- ☐ Davinci Resolve
- ☐ Security Surveillance
- ☐ Voice Acting
- ☐ Online Marketing
- ☐ Customer Service

Thomas Savage

Junior Software Developer

Seeking to improve my skills in a cooperative work environment. **Diploma in Computer Information Systems** at Holland College, on top of hobbing and practical knowledge of using **Linux** and **Windows** computer systems from a young age. Professional work has been varied, from department store to food service to some side work as a house renovation assistant to security work. I'm versatile and engaged heavily in whatever project or work I decide to take on.

I've worked in a non-professional capacity as a **creative writer**, **project team leader**, and participant in online theater for years. This has made me come to appreciate team tasks and become familiar with programs like **Microsoft Teams**, **Google Documents**, and other tools for remote and cooperative work.

I'm also familiar with **running enjoyable game experiences** with tabletop RPGs like D&D, Call of Cthulhu. I hobby in **creating a full-stack storied Scifi Audiodrama**. I write, voice act, video edit, and self-publish. Please be sure to check my skills tab below for more specific experience.
