PROFESSIONAL SUMMARY

Results-driven Software Developer with 6+ years of experience designing, developing, and deploying scalable software solutions. Expert in full lifecycle development - from architecture to deployment - using modern web technologies. Completed a solo R&D project, building a POS system integrated with secure payment gateways and third-party APIs, significantly improving client efficiency and reliability.

SKILLS

Languages & Frameworks: PHP, JavaScript, Node.js, HTML5, CSS, SQL, C#, Java, jQuery, Bootstrap, Python

Databases: MySQL, Microsoft SQL Server, MongoDB

Tools & Platforms: Git, Docker, AWS (S3), SSRS, VS Code, Visual Studio, Postman

Concepts: Agile Methodology, UI/UX, API Development, Cloud Systems, Data Reporting

PROFESSIONAL EXPERIENCE

Botrow Technologies, Saint John, NB

Software Developer

JULY 2021 - PRESENT

- **Solo R&D Project:** Designed, developed, tested, and deployed a fully cloud-based POS system used by multiple businesses for real-time transactions, reporting, and employee management.
- POS Processed over **400,000 transactions in the first year** in production
- POS **increased client sales by roughly 20-30%** due to ease of use, and speed.
- Integrated secure payment gateways (PINPAD and web-based payment systems) to streamline and modernize transaction handling.
- Developed API connections for third-party integrations (marketing, customer management, and reporting platforms).
- Integrated with one of the largest third party API's for physical giftcards

-
- Led a team of interns and junior developers, overseeing code reviews, feature implementation, and technical documentation.
 - Implemented continuous process improvements, reducing system downtime and improving deployment efficiency.
 - Optimized server configurations increasing speed and decreasing crashes. Maintaining a **99% uptime**.
 - Write python drivers that interfaced with Printers and Magnetic Card readers and writers
 - Enhanced system scalability and optimized database queries for faster performance.

Intelisys Aviation Systems, Saint John, NB

Software Developer & Product Specialist

APRIL 2019 - JULY 2021

- Refactored over 20,000 lines of legacy VB6 code to improve system stability and maintainability.
- Designed and maintained SSRS reports, documentation, and internal data tools.
- Collaborated directly with clients to define software requirements and ensure product alignment.
- Wrote a custom driver to interface with ZPL Printers
- Write a custom driver to interface with ESCPOS Printers
- Trained new developers and wrote technical documentation for internal teams.

New Brunswick Community College (NBCC), Saint John, NB

Teacher's Assistant (Volunteer)

JANUARY 2021 - APRIL 2021

- Assisted in teaching JavaScript fundamentals and created coding labs for students.
- Supported learners with debugging, problem-solving, and logical thinking exercises.

EDUCATION

New Brunswick Community College (NBCC), Saint John, NB

IT Programmer Analyst Diploma

SEPTEMBER 2017 - JUNE 2019

Completed a two-year IT Programmer-Analyst Diploma at NBCC Saint John, where I built strong foundations in software development (OOP, web/mobile, database design), systems lifecycle delivery, and real-world technology integration - skills I leveraged to architect, develop and deploy a cloud-based POS/payment system.
