613-402-0154

Ottawa, Ontario

Education

University of Ottawa - Canada (CGPA 8.7)

B.Sc. (Bachelors) Honors, Computer Science

Work Experience

Software Engineer - Elections Canada

May 2024 - Oct 2025

- Developed and deployed fullstack scalable web applications using **React**, **Node.js**, reducing load times by **30%**.
- Collaborated with cross-functional teams (Product, Design, QA) to define and deliver new features on a bi-weekly sprint cycle.
- Automated CI/CD pipelines with **GitHub Version Control** and **Jenkins**, cutting release cycles from **weekly to daily**.

Software Developer - Library and Archives Canada

September 2023 - December 2023

- Designed and optimized database schemas, improving query performance by 10% in one of the library search backend engines in **SQL**.
- Ensured front-end cross-browser compatibility by testing and debugging on multiple browsers, ensuring a consistent experience for users across different platforms, consistent with **HTML5** and **PHP**.
- Conducted performance analysis and optimization, resulting in a 25% improvement in application speed and efficiency on archival applications, as well as conceiving strong systems architecture.

Software Engineer - Ford Motor Company

January 2023 - April 2023

- Developed and maintained telemetry and TCU codebase, developed a feature for 2024 Mustang.
- Conducted coding in **C++** and **C**, performed troubleshooting and debugging activities, testing and documented bug fixes in the knowledge base, building and flashing for different modems and versions.
- Supported the engineering team in defining software requirements and documentation for new product development of **embedded systems** within multiple vehicles, using containerization.

Software Analyst - Canadian Space Agency

September 2022 - December 2022

- Analysis and Evaluation of existing systems and planning of direct upgrades and improvements.
- Systems Design and Database creation and mapping for projects optimizing deliverables for CSA and NASA projects (Canadarm, EarthCanada) while managing DevOps and Cloud Computing.

Skills

Communication, Problem Solving, Web application development, Mobile, Algorithms, Data Structures, Distributed Systems, Scalability. Problem Solving, Analytical. Programming in **C#, C++ Java, Python, Golang, PHP, SQL, JavaScript, .Net, Git, Github, GitLang, HTML**. Agile and Scrum. API, FastApi, RestApi. AWS, Oracle, Azure, Node.js, React, Angular, Vue, Typescript, Spring. Docker, Linux, Bash Scripting, Unix. CI/CD. MySQL, postgresQL. XML, Json. SDLC, TDD/BDD, testing. Ubuntu, Kafka.
