

IBRAHIM CHERIF MBOUOMBOUO MOUNTAPMBEME

Java Software Developer

Ottawa-Gatineau | 438-455-7145 | cherifibrahim046@gmail.com

Authorized to work in Canada

PROFESSIONAL SUMMARY

Results-driven Java Software Developer with 4 years of hands-on experience building scalable web applications using Spring Boot and Angular. Proven track record delivering 10+ production applications from conception to deployment. Strong foundation in object-oriented programming, RESTful APIs, and microservices architecture. Passionate about clean code, best practices, and continuous learning. Academic background in Artificial Intelligence with practical experience in machine learning applications. Seeking to leverage technical skills and collaborative mindset to contribute to innovative software solutions.

TECHNICAL SKILLS

Programming Languages & Frameworks

Java (8, 11, 17, 21) • Spring Boot 2-3 • Spring Security • Spring Data JPA • Hibernate • Angular • TypeScript • JavaScript (ES6+) • Python • HTML5/CSS3

Databases & Data Management

PostgreSQL • MySQL • SQL Server • MongoDB • Database Design • Query Optimization • JPA/Hibernate ORM

Development & DevOps Tools

Git/GitHub • Docker • Maven/Gradle • Jenkins • GitLab CI • IntelliJ IDEA • VS Code • Postman • Nginx • Apache Tomcat

Software Engineering Practices

RESTful APIs • Microservices Architecture • Object-Oriented Design • Design Patterns • SOLID Principles • Test-Driven Development (TDD) • Unit Testing (JUnit, Mockito) • Code Review • Agile/Scrum

AI/ML & Specialized Skills

Machine Learning Fundamentals • Natural Language Processing • Python (Flask, FastAPI) • TensorFlow/PyTorch Basics • Technical Training & Mentorship

PROFESSIONAL EXPERIENCE

Full Stack Java Developer

Dimsoft Technologies | January 2022 - December 2025

- Developed and maintained 10+ production web applications using Java Spring Boot (2.7/3.x) and Angular, serving diverse client needs across finance, healthcare, and project management domains
- Designed and implemented RESTful APIs and microservices architecture, ensuring scalability and maintainability of applications handling 1000+ daily transactions
- Built responsive frontend interfaces with Angular, TypeScript, and modern CSS frameworks (Tailwind, Bootstrap), delivering intuitive user experiences across desktop and mobile devices
- Implemented robust security features using Spring Security, including JWT authentication, role-based access control, and OAuth2 integration
- Configured and optimized PostgreSQL and MySQL databases, writing complex SQL queries and implementing efficient data models with JPA/Hibernate
- Practiced Test-Driven Development (TDD) achieving 85%+ code coverage using JUnit and Mockito for unit and integration testing
- Containerized applications using Docker and Docker Compose, streamlining deployment processes and ensuring environment consistency
- Collaborated with team of 5-8 developers in Agile/Scrum environment, participating in daily standups, sprint planning, and code reviews
- Utilized Git for version control and CI/CD pipelines (Jenkins, GitLab CI) for automated builds and deployments

- Mentored junior developers on best practices, code quality standards, and Java/Spring Boot fundamentals

Key Projects:

- **WhoIsFa - Job Marketplace Platform:** Full-stack application connecting recruiters and job seekers. Built microservices architecture with Spring Boot 3, implemented secure authentication with Spring Security, integrated email notifications, and created responsive Angular frontend with Ag-Grid for data management.
- **Microfinance Management System:** Comprehensive system for managing clients, accounts, loans, and transactions. Implemented complex business logic, multi-role permissions, and financial reporting with Spring Boot and MySQL.
- **Healthcare Clinic Management:** Developed patient management system with appointment scheduling, medical records, and billing modules. Ensured data security and HIPAA-compliant practices.
- **Real-time Monitoring System:** Built application monitoring dashboard tracking performance metrics, uptime, and automated alerting using Spring Boot and WebSocket for real-time updates.

Freelance Software Developer

Independent Projects | 2022 - Present

- Developed custom web applications for clients using Java Spring Boot and Angular technology stack
- Created association management dashboard for Canadians with member tracking, financial management, and event coordination modules
- Managed full project lifecycle from requirements gathering to deployment and maintenance

Technical Trainer & Program Coordinator

Orange Digital Center | December 2024 - November 2025

- Delivered technical training programs to 200+ individuals in web development (Java, Python, JavaScript) and database technologies
- Developed comprehensive course materials and hands-on practical exercises, achieving 92% participant satisfaction rate
- Coordinated technical workshops and hackathons, fostering collaborative learning environment

EDUCATION

Master of Science in Artificial Intelligence

University of Dschang, Cameroon | October 2022 - July 2024

Specialization: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision

Bachelor of Science in Computer Science

University of Dschang, Cameroon | October 2019 - June 2022

Concentration: Software Engineering, Web Development, Database Management

CERTIFICATIONS & ACHIEVEMENTS

- 2nd Place - Digital Health Hackathon 2023
- Java Programming Certification
- Active member of University Computer Science Club
- Continuous learning: Regular participation in online courses and tech communities

LANGUAGES

French: Native proficiency | **English:** Professional working proficiency
