Summary

Bilingual Software Programmer and 2024 Software Engineering graduate, actively seeking work in software development, web development, and similar domains.

Experience Details

Feb-2025 To Present

Montreal, QC, Canada

Programmer Analyst, IMDS Software Inc.

- Implemented document scanning and OCR solutions for clients.
- Developed custom C++ extensions for the ADDOC Capture AI software in to meet client requirements.
- Provided advanced technical support by analyzing software logs, client workflows, and system architectures to resolve issues and outages.
- Created Python and PowerShell scripts for client automation and internal product testing.
- Contributed to front-end development with React JS, and back-end development with ASP.net (C#).
- Maintained and monitored cloud SaaS solutions.
- Created and managed Microsoft SQL Server and Oracle databases
- Authored technical proposals used to respond to tender opportunities.

May-2024 To Aug-2024

Montreal, QC, Canada

Programmer Intern, Behaviour Interactive

- Assigned to a team working on an upcoming AAA video game title.
- Contributed to C++ game development with the Unreal Engine 5.
- Developed tools and UI components within the game engine to support programmers and designers.
- Implemented new engine and gameplay features and resolved bugs.
Examples include:
 - Telemetry improvements
 - New in-game debug command that displays real-time statistics
 - Improvements to an in-house node-based scripting extension
- Tech stack:
 - Unreal Engine 5 (C++)
 - Microsoft Visual Studio Professional, JetBrains ReSharper
 - Code Collaborator, Perforce, Confluence, JIRA

May-2023 To Aug-2023

Montreal, QC, Canada

Programmer Intern, Behaviour Interactive

- Assigned to a team working on the game 'Civilization VII'.
- Tools programming in C# (console applications)
- Implemented automated testing for various platforms, used C# console programs to run the game and collect logs from devices
- Improved a locally hosted web interface (TypeScript frontend, ASP.Net server)

in the backend)

Tech stack: C# / .Net Framework, Node.JS, TypeScript, Microsoft Visual Studio Professional, Code Collaborator, Perforce, Confluence, JIRA

Education

Sep-2020 to May-2024
Montreal, QC, Canada

McGill University, Montréal QC
Bachelor's of Software Engineering

- Graduated with Distinction
- ECSE321 Project : Grocery Store Software System (Spring Boot, Java, Eclipse, Vue.JS)
- Capstone Design Project : Python Circuit Simulator.
 - Created node-based wiring system and component system

Languages

English (Fluent), **French** (Native), **Arabic** (Native)

Skillset

- C++, Unreal Engine 5, Java, C#, Python (including libraries like NumPy, Scikit-learn)
- Web development: Frontend (HTML5+CSS), Backend (JavaScript, TypeScript)
- Microsoft Visual Studio, Eclipse, IntelliJ, Git (GitHub, GitLab), Perforce, Code Collaborator, Jira, Microsoft Office & Teams

Extracurricular Activities

Oct 2022

Volunteer at McGill University's Engineering Tech Fair

- Ensured security at the event by checking student tags at the entrance
- Helped prepare for the event

Jun 2020

Math Tutor for high school students

- Provided Grade 12 math lessons to a group of students
- Typed and distributed notes for each chapter

Scholarships and Awards

- Alma mater entrance scholarship (*McGill University, 2020*)
- Beverly and Arthur Mendel Family Scholarship (*2022*)
- Dr. Raymond Yong Scholarship in Engineering (*2022*)
- Professor Martin Levine Scholarship (*2022*)
- Dean's Honor List (*McGill University, Faculty of Engineering, 2022*)
