EXPERIENCE

Service Technician

Sept. 2018 – April 2025

Carleton University

Ottawa, Ontario

- Taught over 100 training sessions a year for the instructors, teaching assistants, students and fellow coworkers on how to use the equipment in the classroom.
- Developed user manuals and FAQs to help them better understand the hardware and software.
- Conducted regular maintenance checks on computer systems to ensure they operated efficiently and met performance expectations of users and organization.
- Supported all classroom, event and equipment issues by phone, email and walk-ins.
- Created incident reports on technical issues and resolutions across campus which was later used for analysis for future proofing.
- Engaged with users directly during onsite support sessions, effectively diagnosing issues and implementing solutions to enhance their overall experience with the IT systems.
- Coordinated with team members to track and report on hardware performance issues, facilitating timely interventions to minimize disruptions for users.
- Delivered technical support for distributed computers and networks across campus and virtual course delivery, involving the installation and maintenance of desktop hardware, phones, printers and software updates on both Windows and MacOS systems.
- Supported and assisted in the recording of meetings and over 200 lectures through onsite and online means on applications such as Zoom, Kaltura and Microsoft Teams, ensuring high-quality audio and video capture for future reference.
- Performed opening and closing procedures for the office, including alarming and locking all of the doors.

IT Assistant (Summer Student)

July 2022 - Aug. 2022

Bob Rumball Centre of Excellence for the Deaf

Toronto, Ontario

- Created and optimized website pages and content through keyword analysis.
- Sourced I.T. products and services to meet organizational needs.
- Provided frontend, onsite technical support to users by troubleshooting issues.
- Developed documentation and resources to support users in navigating IT systems.
- Distributed, setup and taught users how to use the devices provided to them.
- Performed system troubleshooting and preventive maintenance for I.T. equipment.
