SKILLS

Programming Languages: Java, JavaScript, React, Python, C#, C++, Go, SQL, Python

Frameworks: React, NextJS, Node.js, Spring Boot, Bootstrap

Tools: Docker, GitHub Actions, VS Code, IntelliJ

Other: Agile Development, REST APIs, Database design

Soft Skills: Self management, Collaboration, Communication, Organization

TECHNICAL EXPERIENCE

Full Stack Developer

Remote

Personal Projects

2022 – Present

- Built and deployed multiple web applications using Java, React, JavaScript, HTML, and CSS.
- Implemented REST APIs and database connections (MySQL, PostgreSQL) for scalable web services.
- Used Docker to containerize and deploy apps for rapid testing and production consistency.
- Developed a Repair Inventory System:
 - o Ticketing system to track repair status and history
 - o Inventory management with real-time updates
 - o Secure on-premises hosting ensuring data privacy

ZMK New Shield Generator

Open Source Contributor

Python, GitHub actions

2024 – Present

- Script automates firmware scaffolding for ZMK keyboards.
- Implemented text parsing to correctly generate configurations for split or monoblock keyboards
- Integrated CI/CD pipeline using github actions to automate firmware builds

PROFESSIONAL EXPERIENCE

Sherweb

Remote

IT Support Specialist

Feb 2022 – Present

- Average Customer turnaround is ~10min, which is 94% more efficient in comparison to other team members
- Maintain detailed logs documenting client problems, solutions, and overall customer satisfaction.
- Developed a PowerShell script that automated ConnectWise installation, reducing setup time by 62% and minimizing user errors.

G.A.M.E.S

Oshawa, ON

Lead Repair Technician, Webmaster

2022 – 2025

- Designed and maintained in-house repair ticketing system with a modern web interface.
- Built reporting dashboards to analyze repair trends and inventory usage.
- Provided direct technical troubleshooting and customer-facing problem solving.

PROJECT PORTFOLIO

Repair Inventory System

- Full stack application built using Java + React, with role-based authentication

Personal Blog Platform

- Built using NextJS + MongoDB, featuring Markdown support and dynamic routing

Weather Dashboard

(Java + React)

- React + API integration with OpenWeather for real-time weather updates

EDUCATION

Ontario Tech University

Oshawa, ON

Bachelor of Engineering, Software Specialist

Expected Graduation 2027

- **Focuses in Software Development, Data Structures, Algorithms, and System Design**
- **Relevant Coursework:** Object-Oriented programming, Database Systems, Web development, and software testing & quality assurance.
