PROFESSIONAL SUMMARY

Result-driven and versatile Software Engineering graduate (**uOttawa, CGPA: 9.55/10**) with **about 2 years** of hands-on experience in cloud computing, DevOps, and full-stack development. Proven success in delivering reliable, efficient, and scalable solutions during internships at **Agriculture and Agri-Food Canada, Canada Revenue Agency, and CNW Group**. Skilled in **Java, Spring Boot, Angular, Docker, Kubernetes, and GCP**. Certified in **Microsoft Azure Fundamentals** and **Professional Scrum Master I**. Adept at collaborating in **Agile** environments and committed to building secure, efficient, and user-centric applications. Recognized for consistent academic excellence (Dean's Honour List, Merit Scholarships). Strong problem-solver and quick learner. Fluent in English and Hindi; beginner in French.

PROFESSIONAL EXPERIENCE

Student - FSWEF / Co-op | **Agriculture and Agri-Food Canada (AAFC)**, Ottawa, ON | Sep 2024 – Present (Part-Time); May–Aug 2025 (Full-Time); May–Aug 2024 (Full-Time)

- Established from scratch **PHGv1, BOX API, PostgreSQL, GATK, VCFTools, PLINK** etc. using **docker** and **singularity** on a **Linux based HPC cluster**. Created a **docker image of PHG v2**, resulting in consistent and portable deployments in cloud environments.
- Executed large-scale and complex bioinformatics workloads on HPC clusters.
- Provisioned and deployed end to end infrastructure from scratch using **Docker, Singularity, PostgreSQL and PHG v1** for **data imputation** achieving **94%** imputation accuracy in barley
- Developed automated, dependency-aware data processing pipelines using **Shell scripting** and **Slurm**, reducing overall processing time by **70%** through optimized scheduling and parallel execution.

University Undergraduate | **Canada Revenue Agency (CRA)**, Ottawa, ON | Sep 2023 – Dec 2023

- Developed DevHub, an internal collaborative platform, using **Java, Spring Boot, Angular, NodeJS, and PostgreSQL**, improving peer collaboration and issue resolution.
- Designed and developed OCBusTracker, a **microservices**-based web application with **Angular** frontend, containerized with **Docker**, and deployed on **OpenShift** using **Kubernetes** configuration
- Acted as Scrum Master for a sprint; enhanced Docker training curriculum and gained experience in Agile methodologies using JIRA.
- Collaborated with cross-functional teams to meet government standards.

Software Developer Intern | **CNW Group Ltd. (Cision)**, Ottawa, ON | Jan 2023 – Apr 2023

- Worked on Content Ingestion project responsible for data ingestion, enrichment, and delivery to output pipeline for analysis and operations.
- Implemented automated alerting for build failures, significantly cutting downtime and response time.
- Maintained cloud-based data streaming and supported migration to Google Cloud Platform (GCP).
- Resolved 4+ critical build issues, fixed a stream giving errors, tested a key component, and customized GCP.
- Strengthened application reliability through code reviews and debugging; worked in Agile teams using Git, Jira, and Confluence.

EDUCATION

Bachelor of Applied Science, Software Engineering (CO-OP), University of Ottawa, Ottawa, ON

Expected Graduation: December 2025 | **CGPA: 9.55/10**

- Dean's Honour List (2021–2025)
- University Merit Scholarship (2021–2025)
- TGPA: 10/10 in Fall 2021, Winter 2022, and Winter 2025 terms
- Relevant Courses: Data Structures, Algorithms, Software Engineering, Artificial Intelligence, Software Design & Architecture, Software Quality Assurance, Databases, Requirement Analysis

TECHNICAL SKILLS

- Programming Languages: Java, Python, C/C++
- Cloud & DevOps: Docker, Kubernetes, Kafka, SCDF, GCP, Azure, AWS, OpenShift, Jenkins
- Web Technologies: HTML, CSS, JavaScript, React, Angular, NodeJS, Bootstrap
- Testing Tools: Selenium, JMH, PitTest, IntelliJ Code Coverage, EasyMock
- Databases: PostgreSQL, SQL Databases, Firebase, TileDB
- Artificial Intelligence: Neural Network, Search, supervised learning, evaluation
- Other Tools: Git/Gitea/GitHub, Maven, Jira, SonarQube, Confluence, Android, GATK, VCFtools, PLINK

APPLIED PROJECTS

- PharmFinder (Capstone, React, Spring Boot, PostgreSQL, Kubernetes): Enhanced the recruitment platform for Canada's leading pharmacy talent acquisition firm DPR Group Inc.
- [Mathematical Shapeplay](#) (React, JavaScript, Bootstrap): Developed an interactive web project that generates beautiful animations and patterns derived from mathematical equations.
- [SciPlanet](#) (React, JavaScript, Bootstrap): Designed web UI for a scientific laboratory, enabling public access to sample testing, experiments, and equipment learning.
- Mealer (Android, Java, Firebase): Developed a meal-ordering app for local cooks to sell meals to clients from their homes.
- Testing Project (Selenium, JMH, PitTest): Developed and executed automated test cases for an 'Online Book Store' web app, including performance, mutation, and coverage analysis.

CERTIFICATIONS

- [Microsoft Azure Fundamentals \(AZ-900\)](#), 2024
- [Professional Scrum Master I \(PSM-I\)](#), 2024

LEADERSHIP, VOLUNTEER & OTHER EXPERIENCE

- Volunteer: Learning for Charity, Ottawa – Held final exam prep session for MAT1320.
- Mentor: Member and VP Academics, uOttawa Software Engineering Students Association.
- Hackathons: Project submissions in uOttHack-5 & uOttHack-6 (e.g., Earthquake Disaster Management using Solace cloud).
- Content Creation: Educational & Travel content creation on YouTube ([Channel Link](#)).
- Designed and simulated circuits using Intel Quartus; developed Arduino-based models.
- Secured 3rd position in Organic Nomenclature Bee 2025.
