EDUCATION

Algoma University | Sault Ste. Marie, ON

Dec 2025

M.S. in Computer Science - GPA 3.8

Caldwell University | Caldwell, NJ

May 2020

B.S. in Computer Information Systems - GPA 3.85

TECHNICAL SKILLS

Languages: Java, Spring Boot, Hibernate/JPA, **Python**, JavaScript, **SQL**, PostgreSQL, Spring Cloud, Oracle

Technologies: Docker, Kubernetes, Linux, Git, Node.js, React.js, RabbitMQ, **REST APIs**, JUnit, SonarQube, Grafana

Tools: Apache Kafka, **Google Cloud Associate Engineer (Certified)**, Jira, Jenkins, **AWS**, Jupyter, OpenShift, ArgoCD

EXPERIENCE

Safe Code Group | New Jersey, NJ

Oct 2023 - May 2024

Java Full Stack Developer

- Optimized API traffic management by configuring and deploying Spring Cloud Gateway, reducing latency by **18%** for client-facing services.
- Enhanced the internal web app performance by **10%** in 4 months by upgrading the Java Spring Boot APIs and redesigning Angular UI with the latest stable version.
- Developed a Kafka-based data pipeline to process and distribute vendor data in real time, cutting latency by **20%** and boosting downstream performance.
- Reduced costs associated with server usage by implementing lean APIs taking less time to process requests.

Deutsche Bank | New York, NY

Oct 2020 - Dec 2022

Associate Software Engineer

- **Won** DB Mental Health Hackathon 2022 by developing an application that used facial recognition and question prompts to determine a person's level of happiness, sadness or moderate mood.
- Optimized Deutsche Bank's proprietary financial analytics engine by integrating Oracle database, enhancing query efficiency by **30%**, and ensuring seamless transactional data flow.
- Designed and implemented an enhanced search feature for the bank's digital portal, harnessing Hibernate for ORM solutions.
- Utilized OpenShift to efficiently deploy and manage Spring Boot-based web applications in the Investment Banking Data Service team, streamlining application updates and improving overall operational efficiency.

Gesture Inc. | New York, NY

Aug 2019 - May 2020

Software Engineer Intern

- Improved the logistics operations by **20%**, by leading an intern team to create a logistics monitoring web app using React, Node and Firebase.
- Accomplished **10% increase** in mobile app's performance by upgrading legacy APIs using Node and redesigning database queries.
- Integrated new social features in the app by developing APIs using Node to post, like and comment a gesture or order.
- Automated real-time order tracking by integrating third-party APIs (Slack), reducing customer support **inquiries by 15%**.

PROJECTS

TheDrive.ai | Next.js, OpenAI API, LangChain

Dec 2024

- Collaborated with peers to launch a web app for managing and querying files using OpenAI models.
- Implemented server-side rendering (SSR) in Next.js, improving SEO performance by **25%**.
- Integrated LangChain for dynamic document querying and context-aware responses, enhancing system accuracy and user engagement.
