

Laxmishree

.Net Full Stack Developer

2263401641

laxmishreehs25@gmail.com

PROFILE SUMMARY

.NET Full Stack Developer with **7+ years** of experience in designing, developing, and deploying scalable web and enterprise applications using **C#, ASP.NET MVC/Core, Web API, Entity Framework**, and **SQL Server**. Strong expertise in full stack development with modern JavaScript frameworks including **Angular** and **Vue.js**, along with responsive UI design using **HTML5, CSS3, and Bootstrap**. Proven experience working in **Agile/Scrum** environments, implementing **RESTful** and **SOAP** services, and following best practices across the **SDLC**. Hands-on experience with cloud platforms such as **AWS** and **Azure**, CI/CD pipelines using **Jenkins, Azure DevOps**, and automated testing with **NUnit** to deliver high-performance, secure, and maintainable solutions.

RELEVANT SKILLS

- **Programming Languages:** C#, VB.Net, C++, PL/SQL, XML, TypeScript, JavaScript
- **Web & UI Technologies:** HTML5, CSS3, XHTML, XML, XAML, JSON, AJAX, Bootstrap, Angular, AngularJS, ReactJS, Redux, Node.js, Express.js, Knockout.js, Backbone.js, D3.js
- **Frameworks & Libraries:** .NET Framework (1.0–4.8), ASP.NET, ASP.NET MVC (3–5), Web API, ADO.NET, WCF, Entity Framework, Spring, Hibernate, Dust.js
- **Databases:** SQL Server, Oracle, MySQL, PostgreSQL, Sybase, MongoDB, Redis
- **Cloud & DevOps:** Azure, AWS, CI/CD (Jenkins, Azure DevOps, Octopus Deploy), Docker
- **IDE & Development Tools:** Visual Studio (2010–2022), SQL Server Management Studio, Visual Studio Code
- **Version Control:** Git, TFS, SVN, Visual SourceSafe
- **Protocols & Web Services:** HTTP, TCP/IP, FTP, SOAP, REST
- **Reporting & Testing Tools:** SSRS, Crystal Reports, NUnit, Coded UI, Postman
- **Design & Modeling Tools:** MS Visio, UML 2.0
- **Database Tools:** TOAD, SQL Developer, DB Artisan, SSMS
- **XML Technologies:** DOM, SAX, JAXP, JAXB, XML-RPC, XML Beans

RELEVANT EXPERIENCE

Capital One, Toronto, Ontario, Canada

Apr 2025 – Current

.net Full Stack Developer

- Designed and developed **scalable web and enterprise applications** using **C#, ASP.NET MVC/Core, Web API, Entity Framework, WCF, and .NET Core**, implementing client-side and server-side validation, session management, and efficient data access.
- Developed **rich front-end solutions** using **Angular (1.x/2+), ReactJS, Redux, HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX, and JSON**, consuming RESTful and SOAP services.
- Built and optimized **backend services and APIs**, including **REST/Web API, SOAP, and microservices**, with integration to **SQL Server, Oracle, MySQL, DynamoDB, MongoDB, and RavenDB**, ensuring high performance and scalability.
- Implemented **CI/CD pipelines and DevOps practices** using **Jenkins, Docker, Docker Compose, Kubernetes, AWS S3, Cloud Foundry, CodeEnvoy, BitBucket, and Nexus** for automated builds, deployments, and cloud migration.
- Designed and delivered solutions using **SignalR, NServiceBus, RabbitMQ, WebSphere MQ**, and Elasticsearch on top of SQL Server for advanced search capabilities.
- Worked on **full SDLC lifecycle** in **Agile/Scrum environments**, including requirement analysis, design, development, testing, deployment, and post-production support.
- Migrated legacy applications to **cloud platforms (AWS, Azure)** and implemented microservices architecture with **Spring Boot, Java, Maven, MongoDB** to enhance modularity and scalability.

- Conducted **performance tuning, debugging, and optimization** for SQL and PL/SQL queries using **EXPLAIN PLAN, Auto Trace, DBMS Profiler**, ensuring high availability and reliability of applications.

Ciena, Toronto, Ontario, Canada

Feb 2024 - Mar 2025

.net Full Stack Developer

- Developed **full stack applications** using **C#, ASP.NET MVC, Web API, Entity Framework, Angular, ReactJS, HTML5, CSS3, JavaScript, jQuery, AJAX, and JSON**, implementing front-end components and consuming backend services.
- Designed and implemented **RESTful and SOAP services**, integrating with **SQL Server, Oracle, MySQL, DynamoDB, MongoDB**, and performing database optimization and data processing.
- Implemented **client-side and server-side validation, session management, and secure data access** in web and Windows applications using **.NET Framework 4.x and WinForms**.
- Worked on **Agile/Scrum teams** following SDLC, including unit testing, debugging, and code reviews using **NUnit, Coded UI, and Visual Studio Test Explorer**.
- Built and deployed applications in **cloud environments (AWS, Azure)**, integrating **Docker, Jenkins, CI/CD pipelines, and automated deployment tools** for efficient release management.
- Developed **microservices and messaging solutions** using **NServiceBus, RabbitMQ, WebSphere MQ**, and integrated **Elasticsearch** for advanced data search and analytics.

Manappuram Finance Limited, Mumbai, India

Jul 2022 - Oct 2023

Senior Software Engineer

- Designed, developed, and maintained **enterprise-level web applications** using **C#, ASP.NET MVC/Core, Web API, .NET Framework 2.0-4.5, .NET Core 2.1**, implementing server-side and client-side validations, session management, and business logic with **ADO.NET and Entity Framework**.
- Developed **rich front-end interfaces** using **ReactJS, Redux, Angular, AngularJS, HTML5, CSS3, JavaScript, jQuery, and JSON**, consuming RESTful APIs and implementing dynamic functionality for multiple modules.
- Built and optimized **RESTful services and Web APIs** with proper **JSON data formats, versioning strategy**, and integrated them with **SQL Server, Oracle, and other relational databases**, ensuring high performance and scalability.
- Worked extensively on **database performance tuning and optimization**, using **T-SQL, PL/SQL, bulk collect, explain plan, SQL*Trace, table partitioning, and query optimization** for improved application efficiency.
- Implemented **CI/CD, cloud deployment, and production support** using **Azure, SSIS** for data integration, **SSRS** for reporting, and ensured end-to-end SDLC execution following **Agile/Scrum and Kanban methodologies**.
- Led **code reviews, unit testing, debugging, and integration testing** using **NUnit, Visual Studio Test Explorer**, ensuring code quality, maintainability, and compliance with enterprise standards.

ICICI Direct, Mumbai, India

Mar 2020 - Jul 2022

.net Developer

- Designed and implemented **reusable web UI components** using **Angular 4.x, TypeScript, HTML5, CSS3, Bootstrap, Node.js**, with **NGRX store state management** for scalable front-end architecture.
- Developed **full stack solutions** using **C#, ASP.NET MVC/Web Forms, Web API, WCF, ReactJS/Redux**, integrating **Materialize CSS, AJAX, JavaScript, and JQuery** for dynamic and interactive user interfaces.
- Built and optimized **backend business logic and data access layers** using **ADO.NET, Entity Framework, SQL Server**, including stored procedures, triggers, functions, and packages, with strong focus on performance and security.
- Implemented **unit testing and code quality practices** using **NUnit and Re-Sharper**, performed debugging, and used **Fiddler** to capture HTTP traffic for troubleshooting and validation of web services.
- Participated in **Agile/Scrum development cycles**, including requirements gathering, system design, sprint planning, and iterative delivery, while consuming **third-party APIs** and developing **.NET Core 2.1 Web APIs** for web applications.

.net Developer

- Developed and maintained **front-end modules** using **ReactJS, Redux, AngularJS/Angular, HTML5, CSS3, Bootstrap, Node.js**, integrating with backend services through **RESTful and SOAP APIs**.
- Designed and implemented **business logic and data layers** using **C#, ASP.NET MVC/Web Forms, WCF, Web API, ADO.NET**, ensuring secure session management, encryption, and PDF rendering where required.
- Created and optimized **database objects** including stored procedures, triggers, and functions in **SQL Server**, ensuring efficient data processing and application performance.
- Developed **Web APIs in .NET Core 2.1**, consumed third-party APIs for business processes, and implemented client-side validations using **JavaScript, JQuery, and AJAX**.
- Worked in **Agile/Kanban environments**, actively participating in daily scrums, sprint planning, reviews, and retrospectives while performing unit testing, debugging, and code integration.

Godrej & Boyce, Mumbai, India

Apr 2018 - Sep 2019

Software Developer

- Developed **enterprise web applications** using **C#, ASP.NET Web Forms/MVC, .NET Framework 4.5, Web API, and ADO.NET**, implementing client-side and server-side validations, event-driven logic, and session management.
- Built **responsive and dynamic UI components** using **Angular 6, AngularJS, HTML5, CSS3, JavaScript, jQuery, and NGRX**, integrating with backend services and consuming **RESTful APIs**.
- Designed and implemented **SOA-based architecture** for event-driven workflows using **RabbitMQ, NServiceBus**, and managed bulk document storage and retrieval via **Dropbox API integration**.
- Developed and optimized **database layers** with **SQL Server and Oracle**, creating stored procedures, functions, and packages, while leveraging **NoSQL databases** like **MongoDB and Elasticsearch** for scalable data handling.
- Participated in **full SDLC and Agile methodologies**, including requirements analysis, UI and business layer design, coding, unit testing, debugging, and production support for mission-critical enterprise applications.

EDUCATION DETAILS

- **Masters in Computer Science Application from CPGS, OUAT, India (2013 - 2016)**
