EDUCATION

McGill University

Bachelor of Computer Engineering, GPA: 3.76/4

Sep 2020 – Dec 2024

Montreal, Canada

Lycee Francais de Barcelone

Science Baccalaureate Honors, major in Computer science

Sep 2016 – June 2020

Barcelona, Spain

WORK EXPERIENCE

Cisco

May 2024 – Present

Software Engineer

Montreal, Canada

- 8-month internship converted into a full-time Software Engineer position on Cisco's Cybersecurity-focused Secure Network Analytics (SNA) team
- Develop and maintain backend RESTful APIs in Java for SNA's platform, performing unit testing, debugging, and validation with Postman and Python
- Create containerized tools using React, Python, and Docker to support diagnostic analysis workflows
- Develop new backend (Java, Python) and frontend (React) features to extend platform functionality
- Collaborate with product managers and engineers to define requirements and design software solutions
- Participate in code reviews and provide feedback to peers across the engineering team
- Manage potential vulnerabilities in third-party and open-source dependencies through proactive assessment, prioritization, and remediation
- Work with engineering teams to design and implement security patches and updates based on identified vulnerabilities
- Monitor and track security alerts and advisories related to open-source software
- Identify and propose fixes for critical security vulnerabilities in internal applications

UKG (Ultimate Kronos Group)

May 2023 – Aug 2023

Software Engineering Intern

Montreal, Canada

- Developed employee scheduling features with Java backend services and Angular frontend components
- Enhanced optimization algorithms through heuristic improvements and Python integration for improved scheduling efficiency

Bombardier

May 2022 – Aug 2022

Software Engineering Intern

Montreal, Canada

- Developed Python scripts to automate data collection, processing, and validation tasks across engineering systems
- Performed comprehensive testing of software components through unit and integration testing strategies
- Automated report generation workflows using SQL queries and Power BI dashboards for stakeholder insights

Capgemini

Jun 2021 – Aug 2021

Computer Engineering Intern

Paris, France

- Developed embedded systems solutions using Raspberry Pi and Arduino in Linux environments
- Implemented cross-platform applications in Java, Python, and C for various hardware platforms

TECHNICAL SKILLS & PROFICIENCIES

Coding Languages: Java, Python, C, SQL (Postgres), JavaScript, HTML/CSS, Assembly, VHDL

Frameworks: React, Angular, Vue.js, Node.js, Flask, Spring, Django, JUnit, Ruby on Rails, TensorFlow, PyTorch

Developer Tools: Git, Docker, Kubernetes, Jira, Jenkins, AWS, Google Cloud Platform, Postman

Spoken Languages: Fluent in English, French, Spanish and intermediate in Arabic

Personal Portfolio Website: theoghanem.netlify.app

ACTIVITIES

Hackathons: 1st place at McGill AI hackathon 2022 *MaisHacks* and Winner of *Best Enterprise Tool* award at McGill CodeJam 2022. I aim to participate in at least 3 per year

Hardware/Software Lab Head Manager: *The Factory* is a student-run engineering lab. Organized the first hardware hackathon at McGill in 2023. PC building, bash, 3D printing workshops, and many more workshops

IT Director: for the McGill IEEE Student Branch, organized the *2024 IEEEExtreme-24h-Programming Competition*

Involvement: 4 year consecutive *Computer Engineering Representative* for the McGill Faculty of Engineering

Hobbies: 3D printing & modeling, PC building, playing drums, Chess (1600 rating), Open Water Scuba Diver (PADI)

Sports: Climbing (7C lead + competitions), Rugby, Sailing (participating & organizing regattas).
