PROFESSIONAL SUMMARY

Dedicated computer science professional with vast experience in software development, including algorithms, open-source development, and artificial intelligence. Well-versed in agile methodologies, I bring adaptability, speedy-collaboration, and clean code to fast-paced environments. My solid foundation in mathematics, highlighted by a completed math minor, enhances my analytical problem-solving skills. As a successful author of two academic papers, one in a leadership role, I am eager to apply my skills and knowledge in a dynamic work environment. My diverse background and relentless pursuit of mastery position me as a valuable asset to tackle the evolving challenges within the tech industry.

EXPERIENCE

Full Stack Web Developer, North Star Systems 01/24 - 7/25

- Maintained fleet management software stack with 100's of monthly users
- Updated .Net Framework 4.6 codebase to .Net Core 8
- Optimized React Native application for IOS and Android
- Maintained PHP web app, upgrading to the newest Laravel version
- Implemented testing framework for continuous integration testing and documentation

Assistant Researcher, Saskatchewan Polytechnic 06/21 - 08/23

- Developed three applications for the aid of an engineering team, improving workflows and optimizing data pipelines.
- Used python to write a web-scraping application to collect census data and analyze it, for the purpose of scoping new energy solutions.
- Evaluated open-source tools for integration and modification.
- Made use of communication skills to convey project ideas to stakeholders and the engineering team.

Junior Assistant Researcher, DICE 05/22 - 08/22

- Contributed to a two-year artificial intelligence project involving data collection and analysis of large data sets.
- Received training on neural networks, machine learning and SQL.
- Adhered to documentation and writing standards for the organization, completing literature reviews to help direct the next steps in the project.

Game Engine Developer, Independent 07/23 - 11/23

- Utilized C++ and CMake to define an architecture and test bed for a complex piece of software.
- Demonstrated expertise in memory allocation, and graphics rendering.
- Successfully defined a program structure that is cross platform and easily scalable.

District Soccer Referee, Saskatoon Adult Soccer 03/18 - 11/23

- Maintained composure and professionalism in high-pressure situations.
- Collaborated, taught, and led fellow referees and tournament officials to ensure smooth event operation.

EDUCATION

B.S. in Computer Science, Minor in Mathematics June 2023. University of Saskatchewan

Certificate in Computing, June 2023. University of Saskatchewan

SKILLS

Competitive Programming (Top 10 at university during 2020), Linux, Data Analytics, Cross-Platform Development, Artificial Intelligence, Computer Networks, Web Scrapping, Code Versioning Tools, Git, Python, C, C++, Rust, Java, R, Object-Oriented Programming, Node.js, Linear Algebra, Calculus, Graph Theory, TCP/IP, JavaScript, Customer Service, SQL, NoSQL
