EXPERIENCE

Vice President of Finance

Engineering and Computer Science Association (ECA) Concordia

Montreal, QC

2023 – 2025

- Oversaw 17+ student group budgets within ECA's \$700K annual budget while maintaining NPO compliance
- Initiated the restructure of our reimbursement system, reducing wait time from 3-4 weeks to 10 days
- Established transparent financial policies and negotiated strategic contracts with software vendors
- Led a team of 4 members to streamline all financial activities, archiving, and bookkeeping.

Junior Software Developer - Intern

Vffice

Montreal, QC

2023 – 2024

- Engineered and deployed client-focused features using AL and Azure DevOps for BC in the Dynamics 365 environment, enhancing internal portal functionality and page responsiveness
- Transformed client requirements into functional software designs and delivered 5+ features across 3 months
- Developed 3 real-time Power BI dashboards enabling clients to visualize critical data insights

Financial Crime Analyst - Intern

PricewaterhouseCoopers (PwC)

Toronto, ON

2022 - 2023

- Conducted KYC and AML investigations using market intelligence tools and summarized findings in Lotus Notes and G Suite
- Eliminated backlog of 300+ overdue client cases within 3 months, processing 6+ cases daily

PROJECTS

Newton - Autonomous Educational Quadruped (Capstone Project)

- Architected a ROS2 navigation stack integrating NVIDIA VSLAM and sensor fusion to generate cost maps.
- Adapted 5 launch files to enable hardware control on Jetson Nano through Docker containerization
- Collaborated on full system architecture and contributed to hardware integration modules on a custom Docker Container

Pioneers Full Stack Web App

- Directed a 4-person development team in creating MERN stack web application.
- Built and integrated the backend (Node.js, Express) with a MongoDB database using Mongoose.
- Developed responsive **React.js components** to implement the frontend interface.
- Documented architecture through UML diagrams and implemented CI/CD pipeline via GitHub Actions with agile workflows

Gaming Cafe Desktop Application

- Collaborated in a 2-person team to create a booking system for a gaming cafe.
- Leveraged Java and JavaFX to create a full desktop application using MVC architecture.
- Optimized the application's UX by improving speed and efficiency.
