Objective: Software Developer Profile

Detail-oriented Software Developer and Data Analyst with extensive experience in backend development, data integration, automation, data validation and API creating. Skilled in delivering data-driven solutions, optimizing systems, and supporting decision-making processes in Agile environments. 3+ years of Python working experience.

Technical Skills

- Languages: Python, Go, JavaScript, Java, C#, SQL, Prolog, MATLAB, C++
- Tools: FastAPI, REST Api, Unity, Docker, Kubernetes, GitHub Actions, Bash, SDMX, AWS, Node.js
- Data: API Development, Data Analysis, Databases, Data Cleaning, Reporting, Automation
- Soft Skills: Communication, Leadership, Mentorship, Agile Collaboration, Data Interpretation

Work Experience

- **Statistics Canada – Junior Analyst**
Ottawa, ON | June 2022 – April 2025
 - Developed and maintained APIs using FastAPI and REST, streamlining data access and integration
 - Deployed scalable services using Docker and Kubernetes within internal environments
 - Wrote technical documentation and followed development and analytics best practices
 - Automated data workflows and made CI/CD pipelines, saving 30+ hours/month
 - Programmed tools for data validation, anomaly detection, and cleansing for large-scale datasets
 - Delivered custom data extracts and insights to support testing teams
 - Did training in SDMX data standard
- **P2L – AWS Web Programmer**
Remote | May 2021 – Sept 2023
 - Architected and deployed highly available cloud infrastructure
 - Migrated legacy infrastructure to AWS, achieving 99.99% uptime and reducing costs by 30%
 - Designed and developed a user friendly website that increased traffic by 20%
 - Fixed bugs and implemented enhancements that increased website speed
- **Firefly – Unity Programmer**
Remote | May 2020 – Sept 2020
 - Created backend logic and game mechanics for AR treasure hunting game in Unity and MARS SDK
 - Collaborated with a 6-person team to deliver engaging user experiences under tight deadlines

Related Experience

- **Queens University Computing Students Association (COMPSA) – Team Lead**
Kingston, ON | May 2021 – April 2022
 - Guided three other developers within a startup team to successfully implement a marketable product
 - Developed a full stack IOS application using Swift, Node.js, MongoDB, AWS Lambda

Certificates

- Certified Cyber Intelligence Investigator – CCII
McAfee Institute (2025)

Education

- Queen's University – Master of Science (MSc)
Computing (2025 - 2026)

Education (cont)

- Queen's University – Bachelor of Computer Science
Software Design Specialization (2019 – 2025)
GPA 3.7
 - Relevant Coursework: Algorithms, AI/ML, Deep Learning, Formal Methods, Distributed Systems, Cybersecurity, Optimization, Artificial Intelligence

Projects

- **Custom Deep learning model to improve an images' quality score**
 - 60% of images had a higher quality score
 - Designed the full CNN architecture solo and filtered 10 000 + data points for dataset
 - Wrote report and received a mark of 95%
- **Tangible reminder device for workers**
 - Followed a full design process from start to finish. Interviews, properties and feedback implementation.
 - Final prototype was 3d printed with electrical wiring inside. The device blended perfectly in an office setting
 - All users were happy with the final prototype
 - Report written and received a mark of 90%
- **Replication of LLMs for predicting software bug time fixes**
 - Recreated a research paper using a different dataset
 - Implemented pipelines for dataflow and data filtration
 - Filtered over 300 000 data points from 4 different projects for dataset
 - Created visuals for results and discussed the findings compared to the original paper
 - Report written and received a mark of 90%
