PROFESSIONAL SUMMARY

With over 12 years of experience in the software industry, I have built a versatile career working with global organizations such as HSBC, Siemens, and WA New Solution. My background spans diverse sectors including Banking and Enterprise Solutions, where I specialized in bridging the gap between complex business needs and technical implementation across international environments.

Possessing a broad technical foundation, I have successfully navigated and adapted to different ecosystems, transitioning from SAP environments to Data Analytics and the Microsoft Stack. My core strengths lie in SQL, data processing, and Microsoft Dynamics/Azure solutions. Additionally, I possess practical experience supporting system integrations and workflows involving RESTful APIs, always focusing on selecting the most logical tool to solve the business problem.

I have consistently delivered value in high-stakes environments. At HSBC's Fraud Prevention unit, I optimized detection strategies and operational tools, contributing to millions in savings and increased efficiency. I also played a key role during a major M&A transition, adapting legacy software and managing critical data migration. Similarly, at Siemens, I facilitated a complex international SAP migration project, serving as the technical liaison between global vendors, local key users, and international stakeholders to ensure successful system transformation.

My performance is driven by adaptability, logic, and a rapid learning curve. As a versatile developer, I excel in bridging the gap between technical teams and business needs—whether coordinating with distributed teams or learning new proprietary tools on the fly. This ability allows me to solve ambiguous problems and deliver robust solutions regardless of the technology stack.

EXPERIENCE

Software Developer

WA New Solution Inc. – Montreal, QC Sep. 2019 – Nov. 2025

A global Microsoft Partner providing specialized software solutions and ERP services for enterprise clients.

- **Delivered end-to-end business solutions** within the Microsoft ecosystem (Dynamics 365 Business Central, Azure), tailoring standard ERP functionalities to meet specific client requirements across various industries.
- **Engineered system integrations** and custom connectors using **RESTful APIs**, facilitating seamless data exchange between third-party applications and the main ERP, ensuring data consistency.
- **Automated complex workflows** utilizing **Power Platform** (Power Automate/Apps), which significantly reduced manual data entry tasks and minimized operational errors for clients.
- **Designed and deployed** custom reporting solutions using **Power BI** and SQL, transforming raw business data into actionable insights for decision-makers.
- **Collaborated within a distributed, multilingual team** (Brazil and Canada), participating in agile development cycles and ensuring clear communication of technical requirements to non-technical stakeholders.

Key Technologies: Microsoft Dynamics 365 Business Central, Power Platform, Power BI, Azure, GIT, RESTful APIs, SQL, Docker.

Software Developer

HSBC Bank Brazil / Banco Bradesco S.A. – Curitiba, PR, Brazil *May. 2016 – Aug. 2019*

One of the world's largest banking institutions. During my tenure, the Brazilian operations were acquired by Banco Bradesco, requiring extensive system integration and data integrity efforts.

- **Developed and optimized fraud prevention tools** and risk control strategies, directly contributing to **millions of dollars in savings** by improving detection algorithms and reducing financial leakage.
- **Played a critical technical role** during the massive **M&A transition** (HSBC to Bradesco), executing complex data migration strategies and adapting legacy code to meet new regulatory and institutional standards.
- **Engineered automated workflows** and robust database solutions using **SQL** and **VBA**, which streamlined the manual investigation process and significantly increased the **operational efficiency** of the fraud analysis team.
- **Generated strategic insights** for executive leadership by modeling data structures and building dashboards in **Power BI**, enabling data-driven decisions regarding risk exposure.
- **Maintained and modernized** internal banking applications built on **.NET**, ensuring system stability and continuity during critical operational shifts.

Key Technologies: SQL, VBA, .NET, Power BI, Risk Management Systems.

IT Intern / Analyst

Unify Solutions (Siemens Enterprise Communications) – Curitiba, PR, Brazil *Jun. 2013 – Jun. 2015*

Formerly Siemens Enterprise Communications, a global leader in unified communications. I supported critical ERP operations during a major restructuring and international transfer of assets.

- **Facilitated a complex international SAP migration**, serving as a **technical liaison** between global vendors, local key users, and international stakeholders to ensure the successful transfer of data and system logic before the factory closure.
- **Developed and executed ETL scripts** for high-volume data processing, ensuring data integrity during the system transition and version upgrades.
- **Provided critical support** for SAP modules (ABAP) and performed system customizations to meet evolving business requirements during the transition phase.

Key Technologies: SAP, ABAP, SQL, VBA, ETL Processes.

Software Developer Intern

MPS Informática – Curitiba, PR, Brazil *Jun. 2011 – Jun. 2012*

A software development firm specializing in ERP and judiciary systems.

- **Contributed to the development** and maintenance of ERP solutions and legacy software, gaining early exposure to enterprise logic.
- **Assisted in modernizing legacy applications**, refactoring code to improve system performance.

EDUCATION

Bachelor of Computer Science Federal University of Paraná (UFPR) – Brazil | 2016

- **Key Coursework & Logic Foundation:** C, C++, Java, Python.

LANGUAGES

- **English:** Full Professional Proficiency
- **French:** Professional Working Proficiency (Level B2)
- **Portuguese:** Native
- **Spanish:** Intermediate
