ABOUT

Senior Full-Stack Developer with 9+ years of experience, I specialise in the lifecycle of web and mobile applications. My expertise lies in Angular.js, React.js, Node.js, MongoDB, GraphQL, AWS, and Docker. I've led projects for clients like Nagwa Boutique.

In my role, I research and analyse applications to meet business needs, develop technical specifications, and ensure successful deployment and user adoption. I collaborate with stakeholders and teams to deliver projects and adapt to emerging technologies, aiming to optimise digital infrastructure.

EXPERIENCE

Dpro, Riyadh — Full-Stack Developer

SEP 2024 - PRESENT | dpro.sa

Easy Gifts, Riyadh — Full-Stack Developer

DEC 2018 - AUG 2024 | nagwaboutique.com

AppBakerz, Karachi — Associate Eng.

JAN 2016 - JAN 2018 | appbakerz.dev

EDUCATION

Ilma University, Karachi — Bachelor's (Computer Science)

SEPT 2012 - DEC 2017 | ilmauniversity.edu.pk

Al Shavi, Madinah — Intermediate

JUN 2010 - MAR 2012 | darulhijrahschool.com

SKILLS

- Full-Stack Development
- Serverless Architecture Implementation
- User Interface Design
- Database Management
- Analytics and Reporting
- A/B Testing
- Inventory Management
- Automated Delivery Systems
- Social Media Pixel Integration
- Cloud-Based Server Management
- API Integration
- Continuous Integration and Delivery
- Agile/Scrum Methodologies
- E-commerce Platform Development
- Mobile Application Development
- Solution Analysis & Evaluation
- Technical Requirements Engineering
- Business Requirements Translation
- Stakeholder Collaboration
- Deployment Oversight
- Cross-Functional Teamwork
- Training & Handover
- Emerging Technologies Adaptation

TOOLS & TECHNOLOGIES

- AWS Lambda
- API Gateway
- React.js
- PostgreSQL
- Metabase
- Firebase
- Google Analytics

EXPERIENCE DETAILS

Dpro, Riyadh — Full-Stack Developer

SEP 2024 - PRESENT | dpro.sa

- Designed and deployed AI-powered conversational platforms (chat and voice) to automate customer service in Arabic and English, reducing human intervention time and improving response speed.
- Developed and optimised a React. JS-based admin dashboard for clients to manage conversations, customer profiles, and AI training data, improving operational control and client satisfaction.
- Leveraged Google Analytics, Firebase, and A/B testing to optimise AI dialogue flows, enhance user engagement, and increase automation success rates.
- Developed multi-channel integration (WhatsApp Business API, Facebook Messenger, website chat widgets) to unify customer communication across platforms.
- Automated SMS notifications for conversation follow-ups and missed call alerts using msegat, increasing re-engagement rates.
- Implemented Google Tag Manager to track AI chatbot and voicebot performance, optimising marketing attribution and campaign ROI.
- Conducted in-depth solution research and vendor comparisons for AI voice technology, speech-to-text accuracy, and language processing, ensuring optimal tool selection for Arabic/English support.
- Translated complex business needs into clear technical requirements for developers, ensuring precise execution and alignment with client goals.
- Collaborated with cross-functional teams (sales, product, engineering) to launch new AI features, ensuring smooth deployments and high adoption rates.
- Provided training sessions and technical handovers for client IT teams to maintain and fine-tune AI systems.
- Stayed ahead of industry trends by researching advancements in AI, NLP, and voice technologies, integrating relevant improvements into DPro's offerings.

Easy Gifts, Riyadh — Full-Stack Developer

DEC 2018 - AUG 2024 | nagwaboutique.com

- Implemented serverless architecture with AWS Lambda and API Gateway, achieving cost-efficiency and scalability.
- Developed a React.js dashboard for enhanced customer interaction with profiles, orders, and payments, boosting satisfaction and retention.
- Managed PostgreSQL database; integrated with Metabase for analytics, creating custom queries for business insights.
- Utilised Firebase and Google Analytics for user tracking and engagement; conducted A/B testing for website optimisation.
- Managed inventory and orders with Zoho, automating processes and generating reports for strategic decision-making.
- Deployed Tookan for delivery automation, integrated with msegat for SMS notifications, enhancing delivery efficiency and customer loyalty.
- Integrated social media pixels using Google Tag Manager, optimising ad performance, and increasing web traffic and conversions.
- Researched ideal solutions to meet business needs, evaluating existing

- Zoho
- Tookan
- msegat
- Google Tag Manager
- React-Native
- Kaltura API
- Firestore
- MongoDB
- MYSQL
- AngularJS
- NodeJS
- ExpressJS
- MeteorJS
- SASS
- jQuery
- Golang
- Docker Hub
- Apollo-Client
- Apollo Server (GraphQL)
- AWS
- DigitalOcean
- Ionic
- LinkedIn (Jobs)
- n8n
- WordPress

PROGRAMMING LANGUAGES

- Hindi (Intermediate)

applications for suitability.

- Analysed potential solutions, creating comparison sheets to detail strengths, weaknesses, and recommendations.
- Crafted technical requirements for in-house development when pre-existing solutions were inadequate.
- Translated business requirements into technical specifications for developers, ensuring clarity and actionability.
- Collaborated with stakeholders to refine project goals and technical details as needed.
- Oversaw deployment processes, ensuring smooth implementation and fostering user adoption.
- Partnered with cross-functional teams to deliver projects from concept to implementation successfully.
- Facilitated training and handover to IT operations teams, ensuring seamless transition and system maintenance.
- Continuously learned and adapted to emerging technologies, seeking opportunities to enhance digital infrastructure.

AppBakerz, Karachi — Associate Eng.

JAN 2016 - JAN 2018 | appbakerz.dev

- Built web and mobile applications using NodeJS, ExpressJS, and MeteorJS frameworks
- Designed and developed a dashboard and web apps using SASS and jQuery, increasing user engagement by 25%
- Built a high-performance server using Golang and integrated it with the MongoDB database, handling over 10,000 requests per day
- Developed MEAN-Stack projects using MongoDB, ExpressJS, AngularJS, and NodeJS technologies

EDUCATION DETAILS

Ilma University, Karachi — Bachelors (Computer Science)

SEPT 2012 - DEC 2017 | ilmauniversity.edu.pk

- I graduated with a four-year degree in computer science.
- I specialise in artificial intelligence and software engineering, gaining in-depth knowledge and practical skills in machine learning, natural language processing, computer vision, and software development.
- Completed various courses related to mathematics, algorithms, data structures, and programming languages, such as Calculus & Linear Algebra, Human-Computer Interaction, Artificial Intelligence, Java, Python, and C++.
- Worked on several academic projects and extracurricular activities that demonstrated my ability to apply computer science concepts and techniques, such as developing a chatbot using natural language processing, creating a web application using HTML, CSS, and JavaScript, and joining a coding club where I participated in coding competitions and hackathons.

Al Shavi, Medinah — *Intermediate*

JUN 2010 - MAR 2012 | darulhijrahschool.com

- Completed a two-year intermediate program with a focus on computer science as my core subject.
- Learned the fundamentals of programming languages such as C, Java, and Python, and developed basic applications using CMD/Terminal.
- Demonstrated my interest and aptitude in computer science by achieving high grades and participating in school projects and competitions.

PROJECTS DETAILS

Habib Farooq— *Portfolio* | habibfarooq.com

A sleek, multilingual personal website built on WordPress, designed to present full-stack development expertise and professional services. Featuring English, Arabic, and French interfaces, it includes sections for About, Projects, Services, and Contact, allowing visitors to explore capabilities and get in touch easily.

Nagwa Boutique— *Curated Gifting App* | nagwaboutique.com

A sophisticated gifting platform designed to streamline the gift-giving experience. Developed using a robust stack including NestJS, Next.js, PostgreSQL, and ReactJS, this application offers a curated selection of gifts, ensuring a personalised and memorable experience for each user.

MysteryIn— *Social App* | mysteryin.com

Dive into the ultimate booking experience with MysteryIn, your go-to social app for finding and reserving the finest hotels and restaurants. With a user-friendly interface and a vast array of options, MysteryIn makes it easy to plan the perfect stay or dining experience.

Watheq— *Government Pedia* | watheq.gov.io

Embark on a journey through time with Watheq, the definitive online portal for exploring the rich tapestry of history. This comprehensive website showcases a vast collection of historical content, images, and artefacts, allowing users to delve into the past and discover traditional treasures.

FlyUs— *Social App* | flyusvip.com

A premier social app for effortless online flight bookings. This platform connects you to a world of destinations, offering a seamless and social way to plan your air travel.

YallaMsheena— *Sports Application* | [Play Store](https://play.google.com/store/apps/details?id=com.yallamsheena)

Transform steps into rewards, the sports application that motivates your fitness journey. Track your activity, earn points for every step, and redeem them for exclusive gifts and offers.

CoachYou— *Coaching Portal* | coachyou.co

The premier online coaching portal. This platform offers personalised video

conferencing and easy coach booking to help you achieve your career goals. Whether you're seeking to build skills or elevate your professional life.

Sekal — E-Scooter | [Play Store](#)

Navigate the city with ease using Sekal, the dynamic E-Scooter app. Our platform offers a convenient and eco-friendly way to book and ride scooters, transforming urban mobility. With just a few taps, you can locate, reserve, and enjoy a ride on our electric scooters.

EasyGifts — E-Commerce | [PlayStore](#) | [AppStore](#)

Discover the joy of giving with EasyGifts, the e-commerce platform that simplifies the art of gifting. Whether you're near or far, EasyGifts offers a diverse range of presents for every occasion, ensuring your loved ones receive the perfect gift. With a user-friendly dashboard and a sleek website, gift selection and delivery are just a tap away. Experience the convenience of modern gifting with EasyGifts.

Niniwei — E-Commerce

Experience the future of online shopping with Niniwei, an e-commerce platform that seamlessly integrates web and mobile apps. Developed with MeteorJS and AngularJS, and utilising Ionic for a superior phone application experience, Niniwei offers a streamlined shopping journey from browsing to checkout. Dive into a world where convenience meets style with Niniwei.

Hilal — Social App

Step into the world of Hilal with a dedicated social app, a central hub for fans to watch the latest matches, get acquainted with the team, and follow their favourite players' life events. Hilal brings the excitement of the game and the stories of the players.

Payroll — Business App | payroll.netlify.com/#/dashboard

Streamline your business's payroll process with the serverless automated payroll management system. Designed to efficiently manage employee payslips based on their working hours, our application ensures accuracy and ease in handling payroll tasks. Experience hassle-free payroll management at AppBakerz's Payroll.

Arrive Safe — Safety App | [Play Store](#)

Ensure your safety and peace of mind with Arrive Safe, the user-tracking application designed to detect accidents and swiftly call for emergency services. Whether you're out for a jog or on a long drive, Arrive Safe stands as a vigilant guardian, ready to connect you with help from emergency responders or notify your family members at a moment's notice.

TECHNICAL SKILLS

Languages & Scripting: JavaScript (ES6+), TypeScript, Golang, SQL, HTML5, CSS3, SASS

Frameworks & Libraries: Node.js, Express.js, Next.js, React.js, React Native, AngularJS, MeteorJS, Ionic, jQuery, Apollo Client, Apollo Server (GraphQL)

Databases: PostgreSQL, MongoDB, MySQL, Firestore

CMS & Platforms: WordPress, Kaltura API

Cloud & DevOps: AWS, DigitalOcean, Docker Hub

Workflow Automation & Tools: n8n, Google Tag Manager, Zoho, Tookan, msegat, Firebase, Google Analytics, Metabase

ADDITIONAL TOOLS (Proficient in):

- Canva
- Adobe Photoshop
- Adobe Illustrator
- PDF Editors
- Microsoft Office Suite (Word, Excel, PowerPoint, Outlook)
- Google Workspace
- Google Admin
- Microsoft Admin
- Microsoft SharePoint
