PROFESSIONAL SUMMARY

Junior Java Programmer with a strong Computer Science foundation and an engineering background. Experienced in object-oriented programming, software development, and database-driven applications, with hands-on experience using Java, SQL, and Git. Comfortable working in remote environments, writing clean and maintainable code, debugging, testing, and documenting solutions. Bilingual and motivated to grow within a collaborative development team.

TECHNICAL SKILLS

Programming Languages	Software Development	Tools & Environments
- Java - Python - SQL	- Software development lifecycle (SDLC) - Debugging and code optimization - Unit testing fundamentals - Code documentation and maintenance	- Git / GitHub - VS Code / IntelliJ - Jupyter Notebook - Remote collaboration tools
Java & OOP Concepts	Databases	
- Object-oriented programming (OOP) - Classes, interfaces, inheritance, polymorphism - Exception handling - Data structures (lists, maps)	- MySQL - Relational database design - JDBC fundamentals	

PROJECTS

Java-Based Software Projects (Academic) | Concordia University – Computer Science

- Developed Java applications using object-oriented programming principles, including classes, methods, and exception handling.
- Implemented logic using common data structures and control flows.
- Debugged and tested Java code to ensure correctness and reliability.
- Documented code functionality for maintainability and future enhancements.

Database-Driven Application Project

- Designed and implemented a relational database using MySQL.
- Wrote SQL queries for data retrieval, insertion, and updates.
- Connected application logic with database components to support structured data storage.

PROFESSIONAL EXPERIENCE

Data & Software Analyst (Technical Role) | Boutiquaat E-Commerce

Mar. 2021 - Dec. 2023

- Worked with structured datasets and application outputs to support analytics and reporting systems.
- Used programming logic and SQL queries to validate data consistency and troubleshoot issues.
- Collaborated with technical teams to understand system behavior and resolve data-related anomalies.
- Produced clear technical documentation and reports for internal stakeholders.
- Gained experience working in remote, cross-functional teams.

EDUCATION

Graduate Diploma	Concordia University, Canada, Computer Science	Sep 2024 - Dec.2025
	GPA: 3.82 / 4.00, Relevant Coursework & Projects: - Object-Oriented Programming - Data Structures & Algorithms - Database Systems - Software Engineering	
M.Sc.	Kuwait University, Kuwait, Electrical Engineering, Distinction	Sep 2016 - Mar 2021
BSc	Kuwait University, Kuwait, Electrical Engineering, Distinction with Class Honors	Sep 2011 - Dec 2015

CERTIFICATIONS

Python & Machine Learning	Decode Python to Fuel Your Research — Concordia University (GradProSkills)	August 2025
	Covered Python programming fundamentals, NumPy, Pandas, visualization, and ML introduction.	
Machine Learning Course	Computer Engineering Society	August 2023
Professional Diploma in Digital Marketing	Digital Marketing Institute Digital Marketing Institute (SEO, Google Ads, Analytics, email, content strategy)	Jan. 2024

LANGUAGES

- English – Fluent
- Arabic – Native
- French — Beginner (formal part-time training starting January 17, 2026)

ADDITIONAL INFORMATION

- Eligible to work remotely in Québec
- Comfortable with distributed teams and asynchronous communication
- Strong analytical and problem-solving skills
