Kitchener, Ontario | +1 548-255-2531 | ksraddha15@gmail.com | [LinkedIn](#)

Data Analyst

Professional Summary

- Dynamic and results-driven Data Analyst with 2 years of hands-on experience in interpreting and analyzing complex datasets to drive informed business decisions.
- Proficient in data manipulation, visualization, and analysis using Excel, SQL, and Python.
- Demonstrated ability to extract actionable insights from data to optimize business processes and enhance operational efficiency.
- Full Stack Java/JEE Developer with 1 year of experience in analyzing, designing, developing, and documenting web applications, dedicated to improving system efficiency and enhancing user experiences
- Possesses a strong interest in SQL with expertise in writing queries, database modeling, and development using SQL and MySQL
- Identified and resolved critical performance bottlenecks in web applications, enhancing security and functionality, which earned appreciation from senior leadership for improving system reliability
- Strong communicator with the ability to translate complex technical requirements to non-technical stakeholders
- Proven ability to collaborate with cross-functional teams in Agile-Scrum environments, contributing to high-performance team dynamics and on-time project delivery

Tech Stack & Skills

Languages:	SQL, Python (Pandas, NumPy, Matplotlib, Plotly, Dash, Scikit learn)
Operating Systems:	Windows
Software, Applications & Tools:	IBM Watson Studio, IBM Cognos Analytic, Jupyter Notebook, Google Collab, Microsoft Office and Advanced Excel, Azure Sandbox, RDMS, SQLite, MySQL
Databases:	My SQL
Cloud Computing:	Microsoft Azure, IBM Cloud
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Skills:	Data Wrangling and Pre-Processing, Data Cleaning, Data visualization and dashboarding, Statistical analysis, Linear regression, Data prediction, Storytelling, Web scraping, Critical Thinking, Time Management, Teamwork and Creativity

Education & Certifications

Junior Data Analyst Program

May 2025

Microsoft Azure AI-G00 Certificate

NPower Canada | Toronto, ON

Junior Data Analyst Program

IBM Data Analyst Professional Certificate

May 2025

NPower Canada | Toronto, ON

IBM Data Analyst Capstone Project (Coursera)

- Applied data analysis techniques including data collection, data wrangling, exploratory data analysis (EDA), and data visualization on real-world datasets.
- Utilized Python libraries such as Pandas, NumPy, Matplotlib, and Seaborn for data cleaning, transformation, statistical analysis, and visual reporting.
- Developed and executed SQL queries to extract, filter, and aggregate data from relational databases.
- Conducted end-to-end project management using IBM Watson Studio, including organizing Jupyter Notebooks, datasets, and final deliverables.
- Created visual dashboards and summary reports to present key findings and actionable insights to stakeholders.
- Demonstrated proficiency in data storytelling, data-driven decision-making, and best practices in data documentation.

Post Graduate Certificate in Virtualization s Cloud Computing

April 2023

Conestoga College, Waterloo, ON

Bachelors of Computer Science and Engineering

May 2019

Koneru Lakshmaiah Engineering College, Vijayawada, India

- Won an award in a coding competition for outstanding performance as part of a collaborative team effort

Professional Experience

Full Stack Developer

June 2021 – April 2022

IBM | Bengaluru, India

- Developed and optimized web applications using Java, Spring MVC, and Angular, enhancing performance, scalability, and user experience
- Engineered complex SQL queries, stored procedures, and database models in Oracle, ensuring efficient data retrieval and integrity
- Implemented RESTful web services and managed XML schema flow to integrate seamlessly with existing systems
- Designed and built dynamic user interfaces with Angular, HTML, CSS, JavaScript, and Bootstrap, improving application usability
- Automated build and deployment processes using Maven, Jenkins, and CI/CD pipelines, reducing manual effort and deployment time
- Containerized microservices using Docker Compose, streamlining application deployment and scalability
- Enhanced application reliability by conducting thorough unit testing with JUnit and integrating SonarQube for code quality analysis
- Collaborated closely with cross-functional teams in Agile-Scrum environments, actively participating in sprints and delivering high-quality solutions on time

Junior Data Analyst**May 2019 – May 2021****IBM | India**

- Conducted data analysis and visualization using Python and Power BI to uncover trends, patterns, and correlations within large datasets.
- Utilized Excel extensively to clean, manipulate, and analyze large datasets for various business needs.
- Conducted statistical analysis to identify trends and patterns in data, resulting in improved decision-making processes.
- Collaborated with cross-functional teams to gather requirements and deliver data-driven solutions to address business challenges.
- Assisted in the implementation of data visualization tools, such as Tableau, to create interactive dashboards for stakeholders.
- Designed and generated custom reports and dashboards in Power BI
- Wrote SQL queries for database creation and modification.
- Assisted in the development of predictive models to forecast sales trends and customer behavior.
- Conducted ad-hoc analysis to identify opportunities for process improvement and cost optimization.
- Prepared comprehensive reports and presentations to communicate findings and recommendations to stakeholders.
- Conducted data quality assessments and implemented data cleansing procedures to ensure data accuracy, completeness, and consistency across multiple sources.
- Experienced in using JIRA bug tracking Systems
