance between UI functionality, accessibility for all users, and existing behaviors
- **MyChart Medication List Internationalization** *Jan 2020 – May 2020*
 - Updated an existing activity to show critical medication information in a patient's preferred language by utilizing back-end APIs in **M/Caché** and displaying them on the front-end using **HTML/CSS**
- **Patient Privacy for Medications in MyChart** *Oct 2019 – Dec 2019*
 - Met with numerous customer organizations to understand needs and verify solutions for a large, company-wide privacy initiative
 - Owned customer communication regarding the implementation and outcomes after project development was complete

Education

Bachelor of Science in Computer Science | University of Idaho, Moscow, ID, USA
Equivalent to a Canadian Bachelor's 4-year Degree (WES Certified)

Graduated May 2019
