PROFESSIONAL SUMMARY

Recent Computer Science graduate with strong full-stack development experience in Java, Python, and JavaScript. Passionate about building testable, scalable applications and contributing to collaborative Agile teams. Eager to apply technical skills to impactful projects in healthcare technology.

EDUCATION

Université de Montréal <i>B.Sc. in Computer Science</i>	Montréal, QC 2022 – 2024
---	-----------------------------

TECHNICAL SKILLS

Languages: Java 8+, Python, JavaScript, TypeScript, C#, SQL
Backend: Node.js, Express.js, Spring Boot, Fastify, REST APIs
Frontend: React, Tailwind CSS, Flutter, JavaFX
Databases: PostgreSQL, MongoDB, MySQL, SQL Server
Tools: JUnit, Mockito, Jest, GitHub Actions, Docker, Git
Concepts: OOP, Agile/Scrum, TDD, CI/CD

PROJECTS

CampusConnect – Academic Platform – Developed full-stack student management system with RESTful APIs and React frontend – Implemented secure authentication and unit testing with JUnit – Containerized application with Docker for deployment	Java Spring Boot, React, PostgreSQL, Docker — 2024
Client-Server Registration Platform – Built client-server architecture using Java sockets and JDBC connections – Designed JavaFX desktop UI and relational database schemas – Applied OOP principles and comprehensive unit testing with JUnit	Java, JavaFX, SQL, JUnit — 2023
Café Sans Fil – Management System – Built full-stack café management app for 500+ users with role-based access – Implemented secure backend API with JWT authentication – Applied Test-Driven Development with Jest for reliability	Flutter, Node.js, TypeScript, MongoDB — 2024
Forum Web Application – Developed discussion platform with thread creation and user management – Built REST API with Express.js and React frontend – Implemented JWT authentication and CI/CD with GitHub Actions	React, Node.js, TypeScript, MongoDB — 2024
Event Scheduler – Created calendar-based scheduling app with drag-and-drop functionality – Designed reusable modal components for event management – Collaborated via Figma and Miro for UI/UX design	React, Node.js, Fastify, MongoDB — 2025
Cryptomator – Open Source Contribution – Contributed to encryption tool with comprehensive unit tests using JUnit	Java, JUnit — 2024

PROFESSIONAL EXPERIENCE

Teaching Assistant – Software Engineering <i>Université de Montréal</i> – Guided students in Java programming, UML design, and unit testing with JUnit – Reviewed assignments and provided feedback via Git pull requests – Reinforced clean code principles and software architecture	Sep 2024 – Dec 2024 Montréal, QC
Teaching Assistant – Python Programming <i>Université de Montréal</i> – Assisted debugging and problem-solving in Python – Promoted collaborative learning and pair programming – Emphasized modular, testable code practices	Sep 2023 – Dec 2023 Montréal, QC
Full Stack Developer – Personal Projects <i>Remote</i> – Designed web applications using React, Node.js, Express, and Spring Boot – Followed Test-Driven Development for code reliability – Built REST APIs with JWT and deployed with GitHub Actions CI/CD	Jan 2022 – Present
