

N'CHAKA BENJAMIN

Web & Mobile Developer

njbenjamin.com - 819-576-1070 - nchaka.benjamin@protonmail.com

15+ years experience as a full-stack web developer working on various technologies. Proven expertise in front-end and back-end programming. A single-page application expert leveraging the MEAN stack and different frameworks across the industry. In-depth knowledge of JavaScript, Node.js, HTML5, CSS3, the MEAN stack, Python, PHP, SVG, XML, JSON, C programming and hybrid mobile development. University-certified and well-versed in Node.js, programming concepts and high-performance data-driven server-side web development. Quick learner, and exceptional adaptability to new technologies. Great interpersonal skills to maintain productive relations with technical and non-technical staff, customers, and the public.

TECHNICAL PROFICIENCY

Programming Languages

Front-End:	TypeScript, JavaScript, HTML5, CSS3, WebGL, Python, SVG, XML, XSL, XPATH, Java, Objective-C, JSON
Back-End:	JavaScript (Node.js), Ruby, PHP, Python, Perl, SQL, SQLite, MySQL, MongoDB (NoSQL), Java, Objective-C, C

Software & Utilities

Front-end:	React, Angular, AngularJS, VueJS, SASS (SCSS), LESS, Bootstrap, Jasmine, Selenium, Yeoman, Grunt, DevTools, jQuery, Underscore, Lodash, Three.js, Handlebars, Modernizr, Web Sockets, Web Workers, Velocity.js, Browserify, Webpack, RequireJS, Cordova, Redux, GraphQL
Back-end:	Express.js, Rails, Django, GitHub, Git, SVN (subversion), Wordpress, WP-Bakery, Lavarel, Symphony, FTP, Apache, NGinx, cPanel, OWASP ZAP, Node, Composer, PHP Unit, PEAR, PECL, SecureImage, MagickWand, PhpED, phpMyAdmin, HomeBrew, XDebug
Databases:	MySQL (XAMP Stack), Aurora (AWS), Cloud SQL (GCP), NoSQL (MEAN Stack), IndexDB, MongoDB

N'CHAKA BENJAMIN

Web & Mobile Developer

njbenjamin.com - 819-576-1070 - nchaka.benjamin@protonmail.com

Media:	Adobe Create Cloud Suite (Photoshop, Illustrator), GIMP
Editors & IDEs:	Visual Studio Code, VIM, Emacs, Eclipse, Atom, Sublime Text, TextWrangler, Notepad++, Xcode, Android Studio
General:	Firebase, Git, Wordpress, MEAN Stack, XAMP Stack, CLI, Ansible, Google Cloud Platform, AWS (EC2-S3), Docker, Heroku, Kubernetes, VMWare Fusion, VirtualBox, Google Analytics, RESTful API (REST), Shopify, Tomcat, PostgreSQL, Hadoop, Hive and Amazon Redshift, Apollo
Office:	Microsoft Office, Open Office, Pages, Numbers, Acrobat
Business:	FileMaker, Slack Bot, BiTrix, Facebook, Twitter, JIRA, BitBucket
Platform:	Android, iOS, Mac, Linux, Windows

Paradigms

Languages:	Hybrid Mobile Web App Development, Responsive Design & Programming, OO Programming, Modular Development, Database Scalability & Logical Design, Web App Security & E-commerce, Google API, Google Cloud Platform, AWS, Agile Development (SCRUM), JavaScript unit testing with Jasmine, RESTful API
Tools:	RDBMS, CMS, CRM, Hybrid Mobile App Development (iOS/Android), Business API Integration, Containers, Data visualization libraries, CI build environment, Version Control, Hypervisor Technology
Techniques:	Video Editing, Multi-media equipments, Unit Testing, Caching, Offline Web Apps, SPAs, Geolocation, Ajax, UX, Payment APIs, Responsive Programming, Web Services, Web App Security (OWASP), E- Commerce, Agile Development, Cross-platform debugging, Cross-browser, QA, DOM, BOM, SAAS (Software as a Service)

PROFESSIONAL EXPERIENCE

Full-stack Web Developer

Independent Contractor, Ontario 2017 - to present (5+ years)

Worked on various projects for different companies such as [Cisco \(HTG\)](#), [FieldFLEX](#), [Microsemi](#), [Marketing-BreakThroughs](#), [CybernetIQ](#), [Publivate](#). Proactively work on feature-rich single-page applications, hybrid mobile apps, and high-performance web apps:

- Work on existing code base using Node.js, Webpack, Express.js, Handlebars, and ES6
- Integrate asynchronously MongoDB functionalities
- Devise hybrid mobile apps (iOS, Android) using Cordova, Ionic
- Develop Java-based solutions
- Document application-level module interactions in Confluence
- Document at a detailed level user experience and components
- Program Java modules with various capabilities
- Build WordPress parent and child themes
- Build and maintain WordPress plugins
- Develop, integrate and deploy data-driving functionalities
- Build and design single-page applications (SPAs)
- Create and maintain hybrid mobile applications
- Fully responsive web app from design to programming
- Continuous integration, development and software delivery
- Parsing packets, network traffic, and reports
- Building interactive charts
- Process, store and deliver various forms of data using NoSQL
- Maintain the CLAW application security standards
- Develop, integrate, design, and manage user accounts and session functionalities
- Develop the CLAW application networking and interoperability
- Ensure code quality, performance, and maintainability

Software utilized: Atom, Illustrator, Docker, Visual Studio Code, Azure, Git, Ubuntu

Written in: JavaScript, HTML5, CSS3, SQL, JSON, PHP8, C, Java, Objective-C, MSSQL, SASS, NoSQL

N'CHAKA BENJAMIN
Web & Mobile Developer

njbenjamin.com - 819-576-1070 - nchaka.benjamin@protonmail.com

Full-stack Web Developer

AppChamber, Ontario 2015 - 2017 (2 years)

Organically built all aspects of the Krabs TG web app, encompassing design and programming (front-end, back-end, database, server). See more at [AppChamber](#) dev space (the login is disabled):

- Programmed with pure JavaScript
- Created a smooth, unified and rich user interface
- Hand-coded the application from the ground up
- Devised an SQL relational and logical database recording user data via their credentials i.e. user profile
- Used an SPA architecture for the entire web app
- Integrated a real-life payment processing API
- Created over 20 custom virtual items
- Vector-based web app (SVG and Unicode characters only)
- Integrated within Google Cloud Platform (uses the same infrastructure which powers Google)
- Fully responsive web app from design to programming (minimal response time between pages)

Software utilized: Atom, Illustrator, Docker, OWASP ZAP, Nginx, GCP, AWS, Git, Node.js

Written in: JSON, JavaScript, HTML5, CSS3, SVG, SQL, PHP7

Senior Web and Mobile Developer

TVO, Ontario 2015-2016 (6 months)

Built 2 highly interactive single-page application tutorials using AngularJS.

Tutorial #1: Rates Ratios and Proportions

Tutorial #2: Writing the Equation of Lines

Team player in a staff of over 3 developers, math teachers, system admins et al. The designer provided all assets, allowing the SPA developer to bring everything to life and the Media Specialist created a JSXGraph widget which in turn will need to be integrated, modified or corrected before making it part of the web app:

- Used and created Homework Help pre-build templates and hard-coded the front-end aspect
- Created a highly interactive Ratio Tool JavaScript module as an AngularJS directive
- Created the Percentage Tool widget as an AngularJS directive
- Implemented a set of complex features while developing the web app

N'CHAKA BENJAMIN
Web & Mobile Developer

njbenjamin.com - 819-576-1070 - nchaka.benjamin@protonmail.com

- Responsive programming
- Bug fixes in existing custom-written templates

Software utilized: Notepad++, Grunt, Node.js, Bower, Selenium, JSXGraph, Yeoman, AngularJS, Git
Written in: JSON, JavaScript, HTML5, SASS

Web Developer and Designer

World Class Promo, Ontario, 2012 - 2015 (3 years)

Carefully crafted and entirely built from the ground up, the WCP website has proven itself as an invaluable asset within the company. In a nutshell, the following tasks were performed at WorldClassPromo.ca (the actual site underwent some minor visual changes since I created it):

- Hand-coded all front-end using HTML5/CSS and JavaScript
- Devised an SQL relational and logical database design in MySQL
- Deployed an XML database for importing products from FileMaker 12
- Integrated a custom build CMS using PHP for ease of use and maximum efficiency
- Site-wide optimization for fast downloads, even on baseband internet connections
- Created custom graphics such as WCP logo and much more
- Created an Ajax version for the entire user front-end
- Implemented an enterprise search functionality
- Integrated professional design principles such as usability, appearance, and compliance (valid codes to ensure the longevity of web applications)

Software utilized: jQuery, Dreamweaver, Photoshop, MySQL, GitHub (private repo)
Written in: HTML5, CSS3, JavaScript, PHP, SQL, XML

Front-End Developer

Manwin (now called MindGeek), Montreal, 2011-2012 (1 year)

Integrated and improved several daily tasks from other IT professionals working as a team ManWin.com:

- Integrated design structures and document contents using advanced HTML5
- Integrated site-wide layout using advanced CSS3
- Deployed websites using open-source MVC architectures
- Systematic updates using an SVC framework

N'CHAKA BENJAMIN
Web & Mobile Developer

njbenjamin.com - 819-576-1070 - nchaka.benjamin@protonmail.com

- Mobile-friendly integrations
- Optimized web pages for fast delivery
- Created high-performance web pages

Software utilized: PHP NuSphere ED, Adobe Photoshop, PNGCrush

Written in: XHTML, HTML5, CSS2, CSS3, JavaScript, jQuery

Freelance Web Developer/Designer

2008-2011 (3 years)

Designed, and hand-coded several projects using XHTML, CSS2.1, XML, XSL, JavaScript, Perl, PHP and SQL, WordPress.

ACHIEVEMENTS

Web and Mobile Online Portfolio - 2022

Actively maintaining several projects on the web and mobile platform.

Desta Black Youth Network - 2011

Revamped and developed Desta Black Youth Network website.

ALS Plane Pull - 2012

Developed a website to ease ALS Canada in gathering \$20,000 for Amyotrophic lateral sclerosis patients in Canada.

Darfur Sudan Peace Network - 2010

Designed a website template to assist the NGO in communicating more efficiently throughout their network.

ASSETS

Fully bilingual i.e. Highly proficient in English and French (spoken and written).

GROUPS

O'Reilly School of Technology Alumni Group

2012 to Present

O'Reilly has been spreading the knowledge of innovators for close to 30 years. With an academic approach to publishing, trend spotting, research, and conferences, O'Reilly has gathered and distributed the information needed for innovation, helping to drive the development of the Internet as we see it today. Currently focused on user-driven applications for the web, O'Reilly is now defining the new age of Internet through the phenomenon coined "Web 2.0" by Tim O'Reilly. Developers and companies the world over look to O'Reilly as a leader and friend to help lead them through the ever-changing landscape of technology.

Now, O'Reilly is putting its reputation to work for you. The O'Reilly School of Technology was built as a place to give aspiring programmers and administrators like you a ladder into the Information Technology and Systems industry. With unique, online, hands-on courses leading to certification from the world-famous University of Illinois, OST will help you gain an edge in your career -- on your own time, at your own pace. When you have completed our courses, you will not only have certification, but you will also have a portfolio of completed projects to show for your effort.

ACADEMIC TRAINING

Computer Science - BSc

University of London, UK, 2022-2027

JavaScript Programming - Certification

O'Reilly School of Technology, California, 2015

Server-Side Web Programming - Certification

University of Illinois Urbana Champaign (via OST),
Illinois, 2014

Client-Side Web Programming - Certification

University of Illinois Urbana Champaign (via OST),
Illinois, 2010
