Professional Summary

Cloud Infrastructure Engineer with 6+ years of experience supporting, securing, and maintaining cloud-based and hybrid infrastructure in regulated environments. Strong background in Azure platform services, monitoring, automation, and governance. Experienced working with Government of Canada-style security requirements, compliance standards, and operational processes. Adept at collaborating with engineering, security, and operations teams to deliver stable, scalable, and well-documented infrastructure solutions.

Core Skills

- Cloud Platforms: Microsoft Azure, Microsoft Fabric, Azure DevOps
- Infrastructure & Operations: Cloud infrastructure support, monitoring, logging, incident response
- Automation & Scripting: PowerShell, API integrations, infrastructure automation
- Security & Governance: Access controls, Conditional Access, identity governance, regulated environments
- Monitoring & Observability: Log Analytics, Azure Monitor, Defender 365
- CI/CD & Tooling: Azure Pipelines, DevOps workflows, change management
- Documentation & Compliance: Technical documentation, operational runbooks, audit readiness

Professional Experience

Cloud Data Analyst / Infrastructure Support — Bank of Canada (2023 – Present)

- Supported cloud infrastructure and monitoring solutions across Microsoft 365, Azure, Defender, and Fabric environments.
- Integrated telemetry and operational data using Log Analytics, Event Hubs, APIs, and SQL to support monitoring and reporting.
- Validated data pipelines and monitoring outputs to ensure accuracy and reliability for operational teams.
- Collaborated with engineering and security teams to improve detection, remediation, and system visibility.
- Contributed to governance practices and documentation for cloud operations.

Cloud Solutions Architect — Microsoft Canada (2022 – 2023)

- Provided guidance on Azure infrastructure, governance, and secure cloud design for enterprise and public-sector clients.
- Participated in architecture reviews and operational readiness discussions.
- Supported best practices for scalable, secure, and maintainable cloud environments.

Systems Analyst — Bell Canada / MSI (2021 – 2022)

- Supported enterprise systems and infrastructure operations, troubleshooting incidents and service issues.
- Documented operational procedures, system dependencies, and resolution steps.

Education

Diploma — Interactive Media Design (Web & Programming), Algonquin College — GPA 3.8

Certifications

- Microsoft Certified: Azure Data Fundamentals
- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Certified: Azure AI Engineer Associate (AI-102)
- CompTIA Security+
