EDUCATION

University of Guelph

B.Comp. in Software Engineering

– Graduated with Distinction; 2× Dean's Honour List; Scholarships (3)

Guelph, ON

Sep. 2020 – Sep. 2024

Athabasca University

Intro to Database Management

Remote

Jun. 2024 – Aug. 2024

EXPERIENCE

Backend Developer Co-op (Outstanding Evaluation)

Jan. 2025 – May 2025

Candescent

Waterloo, ON

- Built & shipped Java Spring Boot services in cloud-native SaaS platform; defined OpenAPI/Swagger REST contracts
- Profiled endpoints and tuned SQL/JPA + service logic, improving processing throughput by 4×
- Created performance baselines (JMeter) and reduced P95 latency by 75% for data-heavy workflows
- Strengthened CI/CD reliability (Jenkins/GitHub Actions); supported incident triage, RCA, and production readiness

Backend Developer Co-op (Outstanding Evaluation)

Jan. 2024 – Aug. 2024

NCR Voyix

Waterloo, ON

- Developed Java Spring Boot REST APIs for POS workflow; improved reliability via validation, logging, error-handling
- Implemented automated API tests (JUnit, Mockito, Cucumber) in CI; cut regression time from 72h to 8h (88%)
- Stood up isolated Kubernetes environments for dev/testing and demos, reducing environment-related blockers by 90%
- Performed production debugging via log analysis and break-fix; collaborated in Agile ceremonies (Jira/Confluence)

Software Developer Co-op

May 2022 – Sep. 2022

Camis Inc.

Guelph, ON

- Built React dashboards integrated with backend services and SQL Server; collaborated in Agile using Jira/Confluence

Software Test Co-op

Sep. 2022 – Dec. 2022

Intellijoint Surgical

Kitchener, ON

- Automated regression tests (Playwright/CodeceptJS) in CI, wrote defect reports for safety-critical software

Bioinformatician Co-op (Outstanding Evaluation)

May 2023 – Aug. 2023

Norgen Biotech Corp.

Thorold, ON

- Built Python/Bash ETL pipelines and SQL-backed workflows; improved runtime by 60% via parallelization and optimizations
- Containerized ETL pipeline with Docker for reproducibility across 6 systems; implemented cron-monitoring to detect failures early

Teaching Assistant – Data Structures & Algorithms (C)

Sep. 2023 – Dec. 2023

University of Guelph

Guelph, ON

- Supported 250+ students in labs and debugging sessions; reinforced fundamentals in algorithms, memory, and pointers

PROJECTS

GryphHub (Academic Planner / Course Registration Prototype) | Java, OOP, UML, File I/O, Unit Testing 2023

- Built console planner modeling roles (Student/Professor/Counselor), courses/sections, registration state, timetables
- Implemented logic in central *Planner* Singleton (register/drop, capacity checks, timetable/class list generation)
- Produced UML artifacts (class/entity + sequence diagrams) and added exception handling for workflow validation

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

2025

TECHNICAL SKILLS

Languages: Java, SQL, Python, JavaScript/TypeScript, C

Backend: Spring Boot, REST APIs, Microservices, OpenAPI/Swagger, Maven/Gradle (familiar)

Testing: JUnit, Mockito, Cucumber, JMeter, TDD/BDD fundamentals

DevOps/Cloud: Git/GitHub, Jenkins, GitHub Actions, Docker, Kubernetes (GKE), AWS

Databases: PostgreSQL, MySQL, SQL Server; query tuning and indexing fundamentals

Collaboration: Agile/Scrum, Jira, Confluence, code reviews, documentation
