414 Tamrack Dr, Waterloo, N2L 4G6

PROFESSIONAL SUMMARY

Waterloo/Conestoga alumni with B.Eng. (Electronics & Communication), qualified Software Engineering, Project Management With Open Work Permit Valid up to August 2028

- **Engineering Expertise:** 3 years of experience in DevOps troubleshooting, firmware optimization, and scalable software design.
- **System Integration:** Skilled in PLC programming, hardware structure design, and root cause analysis for mission-critical systems.
- **Communication:** Proven ability to provide empathetic client support and detailed technical documentation in high-volume environments.
- **Goal:** Seeking to collaborate with a technical team where I can demonstrate analytical expertise and contribute to project success.

OPTIMIZED WORK EXPERIENCE

Technical Support and Crew Member | *Feb 2023 – To Present* (Eleven Foods Incorporated | Waterloo, Ontario Canada)

- Provided high-quality customer service in a fast-paced environment, consistently meeting performance metrics.
- Assisted customers with digital ordering systems, troubleshooting kiosk issues, app errors, and payment problems.
- Demonstrated strong multitasking, problem-solving, and conflict-resolution skills.
- Delivered clear communication while resolving customer concerns quickly and accurately.
- Maintained strong product and process knowledge to support customer inquiries.

Member of Technical Staff | R&D | *Sep 2021 – Jul 2022* (Mavenir Systems Pvt Ltd | Bangalore, India)

- **Cross-Functional Technical Support:** Orchestrated collaboration between QA, technical, and DevOps teams to drive root cause analysis and resolve critical technical issues, ensuring high availability of R&D systems.
- **Agile Project Management:** Executed sprint planning and issue tracking using Jira and Agile methodologies, producing precise technical documentation that streamlined development workflows.

- **Customer-Centric Troubleshooting:** Applied deep technical troubleshooting skills to resolve complex system escalations, mirroring the demands of high-volume customer support environments.

Software Engineering Technical Analyst | *Jul 2019 – Sep 2021* (Ribbon Communications | Bangalore, India)

- **System Integration & Development:** Engineered and optimized scalable communication modules (VoIP, SIP, SRTP) and real-time media systems, ensuring seamless integration within complex hardware/software structures.
- **DevOps Collaboration:** Partnered with DevOps and QA teams to debug deployment failures, optimize system performance, and accelerate the resolution of technical bottlenecks.
- **Scalable Engineering Practices:** Leveraged Kubernetes for container orchestration and Git for version control within Agile/Scrum/Kanban frameworks to deliver robust, scalable software solutions.

EDUCATION

Conestoga College | Waterloo, Ontario

Advanced Post-Graduate Diploma, Software Engineering Technician | *Apr 2024 – Dec 2024*

- **Full-Cycle Software Development:** Designed and developed applications using C, C#, JAVA, PYTHON, gained robust experience and knowledge in front-end and back-end implementations applying HTML and JavaScript
- **Systems Architecture:** Gained expertise in operating systems, hardware interaction, **virtualization**, and relational database management.
- **Cybersecurity & Infrastructure:** Integrated security protocols to protect software assets, focusing on modern cyber threats and infrastructure resilience.
- **Applied Engineering:** Prioritized a hands-on approach through rigorous technical problem-solving and project-based execution.

Conestoga College | Waterloo, Ontario

Post-Graduate Certificate, Information Technology Project Management | *Apr 2024 – Dec 2024*

- **Agile & Hybrid Methodologies:** Mastered Scrum and Kanban frameworks for software delivery, utilizing Waterfall techniques for comprehensive project control and scope management.
- **Risk & Resource Management:** Specialized in identifying and mitigating technical risks, resource allocation, and budgeting to ensure efficient project delivery.

- **Leadership & Communication:** Enhanced technical writing and presentation skills for effective stakeholder negotiation and cross-functional team leadership.

Visvesvaraya Technological University | Bangalore, INDIA

Bachelor of Engineering Electronics and Communication (accreditation by WES equivalent to Bachelors) | *Apr 2015 – Jul 2019*

- **Embedded Systems & Logic Design:** Specialized in the architecture of complex digital systems, utilizing microcontrollers (8051, ARM) and Verilog HDL for rigorous embedded system design and CMOS VLSI implementation.
- **Signal Processing & Communication:** Applied advanced mathematical models to Digital Signal Processing and image processing, while engineering solutions for wireless networks and optical fiber communication.
- **Hardware Analysis & Simulation:** Gained deep proficiency in network analysis and analog/digital circuitry, utilizing industry-standard tools like MATLAB, Xilinx, Keil, and PSpice for simulation and testing.
- **Capstone Engineering Project:** Bridged the gap between academic theory and industry application through a comprehensive final-year project, demonstrating full-lifecycle development from circuit design to final hardware integration.

TECHNICAL COMPETENCIES and SOFT SKILLS

- Technical: DevOps, Firmware Optimization, System Integration, PLC Programming, Root Cause Analysis, Scalable Software, Project Management, Technical Documentation, Client Support, Troubleshooting, Kubernetes, Jira, Git, Wireshark, CRM, ERP, Cisco VoIP / SIP / SRTP, Agile / Scrum / Kanban, C / C# / Java, MATLAB / Xilinx / Verilog, Windows OS, Linux, MacOS, Android Studio
- Soft skills: Communication, Time Management, Customer Support, Problem Solving, Multitasking

PROFESSIONAL CREDENTIALS

Certifications

Java Developer – NIIT, 2022

Projects

Jukebox System – GitHub: https://github.com/ashwinigunaga/Jukebox_NIIT

AWARDS AND HONOURS

Post-Graduate Certificate in IT Project Management

2025

Bachelors Graduate in Engineering

2019
