PROFESSIONAL SUMMARY

Software developer with 3+ years of experience building **scalable, secure, and performant backend systems**. Skilled in **Java/Spring Boot** with strong OOP practices. Experienced in **API design, system reliability, integration testing, and cloud-native deployments**. Adept at collaborating with product, design, and data teams to ship high-impact features in **fast-paced, iterative environments**.

EDUCATION

Project Management Program

George Brown College, Toronto, ON — *Sep 2024 – Present*

Relevant Courses: Agile Project Management, Quality Assurance, Risk Management

Advanced Diploma, Software Development & Network Engineering

Sheridan College, Oakville, ON — *Sep 2020 – Dec 2023*

PROFESSIONAL EXPERIENCE

Backend Developer (Full-Time)

EnreSoft LLC – Remote, US-Based

Jan 2024 – Present

Projects: Weddy (Wedding App) & Enreship (Shipping Integration Platform) & Enretag (Warehouse stock management Platform)

- Designed, built, and maintained RESTful APIs and backend services in Java/Spring Boot, aligning with scalable and maintainable engineering practices.
- Engineered microservices for shipping & marketplace integration (Amazon, FedEx, UPS, USPS, Etsy, eBay), handling high-volume, real-time transactions.
- Applied integration and system testing (JUnit, Postman) to ensure resilience and reliability across distributed services.
- Implemented OAuth2.0 flows with secure token refresh for multi-marketplace authentication.
- Contributed to system architecture decisions around scalability, async processing, and domain-driven design.
- Collaborated cross-functionally with product and UI teams to deliver seamless backend solutions that improved customer workflows.
- Automated deployments via Docker, AWS S3, CI/CD pipelines, enabling multiple production releases per week.

PREVIOUS EXPERIENCE (Summarized)

- **Arctic SoftWorks Inc.** – Co-founder & Software Developer
- **Software Developer Intern** – *Town of Oakville*
- **Cloud Platform Analyst Intern** – *Softchoice*
- **QA Tester** – *uTest (Uber, Amazon, McDonald's, Walmart projects)*

TECHNICAL SKILLS

Languages & Frameworks: Java, Kotlin, Spring Boot, React, JavaScript, MySQL, REST, Protocol Buffers

Tools & Platforms: Git/GitHub, Docker, AWS (S3, EC2, RDS), Firebase

Testing: JUnit, Integration Testing, Postman

Practices: Agile/Scrum, CI/CD, Microservices, Domain-Driven Design, Secure Coding, A/B Testing, Real-Time Data Orchestration
