SKILLS

- Python, Java, C, C++
- HTML, CSS, JavaScript, Node.js
- MongoDB, MySQL, PostgreSQL, R, Database Management
- MATLAB, Haskell, Qt, Algorithms, Spark

LANGUAGES

- English - Fluent
- Chinese - Fluent
- Japanese - Advanced
- French - Conversational

RELEVANT COURSEWORK

- Web Applications
- Object-Oriented Software Engineering
- Database Management Systems

Awards & Honors

Dean's Honour List

PROFESSIONAL SUMMARY

Graduate from Carleton University with a Bachelor of Computer Science Honours, possessing a diverse set of computer skills and an excellent academic record. Passionate about programming and problem-solving, with a demonstrated ability to learn quickly and work effectively within a team. Known for strong problem-solving skills and a commitment to continuous learning and improvement.

EDUCATION

Bachelor of Computer Science Honours, Minor in Math - 2024
Carleton University

PROJECTS

4G VOICE CALL SECURITY RESEARCH (PYTHON)

Researched the security differences between 4G LTE voice calls and traditional 3G networks. I simulated mobile call environments in 4G LTE to study potential risks like hacking and eavesdropping.

LIBRARY MANAGEMENT SYSTEM (JAVA, SQL)

Built a library management system by creating a database in SQL and developing a Java application to handle library operations, such as managing books and user interactions.

ELECTROCARDIOGRAM SIMULATION (C++, QT)

Developed ECG simulation program; designed icons, matrix structures, and GUIs for ECG data representation and management.

RESTAURANT ORDERING MOBILE APP (JAVA)

Created a mobile app for restaurant ordering with menu browsing, order placement, and shopping cart management..

Historical Movie Review Analysis (JavaScript, Node.js)

Analyzed historical movie review dataset to compare user-based vs. product-based algorithms for big data analysis; tested on 1,000 websites and visualized results with dot data graphs.

VOLUNTEER EXPERIENCE

2023 MATH TUTOR, LEXUE EDUCATION, WUXI, JIANGSU

- Successfully helped several junior high school students improve their grades in math-related courses.
- Emphasized interaction and engagement in teaching, which increased student interest and participation.
- Built strong relationships with students by fostering regular communication and discussions, creating a supportive and encouraging atmosphere.
- Guided students through practical problem-solving and critical thinking exercises, strengthening their analytical abilities. This experience also deepened the understanding of teaching methods and enriched knowledge through student interactions.
