@GAKUTO-F

PROFESSIONAL SUMMARY

Full-stack developer and cybersecurity enthusiast with hands-on experience in backend API development, system administration, and cloud deployment (AWS/OpenShift). I am adept at designing secure, scalable applications and leading projects in both government and academic environments.

SKILLS

Languages: Java, Python, C++, JavaScript, C#, Swift

Frameworks & Tools: React, Node.js, Express, GraphQL, jQuery

Cloud & DevOps: AWS, Docker, OpenShift, Git

Databases: MySQL, MongoDB, Oracle

Cybersecurity: Network Security, Threat Analysis, Risk Assessment

Environment: Linux, Agile, Trello, VS Code

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst

BC Government – NG911 Project and Cybersecurity

- Contributed to the NG911 project by assisting in the launch of a dedicated NG911 website under the BC Government, focusing on cybersecurity and public safety.
- Created accessible resources for technical and non-technical users, enabling public safety agencies to understand and implement NG911 standards and cybersecurity requirements.
- Ensured access to vital information, compliance checklists, and support for secure adoption of NG911 by smaller agencies.
- Completed advanced cybersecurity labs, including OpenShift, gaining hands-on experience with BC Exchange and containerized application management.
- Strengthened skills in risk assessment, threat analysis, system administration, and practical cybersecurity lab exercises.

Data Assistant

AKITEC Co. Toyama, Japan

- Organized data, prepared reports, and supported on-site construction tasks.
- Utilized MS Office for documentation and reporting, enhancing project efficiency through data analysis.

Capstone Project – Kode Guru

Role: Full Stack Developer

- Focused on backend development and API integration for Kode Guru, a web-based coding education platform designed to enhance learning through gamification and team-based challenges.
- Designed and implemented scalable backend architecture, ensuring efficient data management and seamless communication between different system components.
- Developed and optimized APIs for handling user authentication, progress tracking, and interactive learning features.

- Created modular backend structures to simplify functionality, making it easier for team members to integrate new features and manage the system efficiently.
- Worked closely with frontend developers, ensuring smooth data flow and optimal performance.
- Followed agile development practices, utilizing project management tools for efficient workflow and collaboration.

PROJECTS

- Wordle Game Website (AWS): Developed and hosted a Wordle game on AWS, demonstrating backend and deployment skills.
- Messaging Platform (Node.js, React): Created a secure messaging platform with encrypted login for safe communication.
- E-commerce Platform (JavaScript, jQuery): Designed a user-friendly e-commerce site with an advanced UI.
- Treasure Hunting Mobile App (Swift): Developed an interactive treasure hunting app.
- Open World Exploration Game (Unity): Created a game with multiple enemies and dungeons.
- Tetris Game (C++): Programmed a classic Tetris game to strengthen game development skills.

VOLUNTEER EXPERIENCE

Teen Flight (2018 - 2019)

- Collaborated with a team to design, build, and test a small aircraft, developing skills in problem-solving, project management, and teamwork.

EDUCATION

Diploma in Information and Computer Systems Technology

Camosun College

High School Diploma

Highland Secondary - Comox Valley Schools
