Work Experience

Full Stack Web Developer

Sovereign Management Group Inc.-Surrey, BC

September 2007 to July 2025

In nearly 18 years with Sovereign Management Group, I was involved in building public websites, admin dashboards, and a Client Relationship Management (CRM) system. Coding languages used include ColdFusion, JavaScript, React and NextJS. Databases included MySQL, MS-SQL, and MongoDB. I wrote and used APIs to interface with the databases and Amazon Web Services.

Responsibilities:

- Analyzed business needs for multiple website redesign projects
- Web Developer & Designer for public-facing websites
- Email Marketing & Social Media
- Marketing Support
- Employee Tech Support
- Client Tech Support
- Google Apps Support
- CRM design, development and modernization

Accomplishments:

- Analyzed business needs for multiple website redesign projects, including meetings with all stakeholders from end users to the CEO.
- Built and maintained numerous public websites for different business units, including both public front-end and staff-backend admin dashboards.
- Built a shipment tracking application to track shipments into and out of the 2010 Olympic and Paralympic Winter Games in Vancouver. This project encompassed the entire development process, from database design to user interface. The project was started in December 2009 and finished by the end of January 2010.
- Built a dynamic Intake Form to manage new client intake from various incoming channels for all our services.
- Started to modernize and extend our ColdFusion-based CRM with NextJS.
- Participated in development team meetings.
- Mentored new developer staff as they joined the company.

IT Professional

A E Rose Information Service Ltd.-Edmonton, AB

December 1996 to November 2006

Responsibilities:

- Software Developer
- Web Developer
- Microsoft Windows Desktop Support (Phone and On Site)
- IBM AS/400 and iSeries Server Support
- Network setup and support
- SonicWall Firewall support
- Accounts Payable, Accounts Receivable, Payroll, Banking
- Office Management

Accomplishments:

- Moved a DOS based Microsoft Basic payroll application to Microsoft Windows using Visual Basic 6 including graphic user interface design, database design in Microsoft Access, writing SQL queries, and creating reports for display and printing.
- Optimized data processing in the same payroll application and eliminated re-keying of data after reviewing the client's business procedures saving the client of thousands of dollars.
- Wrote several pieces of software to assist in moving data between an IBM iSeries server and Microsoft Windows and also to the internet including Business to Business (B2B) applications.
- Used Microsoft Excel to extract data from the IBM iSeries DB2.
- Assisted with the design and maintenance of the company website in 1998. Responsible for some of our client's websites.
- Provided hardware installation service and support for basic networking components, printers and other devices for our clients.
- Provided hardware setup and software installation services for Windows PC's.
- Provided telephone, email and on-site support on Microsoft Windows, Internet Explorer, Outlook and Outlook Express, and Microsoft Office applications.
- Introduced clients employees to the internet and provided user training.
- Provided end-of-life data cleaning service before retiring desktop computers.
- Wrote technical documentation and how-to instructions.
- Used Microsoft Visio to create a set of extensive database diagrams for our iSeries applications.
- Assisted with installation and initial configuration of several IBM iSeries servers.
- Assisted with day-to-day user maintenance of iSeries servers running OS/400 (V4R2 through V5R3) including user management and work management (job queues, subsystems, output queues)
- Maintained company financial records in Accounts Payable, Accounts Receivable, and Payroll. Also responsible for making deposits and other financial transactions.
- Responsible for managing the office including maintaining adequate levels of supplies and services.

Website Consultant

Simson Maxwell-Edmonton, AB

June 2006 to June 2006

Responsibilities:

- Analyzed business needs for website redesign
- Web Developer
- Web Designer

Accomplishments:

- Analyzed business needs for a website redesign project including interviews with all stakeholders from end users to the CEO.
- Evaluated website design software and website framework packages.
- Presented a recommendation defining web server software and web design software for the present and the future.

- Redesigned website using Adobe Dreamweaver and Microsoft Visual Web Developer. Website was designed to be standard compliant using XHTML, CSS.
- Dynamic portions of the website were built in ASP.Net using a Microsoft SQL database and running on Microsoft IIS.
