[linkedin.com/in/gabrielpujol87](https://www.linkedin.com/in/gabrielpujol87)

PROFESSIONAL SUMMARY

Software Developer with 10+ years of experience delivering data-driven solutions across Healthcare, Oil & Mining, and Geostatistics industries.

Proficient in Python and the .NET ecosystem, with extensive hands-on experience in both Desktop and Backend development.

Proven ability to lead and mentor technical teams, driving Agile practices through daily stand-ups, code reviews, and one-on-one coaching.

Recognized for clear communication and fluency in Spanish, English, French, and Portuguese.

Passionate about Algorithms, Metaheuristics, and Applied Optimization, with a strong focus on designing, analyzing, and deploying robust, production-grade systems that deliver measurable business value.

PROFESSIONAL AND ACADEMIC EXPERIENCE

Backend Software Developer (AlayaCare.com) RESTful APIs, Docker, Python, SQLAlchemy, PostgreSQL.	March 2025 – Present
--	----------------------

Senior Software Developer (Graitec-Group.com) C#, .NET platform, Revit, Autocad, plugin architecture.	December 2024 – February 2025
---	-------------------------------

Sales and Business Development Associate (MVAPower.com) Communications, Microsoft Office Suite.	June 2024 – December 2024
---	---------------------------

AWS Machine Learning Developer (ALSGlobal.com) Python, Scikit-Learn, Exploratory Data Analysis for Machine Learning applications.	June 2023 – May 2024
---	----------------------

Software Developer (Geotic.ca) C#, .NET platform, Microsoft SQL Server, Microsoft Office.	October 2018 – January 2024
---	-----------------------------

Software Developer & Researcher (Inf.PUC-Rio.br) C++, Python, Optimization, Geostatistical Simulation.	August 2014 – September 2018
--	------------------------------

Junior Software Developer (CNEURO.cu) Java, Android, Eclipse.	September 2011 – July 2014
---	----------------------------

EDUCATION

PHD in Computer Science - Optimization (<i>unfinished</i>) Pontifical Catholic University of Rio de Janeiro, Rio de Janeiro, Brazil.	2014 – 2018
--	-------------

Master's degree in Mathematical Optimization University of Havana, Havana, Cuba.	2012 – 2015
--	-------------

Diploma in Neurosciences Cuban Neurosciences Center	2011 – 2012
---	-------------

Bachelor's degree in Computer Science University of Havana, Havana, Cuba.	2006 – 2011
---	-------------

SKILLS

Frameworks & Tools:	.NET, AWS, Git
Programming:	C#, Python, C++, Java
Databases:	PostgreSQL, SQL Server, SQLite, SQLAlchemy
Soft Skills:	Technical mentoring, cross-team communication, analytical problem-solving, code review and quality standards.
Languages:	Spanish (native), English (full professional), Portuguese (full professional), French (professional)

PROFESSIONAL AND ACADEMIC PROJECTS

Software Developer (AlayaCare)	March 2025 – Present
Developed and maintained backend services for our healthcare platform using Python, PostgreSQL, and Docker.	
Implemented and optimized RESTful APIs to support integrations with internal and third-party systems.	
Contributed to containerized deployment workflows, improving scalability and reliability across multiple environments.	
Collaborated with cross-functional teams to troubleshoot production issues, enhance data integrity, and streamline system performance.	
Participated in code reviews and continuous integration pipelines, ensuring maintainable, high-quality releases.	
Senior Software Developer (Graitec Group)	December 2024 – March 2025
Focus on best programming practices, keeping performance, maintenance, and compatibility requirements in mind.	
Developed software programs, modules, and algorithms for projects, following the specifications and company guidelines. Maintained existing applications by making required changes.	
Sales and Business Development Associate (MVA Power Inc.)	June 2024 – December 2024
Managed day-to-day operational duties (manage and track sales lead flow, manage and maintain CRM documentation, report weekly activities and accomplishments, etc.). Assist with proactive outreach efforts and campaigns to build relationships and identify opportunities with prospective clients.	
AWS Machine Learning Developer (ALS Goldspot Discoveries Ltd.)	June 2023 – June 2024
Worked on the creation of a software platform for geologists to run tasks remotely in AWS servers, mainly in the Machine Learning and Data Science domains. Worked on the parallelization of such services, data analysis, code reviews, and a proprietary fully automatized Code Generation tool.	
Applications Programmer .NET Framework (Géotic Inc.)	October 2018 – January 2024
Worked for the Géotic software suite, with emphasis in the geological survey data storage application GeoticLog, the 3D modelling and visualization program GeoticMine, and the portable survey tool GeoticField.	
Software Developer Researcher (PUC-Rio)	August 2014 – September 2018
Creation of a novel Geostatistical Simulation framework based on Multiple-Point Statistics, that allows conditioning by Seismic, Soft and Hard Data, and gives access to state-of-the-art Geostatistical Simulation algorithms.	
Master’s Research and Thesis (University of Havana)	September 2012 – February 2015
Researched and developed a program that combined Simulation Theory and Metaheuristics to optimize the traffic flow of complex street intersections. This work resulted in a patent (see below).	
Keywords: Multi-objective optimization, NSGA-II, Mathematical modelling, Integer problem, Simulation.	
Junior Software Developer (Cuban Neurosciences Center)	September 2011 – July 2014
First Project: Optima Pesquisa for Android. Developed a new tool for screening children using Android tablets, that is part of a system that will be used to detect neurodevelopmental deviations in children in primary school.	
Second Project: Neuronic Optima Pesquisa. My team designed and developed a multi-platform system to support regional screening programs to identify school-age children at risk of neurodevelopmental disorders.	

Diploma in Neurosciences (Cuban Neurosciences Center)

September 2011 – July 2012

Obtained a panoramic view of Research applied to the Healthcare Industry, with special emphasis on Medical Imaging. To conclude the course, I prepared a seminar on the [Blue Brain Project](#).

Bachelor's Research and Thesis (University of Havana)

September 2006 – July 2011

Worked in a Geographic Information System (GIS), designing and implementing an efficient storage format for large volumes of geographic data, so localized queries could be answered in minimal time.

PUBLICATIONS & PATENTS

LSHSIM: A Locality Sensitive Hashing Based Method for Multiple-Point Geostatistics. Jun 1, 2017. COMPUTERS & GEOSCIENCES, v.1, p.1, 2017.

A tool to simulate and analyze traffic flow in an intersection controlled by traffic lights with variable cycle times. May 1, 2014. Revista Cubana de Ciencias Informáticas Vol. 8, No. Especial UCIENCIA 2014, Mayo, 2014 ISSN: 2227-1899 RNPS: 2301 Pág. 29-40.

academia.edu/83713229

Herramienta Computacional Para Sugerir y Validar Políticas de Luces de Semáforos (SUVASEM 3.0), Patent No. 0243-01-2018, Centro Nacional de Derecho de Autor (CENDA), Havana, Cuba.

INTERESTS

Write simple and extensible code to solve real-world problems.

Follow closely the development of cutting-edge technology.

To leave my mark in an area of Science that benefits humanity.

Face new challenges and learn new things.

Someday, I would like to contribute to the development of Artificial General Intelligence: I think something like Workflows could be the key to it.
