SUMMARY

Results-driven software engineer with 6 years of experience in designing, developing, and deploying web solutions. Proficient in modern programming languages including Java and Python, with expertise in React and SpringBoot for scalable systems. Experienced in agile methodologies and CI/CD processes, excelling in optimization and team collaboration.

EXPERIENCE

Business Architecture Senior Analyst

Accenture | 03/2021 to 02/2025

- Created business solutions for several clients including CBSA and CNA Insurance
- Developed BRF+ applications for CBSA client and managed business rules using SAP BRF technology
- Utilized React, JSP, Java, and Hibernate to develop and maintain web applications for the CNA Insurance client
- Created algorithms and efficient solutions to tasks
- Engaged in agile scrum development and daily project meetings to track milestones and deadlines
- Assisted team members with code and pipeline conflicts
- Led and conducted knowledge transfer (KT) sessions to share the technical architecture and details of the project
- Proactively embraced challenging tasks across projects to accelerate learning and expand technical expertise
- Provided support during hypercare of post go-live of a project

Software Engineer

Revature | 11/2020 to 03/2021

- Developed full stack web applications using Java, Spring Boot, React and JSP
- Maintained data using Spring Data, Hibernate, SQL and PostgreSQL
- Collaborated with team members to successfully integrate user stories using JIRA
- Utilized Jenkins/EC2 to manage jobs/pipelines of builds and project deployments

Satellite Operations Developer - Student

Canadian Space Agency | 05/2019 to 08/2019

- Developed Python scripts to gather data for an internal visualization application supporting satellite missions
- Integrated new features into existing Python-based image processing software for the NEOSSat satellite mission ground segment
- Performed maintenance on Perl and Java programs used to support satellite operations

Beta Software Test - Student

BlackBerry | 09/2017 to 08/2018

- Triaged and managed incoming issues from users found during mobile device testing
- Communicated with testers and developers to fully understand reported issues and guided them through procedures to capture logs and document steps to reproduce
- Performed log analysis and reproduced issues to accurately report software defects to the appropriate development team

EDUCATION

Coursera

2025 to 2025

Google Cybersecurity Certificate

Focused on cybersecurity principles and practices.

University of Lethbridge

2016 to 2019

Bachelor of Science in Computer Science

Emphasized software development and system design.

SAIT

2014 to 2016

Information Technology Diploma in Software Development

Concentrated on software engineering and web solutions.

SKILLS

Java

Java Spring Boot

Python

C++

JavaScript/React/PHP

HTML/CSS/JSP/Servlet

SQL/PostgreSQL

JPA/JDBC

JIRA

Linux

GIT version control

Hibernate

Agile/Waterfall

Team support and collaboration

Risk management

Security frameworks and controls

Software threats/risks/vulnerabilities

SIEM tools
