

Erik Foreland

2505883611

eforeland1996@gmail.com

Full-stack developer with over 5 years of experience building, scaling, and maintaining production web applications in a highly autonomous, small-team environment. Strong background in JavaScript, Node.js, Vue/Nuxt, Express, and PostgreSQL. Experienced in designing and expanding database schemas, building scalable APIs, and developing modern, responsive user interfaces. Known for independently driving features from concept to deployment, solving complex problems, and delivering reliable, performance-focused applications.

Work history

Full Stack Software Developer

Pilothouse Digital, Victoria, BC

December 2020 -
December 2025

- 5 years of full-stack development experience building and maintaining a production web application
- Strong expertise in **JavaScript, Node.js, Vue.js, Nuxt, Express, and PostgreSQL**
- Designed, implemented, and shipped complex features end-to-end with minimal supervision
- Took ownership of architectural and technical decisions in a highly autonomous, small-team environment
- Played a key role in expanding and evolving the application's database design and schema
- Built scalable APIs and data-heavy features with a focus on performance and reliability
- Created and optimized complex reporting and data processing functionality
- Gained hands-on experience with AWS and Kubernetes in a production environment
- Strong problem-solving skills and ability to take projects from concept to delivery independently

Software Developer

Dyspatch, Remote

April 2020 - August
2020

- Created a web application for code editing and deployed it with Amazon Web Services.
- Worked remotely with a student team and collaborated with Dyspatch's product and engineer team.
- Experience working remotely with a team of software professions in the Agile development process.
