

Mohammad Fozlul Haque Bhuiyan

MASc in QSE & Certified (CTFL, ATTA, UFT, LR, ALM) Automation Developer

114 Longshire Circle, Nepean, ON K2J 4K8, Canada | Status: Canadian Citizen

Cell: 514 778 6856 | Email: fozlul@gmail.com | LinkedIn: www.linkedin.com/in/fozlul/

Objective

Seeking a challenging position in Software Quality Assurance based on a strong analytic, programming, and team development background.

Key Strengths

- 10+ years of QA experience in software and telecom with deep understanding of SDLC, STLC, ATLM, and DevOps.
- Performed functional, performance, API, and BPT testing of Desktop, Firmware, Web and Mobile applications including test case design, test data preparation, script development, bug tracking, and reporting.
- Experienced in planning, defining test automation strategies, implementing automation frameworks, creating function libraries, object repositories, recovery scenarios and custom reporting.
- Experienced in ALM/TestRail administration including workflow customization, ALM OTA and excel macro development, legacy script migration, versioning, and baselining.
- Experienced in Jenkins/GitLab administration including CI/CD pipeline design with staging, parallel testing, cross browser testing, reporting, and connectivity with ALM and TFS.
- Self-motivated, active learner, detail-oriented, quality team builder and focused on continuous improvement.

Professional Certification

- | | |
|--|------------------|
| ▪ Hyper-V
John Abbott College, Groupe: 900-093-EQ, Student ID: 1998051 | Apr. 2019 |
| ▪ ISTQB Advanced Level - Technical Test Analyst (TTA)
Canadian Software Testing Board (CSTB), License: 3743913-212018CAN | Dec. 2018 |
| ▪ Virtualization VMware
Collège de Maisonneuve, Groupe: 80785 | Dec. 2018 |
| ▪ LoadRunner Certified Professional
Hewlett-Packard, Learner ID: PL72508565 (Registration ID: 311735850) | Mar. 2017 |
| ▪ ALM Certified Professional
Hewlett-Packard, Learner ID: PL72508565 (Registration ID: 299396561) | Jun. 2016 |
| ▪ Unified Functional Testing Certified Professional
Hewlett-Packard, Learner ID: PL72508565 (Registration ID: 283825641) | Jun. 2015 |
| ▪ ISTQB Certified Tester Foundation Level (CTFL)
Canadian Software Testing Board (CSTB), License: 3743657-20115CAN | Mar. 2015 |

Education

- | | |
|--|-------------------------------|
| ▪ MASc in Quality Systems Engineering (QSE)
Concordia University, Montreal, Quebec, Canada
CGPA: 4.12 | Sept. 2009 – Aug. 2011 |
| ▪ BSc in Electronics and Computer Science (ECS)
Jahangirnagar University, Dhaka, Bangladesh
Merit Position: First Class First | Jan. 1998 - Feb. 2003 |

Technical Skills

- **Programming Language:** C/C++, Java, JavaScript, Python, VBScript, PowerShell, and Linux Shell Scripting.
- **Database Programming:** Apache Hive, Hadoop, Oracle, PL/SQL, MS SQL, MySQL, MS-Access, GraphQL.
- **Web Programming:** XML, HTML, CSS, Cookies, JQuery, PHP, WSDL, SOAP and REST API.
- **Development Tools:** Eclipse, IntelliJ, PyCharm, Android Studio, Microsoft Visual Studio.
- **Testing Tools:** UFT, UFT Mobile, Postman, SoapUI, LoadRunner, JMeter, Selenium WebDriver, TestNG, Appium.
- **Test/Defect/Build Management:** ALM, TestRail, JIRA, TFS, Jenkins, Git, Bitbucket, Maven.
- **Public/Private Cloud:** AWS, VMware vSphere ESXi, vCenter, VMware Workstation, MS Hypervisor, Docker.
- **Access Control System:** Software House CCURE, Genetec Security Center, Lenel OnGuard, Keyscan Aurora, AMAG Symmetry, and OpenOptions dnaFusion.
- **Operating System:** Windows, Windows Server, Linux RedHat/Fedora/Alpine, Unix.

Professional Experience

❖ Principal QA Developer

Mar 2020 – Nov 2025

BioConnect, Toronto, ON, Canada

▪ Responsibilities:

- Establish and evolve formal QA processes, ensuring that the quality team is using industry-leading best practices.
- Involve in all aspects of BCE desktop application, BCID Mobile app (iOS and Android), and MedixSafe Firmware testing including developing new tools and processes to ensure quality standards are met.
- Develop and enhance test automation suites and implement CI/CD processes for the enterprise grade access control applications.
- Develop test harnesses to enable faster test cycles physical access control applications to mimic hardware interactions.
- Act as a bridge between the development and tech services team by triaging, analyzing and putting corrective measures around customer issues.
- Execute test cases, scripts, plans and procedures across multiple platforms including web, mobile (iOS, Android) and physical access control applications.
- Work closely with product, development and management teams to scope, plan and execute successful QA cycles.

❖ Analyst Testing & Automation Architecture

May 2019 – Dec 2019

Canadian National Railway (CN), Montreal, Quebec, Canada

▪ Responsibilities:

- Participating in the analysis to assess automation feasibility of in-house and outsourced applications.
- Participating in automation requirements gathering, analysis, and work estimation.
- Planning, defining automation strategies and solutions through business, functional and technical expertise.
- Designing and implementing testing framework, function libraries, recovery scenarios for various applications.
- Implementing or supervising the design and implementation of automation framework in UFT or Selenium.
- Reviewing and Optimizing complex SQL queries, Hive queries to improve script execution performance.
- Assisting in utilizing efficient processes and standards in order to continuously improve the test automation service.
- Reports on automated test execution status and communicate progress with SMEs.

❖ **Senior Test Automation Developer**

May 2016 – May 2019

Insurity (Oceanwide Inc.), Montreal, Quebec, Canada

▪ **Responsibilities:**

- Work closely with BAs, Developers and DevOps team to successfully execute a product roadmap.
- Ensure Jenkins CI/CD test execution, resolve issues, and communicate CI execution results with stakeholders.
- Maintain testing infrastructure, keep testing tools sync on VMs with the latest release.
- Maintain and enhance existing automation framework, function library, custom Add-in, and reporting module.
- Enhance script development process by innovating new ideas and techniques in existing automation frameworks.
- Develop automated scripts and peer review newly developed scripts for GUI, API and Performance testing.
- Initiate tool improvement, design and develop new automation frameworks to aid in QA and UAT testing.
- Supervise and support offshore automation developers on scripting, debugging, and resolving framework issues.
- ALM server administration, project customization, workflow customization, and user management.
- Participate in sprint planning and provide QA estimates for test automation.

❖ **Intermediate Test Automation Developer**

Aug. 2015 – May 2016

Oceanwide Inc., Montreal, Quebec, Canada

▪ **Responsibilities:**

- Analyze, develop, debug, execute and maintain automated test cases within the testing environment.
- Ensure complete execution of automated script for all software releases and communicate results with stakeholders.
- Maintain automation scripts to account for functionality changes, defect fixes and workarounds.
- Migrate legacy script from old ALM to the new ALM server and resolve any compatibility issues.
- Discuss task dependencies, priorities and time estimates for automation projects with team lead.
- Verify automation run results manually and send out automation reports to different teams.
- Ensure completeness of automation scripts using script audits against a well-defined set of standards.
- Suggest improvements, optimizations in current automation process, scripting standards and documentation.
- Participate in sprint planning, grooming sessions and provide QA estimates for PBIs and Bugs.

❖ **Quality Assurance Consultant**

Jan. 2012 – Jul. 2015

Mobile Multimedia, Dhaka, Bangladesh

▪ **Responsibilities:**

- Analyze Business and Technical Requirements and Acceptance Criteria to create Test Cases.
- Created Test scenarios, detailed Test Cases using Test Manager based on business and functional requirements.
- Participated in test case reviews with QAs, Developers and Product Management team.
- Performed Functional, Regression and End to End testing of mobile apps.
- Design and develop automation scripts for various projects using Selenium WebDriver.
- Performed Integration Testing using SoupUI as the web services testing tool.
- Created test coverage metrics for different products and created other QA documents.
- Participated in daily scrums, sprint planning, grooming, and retrospectives.

- ❖ **Graduate Research Assistant and Teaching Assistant** **Sep. 2009 –Jan. 2012**
Concordia University, Montreal, Quebec, Canada
 - **Phd Research:** Energy-Efficient Virtual Machine Management in Heterogeneous Environment (2 Publications)
 - **MASc Research:** Decentralized Urban Freight Management through Market Based Mechanisms (3 Publications)
 - **Teaching Assistant for Courses:**
 - COEN243: Programming Methodology I (C/C++) – 2 semesters
 - COEN244: Programming Methodology II (Java) – 1 semester
 - SOEN287: Web Programming (HTML5, PHP, Java Script, MySQL) -3 semesters
 - COEN231: Introduction to Discrete Mathematics – 1 semester
 - INSE6210: Total Quality Methodologies in Engineering - 2 semesters

- ❖ **Faculty Member in Information Technology Institute** **Jun. 2003 - Aug. 2009**
Jahangirnagar University, Dhaka, Bangladesh
 - **Responsibilities:**
 - Prepared course materials, delivered lectures, conducted lab sessions, evaluated exam scripts, supervised academic research and development projects.
 - **Subjects Taught:** Data Structure and Algorithms, Discrete Mathematics, Electronic Commerce, Network Resource Management, Network Security and Cyber Law, Operating System Concepts and UNIX, Software Engineering, Object Oriented Analysis and Design, Paradigms of Artificial Intelligence, Programming Language-I (C), Programming Language-II (C++), Object Oriented Programming with Java, Web programming.

- ❖ **Manager IT (Managing Partner)** **Feb. 2005 - Aug. 2009**
RAMS SOFTEL (A Sister Concern of RAMS Group), Dhaka, Bangladesh.
Project: Telecom Refurbishment (Commissioning, Testing, & Troubleshooting)
 - **Responsibilities:**
 - Design, Develop, and implement latest procedures for Telecom Refurbishment Projects.
 - Planning, organizing, reporting and evaluating Refurbishment procedures.
 - Developing resources and providing training to newly hired engineers for Telecom Refurbishment Projects.
 - Provide training for BTS and MW Installation and Commissioning and provide on call technical support.
 - Test and troubleshoot telecom equipment like RBS, MW, MUX, and Antennas.
 - Preparing test summary reports, defect reports and test completion reports for each project.

Academic Awards

- **Faculty of Engineering & Computer Science Graduate Scholarship** (September 2010)
- **Concordia University International Tuition Fee Remission Award** (September 2009)
- **Power Corporation of Canada Graduate Fellowship** (September 2009)
- **Asadul Kabir Gold Medal** for Outstanding academic achievement (April 2003)
