

CURRICULUM VITAE

PERSONAL DETAILS

Name : GAUTAM
Alias Name : SOE WIN
Date of Birth : 31st Jul 1990
Highest Academic Qualification : Master of Computer Science (M.C.Sc)
Gender : Male
Marital Status : Married
Nationality : Myanmar
Contact Number : +65 98878541
Contact Address : #12-546, Hougang Central, S530832
Postal Code : S530832
Visa Type : Employment Pass
E-mail Address : soewin1990@gmail.com
LinkedIn : <https://www.linkedin.com/in/gautamkumar31/>
GitHub : <https://github.com/soewin90>

CAREER INTERESTS

Expected Salary : (Negotiation)
Working Experiences : 10+ Years
Availability to commence work : 1 **Month Notice**
Reason : Want to work in an organization that provides a competitive work atmosphere and good prospects to develop new skills and knowledge to their level

Education

Year	University	Graduation	Location
2007 – 2010	Computer University- Yangon, Myanmar	Bachelor of Computer Science	Myanmar
2010 –2011	Computer University- Yangon, Myanmar	Bachelor of Computer Science Honors	Myanmar
2011 –2013	Computer University- Yangon, Myanmar	Master of Computer Science	Myanmar

PROFESSIONAL QUALIFICATIONS AND CERTIFICATION

- Awards in Prepared English Talk at Computer University Yangon, 2008
- IELTS Band 7.0
- Oracle Certified Professional, Java SE 6 Programmer (**OCJP**) , 2015
 - Exam Code (**1Z0-851**) - Score 100%

TECHNICAL SKILLS

Java, J2EE, Spring, Spring Boot, GO, Hibernate, JPA, Angular2.x, React, Webpack , Bootstrap, CSS, Jasper Report, JBOSS Fuse6.3, Apache Camel, JMS, ActiveMQ, JBoss, Apache Tomcat, Shell Scripting, SQL, Charting, OracleDB, MSSQL DB, Postgres, JQuery, Android, Jenkins, Groovy, KAFKA, Docker, OCPP, OCPI

EMPLOYMENT HISTORY

Year	Position	Employment Company	Client Company	Location
Feb-2013 - Apr-2015	Programmer/Developer	DIR-ACE Technology Ltd	DIR-ACE Technology Ltd	Myanmar
Aug-2015 – Nov-2016	Project Engineer	Panache Service Company Ltd	Wipro Ltd	Myanmar
Aug-2017– Apr-2019	Software Developer	Forte Employment Services Pte Ltd	NCS Pte Ltd	Singapore
May-2019 – Feb -2021	Senior Software Developer	Sciente International Pte Ltd	Resort World Sentosa	Singapore
Feb-2021 - May-2024	Senior Software Developer	Infosight Consulting Pte Ltd	Capgemini	Singapore
June-2024 - Present	Senior Software Developer	Manpower Staffing Services Pte Ltd	Accenture	Singapore

WORKING ACHIEVEMENTS

Manpower Staffing Services Pte Ltd (01-Jun-2024 – Present) - SINGAPORE

Projects:

Wireless Workforce Management. System

Product Name : **Wireless Workforce Management. System (WWMS)**
Client : **Under Accenture for client SP GROUP Company**
Duration : **Currently Working**
Position : **Senior Software Developer (Contract)**
Team size : **5**
Platform : **Linux**
Language and Other skill sets : **PL/SQL, Spring Boot, Oracle, Application Development, Application Services, iOS Development, Java, Application Architecture, Vendor Management, Analyst**

Responsibilities

- Build meter data reading application for Field Service Users to perform and handle readings in large scale across Singapore
- Maintain and Support Field Service Technicians issues regarding with meter readings jobs in their day-to-day operation thru the WWMS System
- Level-3 Support for Production and manage fixes and release
- Involve in Product and Data House keeping and Enhancement
- Collaborate with BU for requirements gathering and implementations
- Provide solutions and guidance to Vendor for code qualities, product enhancement and new feature development
- Work closely with PMO, Product, and Management on project planning, prioritization, and execution
- Collaborate with different Integration Units and Support BAU for UAT and Production Deployment for the new features or fixed defects

Infosight Consulting Pte Ltd (05-Feb-2021 – 31-May-2024) - SINGAPORE

Projects:

Product Name : **Electric Vehicle Charging Control System (COSMOS)**
Client : **Under Capgemini for client SP GROUP Company**
Duration : **Currently Working**
Position : **Senior Software Developer (Contract)**
Team size : **8**
Platform : **Windows**
Language and Other skill sets : **React, SpringBoot, JooQ, GO, KAFKA, OCPP Protocol, OCPI Protocol, Dockers, Jenkins, Jira, Confluence, Kubernetes, GIT, TDD**

Responsibilities

- Work with Agile team
- Work closely with Offshore team and different stockholders for day to day development and sprint plan
- Integrate the COSMOS central system with all 3 channel, Mobile, Central-System, and on-ground Charge Station using OCPP and OCPI protocols
- Implement different types of charging algorithms such as Liner Charging, Sequential Charging and Smart Charging
- Collaborate and work with DevOps team for build automation and deployment using Jenkins, Docker and Kubernetes
- Collaborate and Co-ordinate with others team during each phase of software life cycle
- System Design, Unit Test and Integrated Test are done each time a new function is added to meet the SDLC flow.

Product Name : EV Charging End Point (SP Utilities)
Client : Under Capgemini for client SP GROUP Company
Duration : Currently Working
Position : Senior Software Developer (Contract)
Team size : 8
Platform : Windows
Language and Other skill sets : React, SpringBoot, JooQ, GO, KAFKA, OCPP Protocol, OCPI Protocol, Dockers, Jenkins, Jira, Confluence, Kubernetes, GIT, TDD

Responsibilities

- Work with Agile team
- Integrate NOMISMA and EVA with central electric charging station command system and feed data from Central System from on-ground Charge Station all together for Billing and Plan
- Automate Jenkins with pipeline template for Release Management (CI-CD)
- Collaborate and Co-ordinate with others team during each phase of software life cycle
- System Design, Unit Test and Integrated Test are done each time new function is added to meet the SDLC flow.

Science International Pte Ltd (01-May-2019 – 04-Feb-2021) - SINGAPORE

Projects:

Product Name : Gaming Operation Mobile (GOM)
Client : Resort World Sentosa
Duration : 1 Year 8 Months
Position : Senior Software Developer (Contract)
Team size : 3
Platform : Windows
Language and Other skill sets : React, UMI JS, AXIOS, SpringBoot, Dockers, Jenkins, Jira, Confluence, Kubernetes, Bitbucket, JMS, SpringBatch, TDD

Responsibilities

- Work with Agile team
- Work closely with Architect team to build up organization development and production environment
- Implement Gaming Operational System to remote approval process for below Casino Management System(CMS) for high rank supervisors using SpringBoot, React(UMI) framework with AntDesign
- Automate Jenkins with pipeline template for Release Management (CI-CD)
- Collaborate and Co-ordinate with others team during each phase of software life cycle
- System Design, Unit Test and Integrated Test are done each time new function is added to meet the SDLC flow.

Product Name : Casino Management System (CMS)
Client : Resort World Sentosa
Duration : 1 Year 8 Months
Position : Senior Software Developer (Contract)
Team size : 10
Platform : Windows
Language and Other skill sets : React, UMI JS, AXIOS, SpringBoot, Dockers, Jenkins, Jira, Confluence, Kubernetes, Bitbucket, JMS, SpringBatch, TDD

Responsibilities

- Work with Agile team
- Work closely with Architect team to build up organization development and production environment
- Implement Membership System and Gaming Table Terminal using SpringBoot, React(UMI) framework with AntDesign
- Automate Jenkins with pipeline template for Release Management (CI-CD)
- Collaborate and Co-ordinate with others team during each phase of software life cycle
- System Design, Unit Test and Integrated Test are done each time new function is added to meet the SDLC flow.

Forte Employment Services Pte Ltd (01-Aug-2017 – 30-Apr-2019) - SINGAPORE

Projects:

Product Name : URAREP Carpark System (ERP 2.0)
Client : NCS Pte Ltd
Duration : Currently Working
Position : Software Developer (Contract)
Team size : 6
Platform : Window
Language and Other skill sets : Anglar 5.0, Webpack 3.0, Bootstrap4.0, SpringBoot, JBOSS EAP7.1, JBOSS FUSE6.3, Apache Camel, JMS, AMQ, Spring Batch, Quartz 2.0, Git, TDD

Responsibilities

- Model DB design to suite with requirements
- Design application with MVC using SpringBoot, Hibernate, Angular 4, Bootstrap, MSSQL, and deployed on EAP7.1
- Use Camel-AMQ and Camel-CXF-RS EIP to integrate various application deployed in JBoss Fuse6.3

- Prevent direct access to EAP application sever using Fuse ESB
- Implements Car-Park Administrator Module(Event Management, Scheme Operation Management, Tariff Management, Car Park Management, Queries & Report)
- Implements Enforcement Module(View Car Park Conditions, Violation, Evidence Management, Equipment Management)
- Implements Common Module for User Access Control and Approval workflow system
- System Design, Unit Test and Integrated Test are done each time new function is added to meet the SDLC flow.

Product Name : VSG City Cock Pit
Client : NCS Pte Ltd
Duration : 3 Months
Position : Software Developer (Contract)
Team size : 4
Platform : Window
Language and Other skill sets : Anglar 5.0, Webpack 3.0, Nginx, Bootstrap4.0

Responsibilities

- **R & D for Angular5.0 to integrate with RequireJS Environment/Platform(3DS platform – MAP API)**
- Create widget and integrate third party GIS
- Display visual information from the map by text, charts and dashboard
- Design application to give finer look and feel to persuade client (**UI/UX**), and loosely couple of components to change easily on client demands and requirements
- System Design, Unit Test and Integrated Test are done each time new function is added to meet the SDLC flow.
- Develop system using Agile Software Development Principles

Product Name : Government Private Cloud Services
Client : NCS Pte Ltd
Duration : 8 Months
Position : Software Developer (Contract)
Team size : 5
Platform : Linux
Language and Other skill sets : Java, J2EE, SpringBoot, Spring Security, Angular-JS 4, CSS, Java Mail API, Bootstrap 4, Data Modeling, Hibernate, MSSQL, JasperReport, TDD

Responsibilities

- Model DB design to suite with requirements
- Design UI/UX and implements application with MVC using SpringBoot, Hibernate, Angular 4, Bootstrap 4, MSSQL
- Implements Cart and Billing System (Budgetary Quotation (BQ) and Bill of Materials (BOM)) to meet software requirements
- Implements Jasper Reports for Billing System (Budgetary Quotation (BQ) and Bill of Materials (BOM))
- System Design, Unit Test and Integrated Test are done each time new function is added to meet the SDLC flow.
- Develop system using Agile Software Development Principles

Panache Service Company Ltd (21-Aug-2015 – 19-Nov-2016) - MYANMAR

Projects:

Product Name : Mobile Financial System (MFS or Mobile Money) & ELoad(Recharge System)
Client : Wipro Infotech – Division of Wipro Ltd
Duration : 1 Year and 3 Months
Position : Project Engineer (Contractor)
Team size : 15
Platform : Linux
Language and Other skill sets : Java, Jboss, Oracle SQL, Job Scheduler, Analysis, Web Service, Outlook

Responsibilities

- Maintain and Analysis the existing system.
- Support end to end problem analysis
- Provide resolution within the **SLA** breach time of **Incident Management Tickets, Service Request Tickets and Change Management** by analyzing current on-going system
- Maintain and Update SOP for current projects **MFS** (Wave Money) and **Eload**
- Provide reports required by BU from BackEnd DB
- Work closely with Testing Team for Change Request, UAT, SIT and implement Sanity test for the current project
- Develop automated rotation FTP files delivery scripts for reports and backup process for operation and maintenance

DIR-ACE Technology Co., Ltd. (11-02-2013 –30-04-2015) - MYANMAR

Projects:

Denshibato (Japan Stock Exchange Document and Reporting System)

Client : **Daiwa Institute of Research (Japan)**
 Duration : 1 Year 5 Months
 Position : **Developer**
 Team size : 10
 Platform : Cent OS
 Language and Other skill sets : Java, Swing, JSP&Servlet, Shell Scripting, Servlets, JSP, Axis1.x, Axis2.0, Oracle DB, PL/SQL, Apache Web Server, JBOSS Application Server

Responsibilities

- JBOSS server herding and multi-profiling for Application deployment
- Create Web Service with Axis2.0 for Denshibato Web Application
- Create Proxy Passing and Load Balancing for Denshibato Web Application with Apache Web Server
- Create Replacer Tool(Automated) with JAVA SWING to modify Shell Scripts Codes and Denshibato Web Application Codes
- Create Basic Design, Detail Design, and Unit Test Specification, and Integrate Test Specification and Performance Test Specification.
- Oracle Data Migration and PL/SQL
- Applied Unit Test Specification, Integrate Test Specification and Performance Test Specification
- Communicate with clients (Japan) for requirements changes.

Project Name : **Buta Colle(House Hold Accounting Application)**
 Client : **DIR-ACE Technology Product**
 Duration : 6 months
 Position : **Developer (Permanent)**
 Team size : 5
 Platform : Windows
 Language and Other skill sets : Android Programmer, SQLite DB

Responsibilities

- Uses the Open Source Android Software Development Kit.
- Developing the existing iOS **ButaColle** project into Android Version (*Reverse Engineering*).
- Learn iOS coding and UI design to meet with Android UI controls.
- Applying Android UI same as the iOS Look and Feel
- Solving all kind of problems deploying the Buta Colle Application like custom Bar Chart and Pie Chart without using external libraries
- Writing the Operation Manual, Reference Manual from scratch.
- Detail Design and UI Automation Test

Project Name : **Myanmar Stock Exchange (Front System)**
 Client : **DIR-ACE Technology Product**
 Duration : 4 Months
 Position : **Senior Developer (Permanent)**
 Team size : 12
 Platform : Linux
 Language and Other skill sets : JAVA, WOLF2 Framework, Oracle DB, JSP&SERVLET, Spring Framework, TDD

Responsibilities

- Maintain the existing system.
- Adding new functions according to the Country Policies and Stock Information.
- System Design, Unit Test and Integrated Test are done each time new function is added to meet the SDLC flow.
- Monitor the current system process and fix bugs on each SDLC step.

Thesis (2012- 2013)

Thesis Project Name : **Applying Prim's Algorithm Approach in NayPyiTaw Tour Guide System**
Purpose : **Thesis for Master of Computer Science**
 Duration : 1 Year
 Platform : Windows
 Language and Other skill sets : Java, J2SE, Swing, Graph Theory, Minimum spanning tree, Minimum cost, Prim's Algorithm

Project Abstract

Minimum cost spanning tree problem appears in the design of utility networks (e.g. bus services, electrifications) where popular locations and the network connecting them have to be chosen in the most profitable way. This system is implemented in popular locations of **NayPyiTaw** City (Myanmar) as the vertices of an undirected graph. In this system, the associated distances between each location are represented as weight of the edges of the graph. There are three different algorithms to obtain a minimum-cost spanning for connected, undirected graph. The minimum cost spanning tree finding system is focused on Prim's algorithm. The case study is analyzed and interesting results are obtained which demonstrate cost efficiency by applying Prim's algorithm.

Thesis Experience

- Software Development Life Cycle
- System Analysis and Design

- Analysis of Algorithm and Performance
- Graph Theory
- Prim's Algorithm and Route Planning
- Object-Oriented Programming Design and Techniques
- Developing Windows applications with Java Swing
- Establishing Thesis Book

Summery

1. More than 10+ Years of experience in Application development and Operation including Stock Exchange Document and Reporting System, Android App development, Mobile Financial Services/Eload and E-Commerce Shopping Solution, G-Cloud Billing System, URAREP application development and Electric Vehicle Charging System, Wireless Workforce Management System for Meter Readers
2. Extensively worked with Java, J2EE and Spring, Axis2 Web Services, Android, J2SE and JBoss Web Server on Linux, Window, Android, SQL, JPA and Hibernate.
3. Strong Technical Analytical skills, Design, Development skills and SDLC.
4. Ability to absorb new technologies and skill-up and can able to transfer on any domain.
5. Excellent communication and written skills on problem solving skills and analytical view to provide client.
6. Able to work under pressure with minimal supervision and can lead a team.
7. Able to learn and handle new domain projects and behavior driven domain.
8. Self-continuous learning, dedication, passionate and team work can grow personally and the organization together.
