WORK EXPERIENCE

Senior Associate Consultant | Infosys Limited, India | April 2024 – Till Date

Responsibilities

- Developing and Optimizing scripts (SQL, PL/SQL) for data extraction, transformation, validation, and automation tasks.
- Implementing and configuring MDM solutions to manage master data across domains(customer, product, vendor, etc.)
- Performing data profiling, cleansing, and harmonization using MDM tools such as Riversand and Semarchy.
- Collaborating with data stewards and business users to define business rules and implement data governance frameworks.
- Providing end-to-end support across the MDM life cycle including data migration, integration, testing, and production support.

Associate Consultant | Infosys Limited, India | July 2023 – March 2024

Responsibilities

- Supported the team in different phases of the project including problem definition, effort estimation, diagnosis, solution generation, design and deployment
- Review and understand business and technical requirements to ensure test coverage aligns with project goals.
- Develop detailed test plans, test cases based on product specifications and user requirements.
- Perform various types of testing including functional, regression, integration, and user acceptance testing to validate product quality.
- Identify, document, and track defects using tools such as JIRA and collaborate with developers for resolution.

Technology Analyst| Infosys Limited, India | April 2023 – June 2023

Responsibilities

- Prepare Business requirement documents, Functional specification documents and Use cases
- Maintain up-to-date documents reflecting the latest system or process changes.
- Use version control tools (like Git, SharePoint, Confluence) to track changes and manage document lifecycle.

Senior Systems Engineer| Infosys Limited, India | October 2021 – March 2023

Responsibilities

- Set up and configure development, staging, and production environments
- Upgrade the application to the latest supported .NET version.
- Document migration steps, architecture changes, and troubleshooting guides.

Systems Engineer| Infosys Limited, India | September 2019 – September 2021

Responsibilities

- Analyse existing application architecture and design the target environment.
- Document current application functionalities and workflows.
- Migrate application components and versions.
