CBZ Technologies

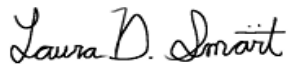

Re: Java programmer position

I am a software engineer looking for a full or part-time position in software development. I work particularly well in a remote environment.

Having been in the field of software development and maintenance for more than 20 years, I have experience with a wide array of technologies. This includes professional experience with Java. Due to my existing broad skill-set, I have every confidence that I could quickly become proficient in any relevant procedural, object-oriented, web scripting, or database querying languages.

I have experience with every part of the software life-cycle from conception and design to testing and release. I can develop applications efficiently and flexibly; I am trained in basic security; I have strong communication skills, both with end-users and with other members of my team; and I have a proven history of continuously improving my skills.

Thank you for your consideration.

A handwritten signature in cursive script that reads "Laura D. Smart".

PROFESSIONAL EXPERIENCE:

January to August 2003 - Report Writer (Co-op Student)

Information Services, University of Regina

- Analyzed and reported on data. Worked on a team with other analysts to perform a major upgrade on a report, making it much more maintainable. A variety of smaller projects with end users, including design and creation of forms, queries and reports to summarize relevant data.

September to December 2004 - Mobile Agent Programmer (Co-op Student)

TRLabs Regina / Research and Development, SaskTel

- Design & maintainability improvements to a system of “Mobile Agents” - programs which can move between computers. Worked with images, music, and video for the Mobile Media Center.

May 2006 to April 2008 - Mobile Agent Programmer

TRLabs Regina (2006-2008) / University of Regina, Department of Fine Arts (2006)

- As before, as well as working with the artist-in-residence on the technical aspects of the installation *Time Transit*, which took place on a city bus in real rotation for several months and later became the real-time bus monitoring system *Transit Live*. This involved the automated retrieving and manipulating of GPS signals, images, and text messages.

May 2008 to January 2014 - Programmer / Analyst

Information Services, University of Regina

- Larger-scale projects with business analysts. Extensive web development. Developing and enforcing standards & security measures as Release Manager for our new Apex reporting system.

January 2014 to October 2022 - Senior Programmer / Analyst

Information Services, University of Regina

- More complex projects such as creating the University's grading system, DOME. Documentation & mentoring for newer team members. Security / account management.

October 2022 to July 2025 - Game Developer

Noodlecake Studios

- “Porting” (converting) games for Android and iPhone. Adding or developing code for ads, rating, AR, trial or per-day features. Updating existing code for newer devices. User interface work.

RELEVANT TECHNICAL SKILLS:

- Database: PL/SQL, MS Access, Apex, MySQL
- Web: PHP, HTML5, Javascript, jQuery, CSS
- General-Purpose Programming: Java, C#, Python, C++, Visual & QBasic, VBA, Objective-C
- Games: Godot, Unity, Android Studio, Xcode
- Other Programming: Ajax, XML, JSON, Regular Expressions, Bash & Shell, Autohotkey
- General Software: Word & Excel (and variants), Git & Subversion, Banner/Oracle Forms
- Graphics Software: GIMP (free photoshop), ImageMagick (automating image manipulation), Spine (2d animation), Blender (3d modelling), Inkscape (vector graphics), Type Light (fonts)
- Design: Relational Databases, Unified Modelling Language, Software Process Models
- Operating Systems: Windows, DOS, MacOS, Unix, several Linux distributions

EDUCATION:

2001-2006	Software Systems Engineering University of Regina, Regina, Saskatchewan Undergraduate GPA of 83.2%
1997-2001	Winston Knoll Collegiate Regina, Saskatchewan Grade 12 Average of 97.0%

ACADEMIC AWARDS:

- Honourable E.W. (Staff) Barootes, M.D. Scholarships
- Centennial Merit Scholarship
- University of Regina Entrance Scholarship
- Saskatchewan Education General Proficiency Award
- Winston Knoll Collegiate Proficiency Award (Bronze)
- Bryan Milne Computer Science Award
- Winston Knoll Collegiate 2001 Scholarship
- Honour Roll Years One to Four with Level Six Honours (42 A's over four years)

SOFT SKILLS:

- I spend a great deal of my spare time designing and implementing software, usually in the form of games, game development engines, and other tools. This means that I am always challenging myself with new systems, as well as dabbling in other fields such as art, story, and music.
- I love to write. I am currently querying agents for a completed 77,000-word fantasy novel.
- I also have a highly unique tabletop role-playing game which is currently in the blind playtesting phase. As soon as that is done I will be sending it to prospective publishers.
- Between my time in the multi-disciplinary Time Transit project and my time working with clients at the University, I have become adept at communicating with people with varying degrees of technical knowledge.
