

Tim Chan

Markham, ON

timtimtim001021@gmail.com

+1 236 558 4820

Experienced software developer with over 10 years of expertise in designing, developing, and maintaining web, mobile, and cloud-based applications.

Proficient in full-stack development, cloud services (Google Cloud Platform, Go), and mobile app development (React Native, iOS).

Strong background in implementing enterprise solutions, including internal payment gateways, conversational agents, and operational systems for universities and businesses.

Adept at collaborating with cross-functional teams, translating business requirements into technical solutions, and optimizing applications for scalability, reliability, and user experience.

Committed to delivering high-quality, maintainable code while following industry best practices and project methodologies.

Personal Details

Highest Level of Education: Bachelor's Degree

Work Experience

Full Stack Developer

Panda Pod Hotel-Richmond, BC

October 2021 to Present

- Built and integrated phone-based conversational agents and chatbots using Dialogflow, enhancing customer engagement and streamlining interactions.
- Designed and deployed cloud applications on Google Cloud Platform (GCP) with Go, optimizing scalability, reliability, and cost efficiency.
- Automated operational workflows on GCP to reduce manual effort and improve guest experiences.
- Developed and maintained full-stack web applications (HTML, CSS, JavaScript) with responsive, user-friendly interfaces.
- Collaborated with product managers to translate business requirements into technical specifications, ensuring alignment with project goals.
- Investigated and resolved production issues through log analysis, system monitoring, and root cause identification, minimizing downtime.
- Enhanced code quality and maintainability by following best practices, refactoring legacy components, and producing clear technical documentation.

Analyst Programmer

The Hong Kong University of Science and Technology-Hong Kong

October 2017 to March 2020

- Developed application solutions following formal project methodologies (Waterfall, Agile) and change control processes.

- Provided recommendations to users and management on system enhancements, alternative approaches, and operational improvements.
- Collaborated with cross-functional teams to design and implement applications supporting university operations, including the Credit Transfer System and Housing Application Platform.
- Developed web applications and APIs using Spring Framework, Hibernate, and Bootstrap.
- Implemented mobile applications for existing university services using React Native, including the Staff App with leave management and access to key resources.

iOS Programmer

Weying Mtel Limited-Hong Kong

November 2015 to June 2017

- Developed iOS applications in an agile environment, collaborating closely with designers and QA teams to deliver high-quality products.
- Built Movie Express, a cinema portal app providing real-time movie schedules and mobile ticket purchasing.
- Revamped KickOff, a leisure app delivering football match data and live chat functionality.
- Revamped WhatsCap, a social entertainment app enabling photo sharing, similar to 9GAG.
- Maintained and updated existing cinema applications, including MCL and The Grand, ensuring performance and reliability.

Programmer

Octopus InfoTech-Hong Kong

July 2014 to October 2015

- Developed iOS applications for multiple projects, including Hiking App (HKdiscovery), Basic Law Learning app, and various eBook apps.
- Built and maintained websites using Struts2 (Java), including HKdiscovery platform.
- Created interactive eBook content using HTML5 and JavaScript, enhancing user engagement and learning experience.
