Profile

An analytical, dynamic, and team-oriented professional with extensive experience providing strategic support in direct accountability System Engineering roles.

- ❖ Broad, progressive experience with a strong background in: strategic planning, risk management, project management, process improvement, reporting, and data analysis.
- ❖ Core competencies: system architecture design, automation, cloud computing/ infrastructure, agile methodologies, and change management.
- ❖ Proficient communication, liaising, and leadership abilities (both working independently and as part of teams). Proven ability to establish a positive rapport with clients, colleagues, superiors, and other professionals while working in deadline-driven roles.
- ❖ Advanced technical competencies across various tools, technologies, systems, cloud platforms, and operating systems, including: Service Now, CommVault, Science Logic, AWS, Azure, Ubuntu, Debian, Centos, RHEL 6.10/7/8, OpenSuse, Active Directory, Kubernetes, and Ansible (among others).

Education

Algoma University | Mississauga, ON

2024

Graduate Certificate, Project Management

Mahatma Gandhi University | India

2016

Bachelor of Computer Applications

Experience

Cloud & System Engineer, System Administrator | Tata Consultancy Services

2016- 2023

- Strategically led multiple projects across diverse software systems, providing automation solutions and subject matter expertise designed to reduce cost and improve outputs.
- Used Service Now, CommVault, and Science Logic on a regular basis, in addition to RHEL, Ubuntu, OpenSuse, and Debian. Worked on several Azure cloud projects, including for Active Directory domains.
- Developed Ansible playbooks and roles to automate infrastructure provisioning. Automated cloud resource deployments in Azure and AWS, managed/ optimized configurations across Linux servers, and deployed monitoring tools for automated setups.
- Conducted validation planning and ensured deployment readiness for cloud-based applications.
- Achieved 99.9% uptime and improved operational efficiency in designed system architectures. Successfully implemented a Help Desk ticketing system (Service Now) to streamline IT support and improve resolution times by 35%. Reduced recovery times by 50% by designing/ implementing various backup solutions.

Certifications, Training, and Professional Development

- **Certifications:** Red Hat Certified System Administrator (RHCSA), AWS Certified Solutions Architect, Microsoft Azure 104
- **Training Completion:** Kubernetes
