

# Jiange Gu

Software Developer

613.869.5857 | soucieuxcscu22@gmail.com | Ottawa, Ontario

---

## PROFILE SUMMARY

Experienced Full Stack Developer with more than 5 years of hands-on expertise in designing, developing, and deploying scalable enterprise applications across diverse tech stacks. Proficient in both front-end and back-end technologies, with a strong foundation in Java, JavaScript, Angular, and Python. Passionate about leveraging software development skills to contribute to innovative solutions. Actively seeking opportunities to build intelligent systems that solve real-world problems in an organization I can continue to grow with.

---

## WORK EXPERIENCE

### WEB APPLICATION INTEGRATION

April 2025 - October 2025 | Jiangxi, China

#### JINGDEZHEN YUSHANG INC.

- Developed and maintained a public-facing Angular web application backed by Google Firebase, ensuring seamless, real-time data updates for all users across all major browsers and mobile devices.
- Integrated multiple Firebase APIs to retrieve and display up-to-date information using real-time listeners and asynchronous data streams.
- Designed and optimized Angular services, Observables, and HttpClient logic to handle real-time data retrieval and reduce unnecessary database calls.
- Investigated and fixed backend-related issues by analyzing console logs, database records, and client-side API responses.
- Collaborated with team members to develop new features based on user-experience feedback to improve overall usability and enhance customer satisfaction.

### SOFTWARE DEVELOPER

January 2022 - March 2025 | Ottawa, Ontario

#### Canada Revenue Agency

- Developed and implemented new functionalities in an enterprise application with Java as back-end and Angular as front-end to meet client requirements and enhance system capabilities.
- Identified and resolved the root cause of critical errors in the production environment by applying fixes across all affected branches, ensuring quick restoration of key functionalities and uninterrupted user access.
- Participated in Agile development processes (JIRA) during each sprint, conducted peer code reviews to ensure quality and consistency, and also served as a JIRA coordinator — managing task assignments and representing the team in cross-team coordinator meetings, and providing regular updates to all stakeholders.
- Took ownership of a core portion of the codebase, reviewing all related changes and providing feedback to improve efficiency, maintainability, and overall code quality.
- Collaborated with cross-functional teams to deliver key features on time and used Git Bash to manage multiple repositories for efficient code sharing and version control.
- Minimized data access complexity by joining multiple database tables using SQL for efficient data retrieval, and verified the accuracy of the joined data through local tests.

### JUNIOR DEVELOPER

January 2019 - December 2020 | Ottawa, Ontario

#### Canada Revenue Agency

- Restructured a feature-based application to improve code organization and maintainability, and wrote regression test cases to ensure new features did not conflict with existing functionalities.
- Performed regression testing on newly developed Java features to ensure no impact on existing functionalities and overall application stability.
- Engineered a brand-new UI for a core feature, including component development, API integration, and end-to-end testing to confirm it aligned with established application functionality.
- Authored comprehensive technical documents that outlined system functionalities, improving team understanding and onboarding efficiency.

# Jiange Gu

- Diagnosed redundant or duplicated logic and performed targeted code cleanup to enhance maintainability and reduce technical debt.

---

## EDUCATION

---

**MASTER OF APPLIED COMPUTER SCIENCE** | Concordia University, Montreal, Quebec  
Cumulative GPA: 3.7/4.0

January 2022 - December 2023

**BACHELOR OF COMPUTER SCIENCE** | Carleton University, Ottawa, Ontario  
Honours, Minor in Business, Completed **2 years** of Co-operative Education

Graduated April 2021

**COMPREHENSIVE ANGULAR PROGRAMMING** | Ottawa, Ontario

September 2024

---

## SKILLS

---

### PROFESSIONAL SKILLS

Communication | Collaboration | Problem Solving | Agile Methodologies | Sprint Presentations  
Brainstorming | Self-motivation | Prioritizing | Meeting Deadlines | Resource Management  
Code Refactoring | Machine Learning | Image Visualization | Regression Testing | Algorithms

### TECHNICAL SKILLS

Java | JavaScript | TypeScript | SQL | Angular | HTML | CSS | Python | C | C++ | Git | Docker  
HTTP | RESTful API | CI/CD Pipelines | DevOps | Jenkins | Prime NG | SDLC

---

## PROJECTS

---

### Cross Hatching

September 2023 - December 2023

Convert images to drawing lines in Python | Project Lead

- Designed an algorithm in Python using Canny edge detection to convert image pixel points into straight drawing lines with four angles for improved feature extraction.
- Conducted an in-depth review of research papers to understand cross-hatching techniques, challenges, and existing solutions, gaining insights to improve implementation.

### Advanced Programming Practices

January 2023 - April 2023

Developed estate Java app to collect and manage user data | Project Lead

- Produced a full-stack Java application using Java Swing for the front-end and JDBC for the back-end to filter, manage, and display user data, enhancing usability and streamlining internal workflows.
- Collaborated with a team of four to generate design ideas and troubleshoot bugs through technical discussions.

### Analysis of COVID-19 Datasets using Google BigQuery

May 2022 - August 2022

Implemented SQL on Google Cloud to analyze data | Project Lead

- Developed and optimized various SQL queries to filter and analyze key data from a public dataset, visualizing data trends and distribution for deeper insights.
- Directed a team of four members, assigned tasks based on individual strengths to develop cloud-based (Google Cloud) solutions, and coordinated presentations to demonstrate project outcomes.
