PROFESSIONAL SUMMARY

Software & Automation Engineer with 4+ years of experience in Java, TypeScript, VBA, API development, and test automation using Playwright/Selenium. Built internal tools, automated workflows, and contributed to secure Java-based systems recognized at the global level. Experienced in Agile/Scrum, code reviews (Git), CI/CD pipelines, sprint planning, estimation, and mentoring team members. Strong problem-solving and collaboration skills with a focus on clean, reliable engineering

TECHNICAL SKILLS

Programming Languages: Java (OOP), Python, TypeScript, JavaScript, VBA, HTML5, CSS, SQL

Test Automation: Playwright, Selenium, TestNG, REST API Testing

Software Development: Internal tools using TypeScript/Java, VBA Macro scripting

Tools & Technologies: GitHub Actions (CI/CD), Postman, JIRA, AWS, MySQL

Methodologies: Agile (Scrum), Code Reviews, Sprint Planning, Estimation, Retrospectives

PROFESSIONAL EXPERIENCE

Automation Controller/ Developer

June 2023 – November 2025

Tech Mahindra

Noida, India

- Developed a **Java-based** Data Validation Engine that processed large **Excel/CSV** files, applied business rules, and generated structured output reports for downstream systems.
- Built and maintained 100+ automated tests with Playwright (**TypeScript/JavaScript**) and **Selenium (Java)**, cutting manual testing by 70%. Developed smoke test frameworks using Selenium WebDriver and **TestNG** to ensure build stability and early issue detection.
- Developed a **Java-based** Authentication & Authorization Module using Spring Boot, (**JWT**, and role-based access control. Improved system security and reduced unauthorized access incidents by 40%, recognized with an **Excellence Certification** by the Head of Department for its impact on system reliability at the global company level.
- Created a (**Java** Utility Framework for internal teams to standardize logging, exception handling, API communication, and configuration management across multiple services.
- Led **Agile ceremonies, daily stand-ups, drove code reviews** and **CI/CD quality**, mentored juniors, assigned tasks, resolved blockers, supported documentation, **Confluence** artifacts and QA workflows.

Software Engineer

September 2021 – May 2023

Harman International

Gurugram, India

- Built and maintained 100+ **Playwright** test scripts using **TypeScript/JavaScript**, improving test coverage and efficiency by 30%.
- Performed extensive **API testing** using Postman, validating **REST** endpoints, request parameterization, response schemas, and error handling.

EDUCATION

Bachelor of Technology in Electronics and Communications Engineering

August 2017 – August 2021

Guru Govind Singh Indraprastha University

Delhi, India

CERTIFICATIONS & ADDITIONAL INFORMATION

Excellence Certification: Excellence Certification - Awarded by Head of Department at Tech Mahindra for technical innovation.

ISTQB Foundation Level – In Progress

Languages: English, Hindi
